Preface	xix	References	26
Foreword	xxi	Further Reading	27
Acknowledgments	xxiii		
1 Traditional Systems of Medicine and Harmonization		2 Ethnopharmacology and Ethnomedicine-Inspired Drug Development	
1.1 Traditional Medicine in Healthcare	1	2.1 Ethnopharmacology and Integrative Medicine	29
1.2 AYUSH Systems of Medicine	3	2.2 Ethnobotany in Drug Development	30
1.2.1 Traditional Knowledge Digital Library	4	2.2.1 Ethnobotany in Traditional Medicine and Modern Therapy	31
1.3 Ayurveda	4	2.2.2 Drug Discovery From Ethnobotany	32
1.3.1 Origin of Ayurveda	5	2.2.3 Ethnobotany and Drug Development	33
1.3.2 Ayurvedic Drugs and Pharmaceuticals	6	2.3 Anthropological Aspects of Ethnopharmacology	34
1.3.3 Medicinal Plants in Ayurveda	6	2.4 Ethnomedicine in Healthcare	34
1.3.4 Globalization of Ayurvedic Medication	6	2.5 Ethnomedicine in Complementary Therapeutics	36
1.3.5 Ayurvedic Treatment and Practice	7	2.6 Validation of Ethnomedicines	38
1.4 Unani	9	2.7 Ethnopharmacology and Translational Research	39
1.4.1 Therapy and Formulation of Unani Medicine	10	2.8 Biological Wealth of Ancient Wisdom	39
1.5 Siddha	11	2.9 Approaches to Drug Development Inspired by Traditional Medicine	40
1.6 Homeopathy	11	2.10 Intellectual Property (IP) Rights in Ethnopharmacology	42
1.7 Sowa-Rigpa	12	2.11 Conservation of Biodiversity in Ethnopharmacology	43
1.8 Traditional Chinese Medicine	12	2.11.1 Ethnobioresources and Conservation Approaches	44
1.8.1 Concepts of Traditional Chinese Medicine	13	2.12 Network Pharmacology in Ethnopharmacological Research	45
1.8.2 Quality Evaluation of Chinese Herbal Medicine	14	2.13 Reverse Pharmacology	45
1.9 Japanese Traditional Medicine	14	2.14 Phytoequivalence	45
1.10 Thai Herbal Medicine	15	2.15 Phytopharmaceuticals	47
1.11 Traditional Medicine in Bangladesh	15	References	48
1.12 Iranian Traditional Medicine	16	Further Reading	51
1.13 Malaysian Traditional Medicine	18		
1.14 Traditional Medicine in Australia	19		
1.15 Nature's Natural Product Library for New Drug Discovery	21		
1.16 Drugs Derived From TM	22		
1.17 Harmonization of Traditional Systems and Health Practices	24		

3 Quality Evaluation of Herbal Medicines: Challenges and Opportunities		
3.1 Factors Affecting the Quality of Herbs	53	
3.1.1 Authentication and Reproducibility of Herbal Ingredients	53	
3.1.2 Inter/Intra Species Variation in Plants	54	
3.1.3 Environmental Factors	54	
3.1.4 Geographical Location	57	
3.1.5 Plant Parts Used	57	
3.1.6 Time of Harvesting	58	
3.1.7 Post Harvesting Factors	58	
3.1.8 Contaminants in Herbal Ingredients	59	
3.1.9 Chemical Variation in Medicinal Plants	59	
3.2 Adulterations of Herbal Drugs	60	
3.2.1 Various Means of Adulterations in Herbal Medicine	60	
3.2.2 Reasons of Adulteration	62	
3.3 Deterioration of Herbal Drugs	63	
3.3.1 Light	63	
3.3.2 Moisture	63	
3.3.3 Temperature	64	
3.3.4 Airic Oxidation	64	
3.3.5 Bacteria and Molds	64	
3.3.6 Mites and Nematode Worms	64	
3.3.7 Insects and Moths	64	
3.3.8 Coleoptera or Beetles	65	
3.3.9 Control Measures for Deterioration	65	
3.4 Substitution of Herbs	65	
3.4.1 Substitution of the Species Belonging to the Same Family	65	
3.4.2 Substitution of Different Species	65	
3.4.3 Substitution of Different Parts of the Same Plant	66	
3.4.4 Substitution Due to Same Action	66	
3.5 Counterfeiting of Herbal Medicine	66	
3.5.1 Types of Counterfeit Drugs and Their Consequences	66	
3.5.2 Preventive Measures	67	
3.5.3 Methods of Detection	67	
3.6 Collection of Herbs	67	
3.6.1 Methods of Bark Collection	67	
3.6.2 Illustrative Examples With Discussion	68	
3.6.3 Good Agricultural Practices	68	
3.7 Identification and Authentication of Herbs	69	
3.8 Taxonomy of Herbs	70	
3.8.1 Nomenclature of Medicinal Plants	71	
3.8.2 Author Names and Synonyms	71	
3.8.3 Classification Systems	71	
3.9 Herbarium Documentation for Medicinal Herbs	72	
3.9.1 Voucher Specimen	72	
3.9.2 Preparation of Herbarium	73	
References	74	
Further Reading	74	
4 Qualitative Analysis for Evaluation of Herbal Drugs		
4.1 Importance of Qualitative Analysis	80	
4.2 Moisture Content	81	
4.2.1 Importance and Significance of Moisture Content	81	
4.2.2 Determination of the Moisture Content of a Crude Drug	82	
4.3 Ash Values	85	
4.3.1 Principles of Determination of Ash Value	86	
4.3.2 Methodology of Determination of Ash Value	86	
4.3.3 Comparative Evaluation of Different Ashing Techniques	89	
4.3.4 Near-Infrared Spectroscopy for the Determination of the Ash Value	91	
4.4 Determination of Extractive Value	92	
4.4.1 Principles and Methodology of the Determination of Extractive Values for Medicinal Plants	93	
4.4.2 Procedures for Determination of Extractive Values	93	
4.5 Residual Solvents	95	
4.5.1 Classification of Residual Solvents	96	
4.6 Total Solids	96	
4.6.1 Significance and Use	96	
4.7 Determination of Crude Fiber	97	
4.8 Bitterness Determination	98	
4.8.1 Procedure for Determination of Bitterness	98	
4.9 Swelling Index	98	
4.9.1 Determination of Swelling Index	99	
4.10 Foaming Index	99	
4.10.1 Determination of the Foaming Index	99	
4.11 Hemolytic Activity	101	
4.11.1 Determination of Hemolytic Activity	102	
4.12 Total Tannin Content	103	
4.12.1 Hydrolysable Tannins	104	
4.12.2 Complex Tannins	105	
4.12.3 Pseudotannins	105	

4.12.4	Determination of the Tannin Content	106	4.17.6	Detection of the Presence of Specific Microorganisms	136
4.12.5	The Tannin Content of Several Medicinal Plants	107	4.17.7	Determination of Aflatoxins	138
4.13	Total Phenolic Contents	107	4.18	Essential Oil in Crude Drugs	139
4.14	Total Flavonoid Contents	109	4.18.1	Principles and Methods for Determination of Essential Oil Content	139
4.14.1	Method 1	109	4.18.2	Simultaneous Extraction Coupled to TLC	141
4.14.2	Method 2	110	4.18.3	Direct Sampling From the Secretory Structures	142
4.14.3	Method 3	110	4.18.4	Supercritical Fluid Extraction	142
4.15	Heavy Metals	110	4.18.5	Microwave-Assisted Extraction	142
4.15.1	Toxic Elements	111	4.18.6	Illustrative Example of the Determination of the Essential Oils in Crude Drugs	143
4.15.2	Effects of Heavy Metals on Secondary Metabolites	112	4.18.7	Preliminary Quality Control Parameters for Essential Oils	143
4.15.3	Atomic Absorption Spectrometry (AAS)	115	References		147
4.15.4	Instrumentation	115	Further Reading		149
4.15.5	Techniques Based on Atomic Absorption Spectrometry	115			
4.15.6	Limit Test for Arsenic	116			
4.15.7	Limit Test for Mercury	117			
4.16	Pesticides	118	5	Morphological and Microscopical Evaluations	
4.16.1	Pest Control and Pesticide	118	5.1	Organoleptic Evaluation	152
4.16.2	Chemical Pest Control	119	5.1.1	Attributes of Organoleptic Evaluation	152
4.16.3	Different Pesticides and Chemical Composition	119	5.2	Macromorphological Evaluation	154
4.16.4	Various Forms of Preparations of Pesticides Used	119	5.3	Macromorphology of Crude Drugs From Barks	154
4.16.5	Adverse Effects of Different Pesticides	125	5.3.1	Nature of Curvature	155
4.16.6	Maximum Limit of Pesticide Residues for Herbal Drugs	126	5.3.2	Surface Characteristics	155
4.16.7	Limits for Pesticides	127	5.3.3	Characteristics of Fracture	155
4.16.8	Pests and Pest Control	127	5.3.4	Characteristics of Transverse Surface	156
4.16.9	Different Classes of Pesticide Based on Chemical Composition	128	5.3.5	Histology of Barks	156
4.16.10	Method for Determination of Pesticides	129	5.4	Macromorphology of Crude Drugs From Roots	156
4.17	Aflatoxins and Other Microbial Contents	131	5.4.1	Modification for Storage of Food	157
4.17.1	Factors Affecting Microbial Content	131	5.4.2	Modifications for Support	157
4.17.2	Microbial Quality Standards of WHO	132	5.4.3	Modifications for Special Functions	157
4.17.3	Principles for the Determination of Microbial Load	132	5.5	Macromorphology of Crude Drugs From Stems	158
4.17.4	Procedures for the Determination of Microbial Load	132	5.5.1	Underground Stem	158
4.17.5	Examples of the Importance of Microbial Load According to the Indian Pharmacopeia	135	5.5.2	Stem Tendrils	158
			5.5.3	Thorn	158
			5.5.4	Aerial Stem	158
			5.5.5	Weak Stems	158
			5.5.6	Subaerial Weak Stem	158
			5.5.7	Herbaceous and Woody Stems	158
			5.6	Macromorphology of Crude Drugs From Rhizomes	159
			5.6.1	Occurrence or Form of the Rhizome	159

Contents

5.6.2	Shape of the Drug	159	5.16	Evaluation of Crude Drugs by Microscopy	184
5.6.3	Surface Characters	159	5.16.1	Preparation of Crude Drug Sample for Microscopical Examination	184
5.6.4	Transverse Section	159	5.16.2	Clearing Reagents and Preliminary Treatment	185
5.7	Macromorphology of Crude Drugs From Woods	159	5.17	Quantitative Analytical Microscopy	187
5.7.1	Size and Color	160	5.17.1	Optical Micromeritics	187
5.7.2	Fracture and Hardness When Split	160	5.17.2	Micrometers	187
5.7.3	Transverse Surface	160	5.17.3	Micrometry	188
5.8	Macromorphological Description of the Entire Aerial Parts	160	5.17.4	Leaf Characters for the Evaluation of Impurity	189
5.9	Macromorphology of Crude Drugs From Leaves	160	References	192	
5.9.1	Types of Leaves	160	6	Extraction and Other Downstream Procedures for Evaluation of Herbal Drugs	
5.9.2	Structural Distribution of Leaves	161	6.1	Basic Principles and Rationale	195
5.9.3	Arrangement and Position of Leaves	161	6.2	Factors Affecting Extraction of Herbal Drugs	198
5.9.4	Surface Appearance and Texture	161	6.2.1	Choice of Solvents	198
5.10	Macromorphological Description of Herbal Drugs Containing Flowers	165	6.2.2	Types of Extracts	199
5.10.1	Receptacle of Floral Drugs	165	6.2.3	Raw Materials	199
5.10.2	Characteristics of Inflorescence	165	6.2.4	Choice of Solvent	200
5.10.3	Arrangement of Floral Parts on Thalamus	167	6.2.5	Conditions for Extraction	200
5.11	Macromorphological Description of Fruit Drugs	167	6.2.6	Selection, Collection, and Identification of Plant Material	200
5.11.1	Shape and Size	167	6.2.7	Drying of the Crude Drugs	200
5.11.2	Types of Fruits	167	6.2.8	Comminution and Classification	201
5.12	Macromorphological Evaluation of Crude Drugs Obtained From Seeds	168	6.3	Methods of Extraction	201
5.12.1	Shape of the Seeds	168	6.3.1	Factors Affecting the Choice of Extraction Process	202
5.12.2	Seed Coat	168	6.3.2	Maceration, Digestion, and Remaceration	202
5.12.3	Special Features of Seeds	169	6.3.3	Infusion and Decoction	207
5.13	Macromorphological Evaluation of Cellular Materials or Unorganized Drugs	169	6.3.4	Vortical or Turbo Extraction	207
5.13.1	Evaluation of Physical State	169	6.3.5	Ultrasound Extraction	208
5.13.2	Vegetable Debris	170	6.3.6	Extraction by Electrical Energy	208
5.13.3	Effect on Heating	170	6.3.7	Countercurrent Extraction	208
5.13.4	Morphological Characteristics of a Few Unorganized Herbal Drugs	170	6.3.8	Hot Continuous Extraction— Soxhlation	210
5.14	Cytomorphological Evaluation of Herbal Drugs	171	6.3.9	Extraction of Essential Oil	212
5.14.1	Analytical Application of Cytomorphology	171	6.3.10	Microwave Extraction	213
5.14.2	Basic Cell Types and Cell Inclusions Present in Herbal Drugs	173	6.3.11	Supercritical Fluid Extraction	216
5.15	Microscopical Techniques	179	6.3.12	Pressurized Liquid Extraction	217
5.15.1	Instruments for Microscopical Study	179	6.3.13	General Protocols for Extraction of Phytoconstituents	219
5.15.2	Microchemical Testing of Herbal Drugs	181	6.4	Effect of Solvent, Solvent Mixtures, and Solution on Extraction	219
5.15.3	Microchemical Precipitation	183	6.4.1	Solvents Used for Extractions	221
5.15.4	Micro-sublimation	183	6.4.2	Extraction Enhancement by Emerging Extraction Solvents	221
			6.4.3	Properties of Solutions	223

6.4.4	Types of Solutions	223	7.3.6	Tests for Triterpenes	245
6.4.5	Classification of the Solvents	226	7.3.7	Test for Saponins	245
6.4.6	Influence of Solvents	227	7.3.8	Other Polyphenols	246
6.4.7	Combined Effect of pH and Solvents	227	7.3.9	Tests for Resins	246
6.4.8	Examples of Effects of Solvents on the Extraction	227	7.3.10	Tests for Fixed Oils and Fats	246
6.5	Characteristics of Phytoconstituents	227	7.3.11	Tests for Carbohydrates	246
6.5.1	Polarity	227	7.3.12	Test for the Presence of Carotenoids	248
6.5.2	pH	227	7.4	Alkaloids and Their Analysis	248
6.5.3	Thermostability	227	7.4.1	Importance of Alkaloids in Phytotherapy	251
6.6	Interfering Compounds in Extraction of Desired Phytoconstituents	228	7.4.2	Classification of Alkaloids	252
6.6.1	Lipids	228	7.4.3	Pyridine–Piperidine Alkaloids	259
6.6.2	Colors and Pigments	228	7.4.4	Tropane Alkaloids	259
6.6.3	Plasticizers	229	7.4.5	Quinoline Alkaloids	262
6.6.4	Water Soluble Polysaccharides and Other Carbohydrate Polymers	229	7.4.6	Isoquinoline Alkaloids	263
6.7	Extraction Methods for Specific Phytochemical Groups	229	7.4.7	Indole Alkaloids	266
6.7.1	Alkaloids	229	7.4.8	Imidazole Alkaloids	270
6.7.2	Carotenoids	229	7.4.9	Steroidal Alkaloids	270
6.7.3	Fixed Oils, Fats, and Waxes	230	7.4.10	Alkaloidal Amines	270
6.7.4	Glycosides	230	7.4.11	Purine Bases	271
6.7.5	Phenolic Compounds	230	7.5	Volatile Oils, Spices, and Their Analysis	272
6.7.6	Proteins	230	7.5.1	Chemical Nature of Volatile Oils and Their Analysis	275
6.7.7	Polysaccharides	230	7.5.2	Hydrocarbons Containing Oils	276
6.8	Treatment of Drug Residue After Extraction–Downstream Processing	231	7.5.3	Oils Containing Alcohol	277
6.8.1	Sanitization of Extracts and Elimination of Solvents	231	7.5.4	Oils Containing Cineole	279
6.8.2	Removal of Solvents	231	7.5.5	Oils Containing Aldehydes	280
6.8.3	Freeze Drying	233	7.5.6	Volatile Oils Containing Ketone	281
6.8.4	Reverse Osmosis	234	7.5.7	Oils Containing Phenol	281
6.8.5	Particle Size Reduction	234	7.5.8	Oils Containing Esters	282
References		235	7.5.9	Estimation of Oil of Mustard	283
Further Reading		236	7.5.10	Physical Characteristics of Volatile Oils	283
7	Bioactive Phytocomponents and Their Analysis		7.5.11	Qualitative and Quantitative Analysis of Volatile Oils	284
7.1	Bioactive Phytocomponents and Their Classification	238	7.6	Fixed Oils, Fats, and Waxes	285
7.1.1	Classification of Bioactive Phytocomponents	239	7.6.1	Fixed and Volatile Oils	285
7.2	Importance of Phytoconstituents in Therapy	240	7.6.2	Chemical Nature of Fixed Oils, Fats, and Their Analysis	285
7.3	Qualitative Analysis of Crude Drug Extracts and Isolates	241	7.6.3	Main Characteristic Features of Fixed Oils	287
7.3.1	Tests for Alkaloids	241	7.7	Phenylpropanoids and Their Analysis	288
7.3.2	Tests for Tannins	243	7.7.1	Classification of Phenylpropanoids	288
7.3.3	Test for Glycosides	243	7.7.2	Individual Classes of Phenylpropanoids With Examples	289
7.3.4	Test for Flavonoids	245	7.8	Flavonoids	290
7.3.5	Tests for Phytosterols	245	7.8.1	Classification	290
			7.8.2	Examples of Classes of Flavonoids	292
			7.9	Resins and Resinous Plant Drugs and Their Analysis	293
			7.9.1	Resins and Their Importance in Phytotherapy	293

7.9.2	Chemical Classes of Resins and Their Analysis	295
7.9.3	Quantitative Chemical Analysis of Some Resinous Compounds	297
7.10	Tannins of Therapeutic Importance and Their Analysis	297
7.10.1	Chemical Classification of Tannins and Their Quantitative Analysis	297
7.11	Terpenoids and Their Analysis	299
7.11.1	Monoterpenoids	300
7.11.2	Sesquiterpenoids	300
7.11.3	Diterpenoids	301
7.11.4	Triterpenoids	302
7.11.5	Tetraterpenoids and Carotenoids	303
7.12	Glycosidal Components and Their Analysis	303
7.12.1	Chemical Nature of Glycosides and Their Analysis	305
7.12.2	Anthraquinone Glycosides	306
7.12.3	Saponin Glycosides	308
7.12.4	Cyanogenic Glycosides	310
7.12.5	Isothiocyanate Glycosides	310
7.12.6	Alcohol Glycosides	311
7.12.7	Aldehyde Glycosides	311
7.12.8	Phenol Glycosides	312
7.13	Fluorescent Substances and Their Analytical Parameters	313
7.14	Coloring Matters and Their Analysis	313
