CONTENTS

Preface xi

Acknowledgments xv

CHAPTER 1. Overview 3

CHAPTER 2. Learning 25

2.1 *Varieties of Learning Behavior* 27
2.2 *Recurrent Games* 30
2.3 *Fictitious Play* 30
2.4 *Potential Games* 36
2.5 *Nonconvergence of Fictitious Play* 38
2.6 *Adaptive Play* 41

CHAPTER 3. Dynamic and Stochastic Stability 44

3.1 *Asymptotic Stability* 44
3.2 *Stochastic Stability* 46
3.3 *Elements of Markov Chain Theory* 48
3.4 *Perturbed Markov Processes* 54
3.5 *The Neighborhood Segregation Model* 62

CHAPTER 4. Adaptive Learning in Small Games 66

4.1 *Risk Dominance* 66
4.2 *Stochastic Stability and Risk Dominance in* 2×2 *Games* 68
4.3 *Who Goes First?* 71
4.4 *Playing the Field* 72
4.5 *Computing the Stationary Distribution* 73

CHAPTER 5. Variations on the Learning Process 77

5.1 *Heterogeneity in Information* 77
5.2 *Heterogeneity in Payoffs* 80
5.3 *Alternative Models of Noise* 80
5.4 *Unbounded Memory* 83
5.5 *Other Learning Models* 89

CHAPTER 6. Local Interaction 91

6.1 Games Played on Graphs 92
6.2 Interaction Structure and Speed of Adjustment 98

CHAPTER 7. Equilibrium and Disequilibrium Selection in General Games 103

7.1 Coordination Games 103
7.2 Weakly Acyclic Games 106
7.3 Curb Sets 109
7.4 Elimination of Strictly Dominated Strategies 112

CHAPTER 8. Bargaining 113

8.1 Focal Points 113
8.2 Adaptive Learning in Bargaining 118
8.3 Sketch of the Proof of Theorem 8.1 120
8.4 Variations on the Bargaining Model 124
8.5 Heterogeneous Populations 126
8.6 Bargaining with Incomplete Information 128
8.7 Fifty-Fifty Division 129

CHAPTER 9. Contracts 131

9.1 Choice of Contracts as a Coordination Game 132
9.2 Maximin Contracts 133
9.3 A Contract Selection Theorem 134
9.4 The Marriage Game 136
9.5 Examples Showing Departures from Strict Efficiency and Exact Maximin 138
9.6 Small Games and Symmetric Coordination Games 140
9.7 The Kalai-Smorodinsky Solution 141
9.8 Correlated Shocks 142

CHAPTER 10. Conclusion 144

Appendix: Proofs of Selected Theorems 151

Notes 173

Bibliography 177
