1	Introduction	1
1.1	General approach	3
1.2	State of research	3
1.3	Organisation of the thesis	5
2	Demand	7
2.1	Introduction	7
2.2	The model	13
2.3	Necessities and utility comparison	18
2.4	Optimal demand	26
2.5	Correlation and demand	32
2.6	Risk aversion	41
2.7	Comparative statistics and background risks	52
2.8	Idiosyncratic risk, common shock, and insurance	61
2.9	Conclusions	69
3	Supply	73
3.1	Introduction	73
3.2	The classic insurance	74
3.3	The index based insurance approach	78
3.4	The insurer's profit under an index based insurance	83
3.5	Observation costs	90
3.6	Conclusions and critical reflection	96
4	Self-insurance	101
4.1	Introduction – Index insurance demand, self-insurance, and self-protection	101
4.2	Model	102
4.3	Successive decisions	104
4.4	Simultaneous decisions	113
4.5	Self-insurance and correlation	117
4.6	Conclusions	126
5	Moral hazard and group sample observation	131
5.1	Introduction	131
5.2	The model	132
5.3	Separate observation	135
5.4	Group sample observation	140

5.4.1	Perfect dependence	141
5.4.2	Independence	150
5.4.3	Mere dependence	151
5.5	Conclusions	156
5.6	Reflection and outlook	159

6 Conclusions and outlook 161

Appendix 165

A.1	Chapter Demand	165
A.1.1	Proof of Proposition 2	165
A.1.2	Arrow-Pratt measurement of risk aversion	167
A.1.3	Risk aversion: Second example	168
A.1.4	Proof of Proposition 11 Part (b): Index insurance and pooling insurance separately	169
A.1.5	Proof of Proposition 11 Part (b): Combination of both insurance schemes	169
A.1.6	Proof of Proposition 11 Part (b): Maximum	172
A.1.7	Proof of Proposition 11 Part (c): Basic chance remains	175
A.1.8	Proof of Proposition 11 Part (c): Maximum	179
A.2	Chapter Supply	182
A.2.1	Proof of Lemma 12	182
A.2.2	Profit subject to a chance in loss probability	184
A.2.3	Alternative proof of Lemma 13	185
A.2.4	Proof of Lemma 13 (b)	185
A.2.5	Proof of Proposition 16	193
A.2.6	Proof of Proposition 17 Part (a)	202
A.2.7	Calculation for Proposition 17 Part (b)	208
A.2.8	Calculation for Proposition 18 Part (d)	208
A.2.9	Calculation for Proposition 18 Part (e)	210
A.2.10	Proof of Proposition 18 Part (g)	211
A.3	Chapter Effort	214
A.3.1	Auxiliary calculation for Corollary 20	214
A.3.2	Auxiliary calculation for Proposition 22	215
A.3.3	Proof of Proposition 23	215
A.3.4	Proof of Proposition 24	228
A.3.5	Calculations for Lemma 25	234
A.4	Moral hazard and group sample observation	235
A.4.1	Separate observation: Deflection	235

A.4.2	Explanations for Section 5.4.1 Perfect dependence . . .	236
A.4.3	Three-insured	237
A.4.4	Proof of Proposition 28	240
A.4.5	Ex-ante observation with ex-post announcement . . .	244
A.4.6	Random selection	245
A.4.7	Always selecting randomly	246
A.4.8	Calculation for Section 5.4.3 Mere dependence	248
