| <i>Preface</i> | ix |
| <i>Acknowledgments</i> | xiii |
| <i>List of Figures</i> | xv |
| <i>List of Boxes</i> | xvii |
| | |
| 1. Overview: A New Kind of Science | 1 |
| | |
| Part I. Quantum Theory | |
| | |
| 2. Superposition | 15 |
| 2.1 Beams | 15 |
| 2.2 Some Interference Phenomena | 18 |
| 2.3 Polarization | 21 |
| 2.4 More Interference Phenomena | 24 |
| 2.5 Modeling Interference | 28 |
| 2.6 Measurement | 34 |
| 2.7 What's Really Happening? | 36 |
| 2.8 Summary | 38 |
| | |
| 3. Entanglement | 40 |
| 3.1 What is Entanglement? | 40 |
| 3.2 Entanglement and Incompleteness | 45 |
| 3.3 Entanglement Exhibited | 47 |
| | |
| 4. "Non-locality" | 53 |
| 4.1 Spooky Action at a Distance? | 53 |
| 4.2 Mermin's Demonstration | 56 |
| 4.3 A Simplified Bell Argument | 59 |
| 4.4 Two Views of a Quantum State | 65 |
| 4.5 Quantum States Offer Prescriptions | 68 |
| 4.6 Exorcising the Spook | 72 |
| | |
| 5. Assigning Values and States | 75 |
| 5.1 Making Quantum State Assignments | 75 |
| 5.2 Measurement-free Quantum Probabilities | 79 |
| 5.3 The Grounds of Quantum State Assignments | 86 |
| | |
| 6. Measurement | 90 |
| 6.1 The Measurement Problem | 90 |
| 6.2 The EPR Argument Revisited | 100 |

| | |
|--|-----|
| 7. Interlude: Some Alternative Interpretations | 102 |
| 7.1 Bohmian Mechanics | 103 |
| 7.2 Non-linear Theories | 109 |
| 7.3 Many-outcomes Theories | 110 |
| Part II. Philosophical Revelations | |
| 8. Theories, Models, and Representation | 121 |
| 8.1 Representation and Theories | 121 |
| 8.2 Applying Quantum Models | 126 |
| 8.3 Truth, Content, and Objectivity | 132 |
| 9. Probability and Explanation | 138 |
| 9.1 Probability | 143 |
| 9.2 Explanation | 148 |
| 10. Causation and Locality | 165 |
| 10.1 Introduction | 165 |
| 10.2 Relativistic Spatiotemporal Relations | 166 |
| 10.3 Relativistic Chance | 168 |
| 10.4 Chances from Quantum Probabilities | 170 |
| 10.5 Chance, Causation, and Intervention | 172 |
| 10.6 Locality and Local Causality | 179 |
| 11. Observation and Objectivity | 184 |
| 11.1 Introduction | 184 |
| 11.2 Objectivity | 186 |
| 11.3 Wigner's Friend | 188 |
| 11.4 Paradox Resolved | 190 |
| 11.5 Objective Content Secured | 193 |
| 11.6 Independent Verifiability | 196 |
| 11.7 Conclusion: A Limit to Transcendental Objectivity | 198 |
| 12. Meaning | 202 |
| 12.1 Introduction | 202 |
| 12.2 Some Novel Quantum Concepts | 204 |
| 12.3 The Content of Magnitude Claims | 210 |
| 12.4 Some Conceptual Mutations | 218 |
| 12.5 The Content of Denoting Terms | 223 |
| 13. Fundamentality | 228 |
| 13.1 Philosophy and Fundamental Physics | 229 |
| 13.2 Entities | 230 |
| 13.3 Properties | 234 |
| 13.4 Laws | 238 |
| 13.5 How Quantum Theory is Fundamental | 242 |

| | |
|--|-----|
| 14. Conclusion | 246 |
| Appendix A. Operators and the Born Rule | 259 |
| A.1 Vectors and Inner Products | 259 |
| A.2 Operators and the Simple Born Rule | 261 |
| A.3 More About Operators | 265 |
| A.4 Commutation, Compatibility, and the Compound Born Rule | 266 |
| A.5 Density Operators and Mixed States | 266 |
| A.6 Interacting Systems | 267 |
| Appendix B. Two Arguments Against Naive Realism | 270 |
| B.1 First Argument | 270 |
| B.2 Second Argument | 272 |
| Appendix C. A Simple Model of Decoherence | 275 |
| <i>Bibliography</i> | 277 |
| <i>Index</i> | 285 |
