Preface			
Aci	know	ledgments	lxvii
1	Joa	n Robinson Inside and Outside the Stream	1
	Gee	orge R. Feiwel	
	1	Introduction	1
	2	Imperfect competition: Marshall, Pigou and Sraffa	2
	3	The Economics of Imperfect Competition	10
	4	Imperfect competition reconsidered	21
	5	The Keynesian revolution	33
	6	The Accumulation of Capital and vicissitudes of capitalism	44
	7	The capital controversy	59
	8	Economic philosophy	71
	9	Non Omnis Moriar	102
2	Rei	nembering Joan	121
	Pat	ul A. Samuelson	
	1	Introduction	121
	2	Marxian studies	122
	3	Constant returns?	125
	4	Personalities	127
	5	Factor-price flap	128
	6	Agnosticism	130
	7	A simplified thought experiment	132
	8	Joan Robinson, leftist	135
	9	What the capital controversy taught me	137
	10	Finale	139
DA	DT I	CONTENT AND METHOD OF ECONOMIC THEORY	r
IA		CONTENT AND METHOD OF ECONOMIC INDOM	
3	Joa	n Robinson and Modern Economic Theory: An Interview	147
	Ken	inein J. Arrow	
4	Son	ne Assumptions of Contemporary Neoclassical Economic	10/
	The	ology	186
	Pet	er J. Hammond	104
	1	Assumptions are not to be compared with reality	186
	2	Consumer sovereignty	193
	3	Unbounded rationality	196

Contents

	4	Unbounded forethought	199
	5	Unbounded cooperation	203
	6	Pareto efficiency is sufficient for ethical acceptability	206
	7	The distribution of wealth is ethically acceptable	208
	8	Consumers can survive without trade	210
	9	Income effects are negligible	212
	10	Pareto efficiency is necessary for ethical acceptability	214
	11	There is a representative consumer	218
	12	Distortionary taxes create deadweight losses	221
	13	Domestic public expenditure programs are wasteful	222
	14	Transfer programs confer no benefits	225
	15	Capital markets are perfect	226
	16	Anticipated monetary and fiscal policies are ineffective	229
	17	Inflation is caused by an expanding money supply	232
	18	There is a representative worker	236
	19	The current level of unemployment is ethically acceptable	239
	20	There is a representative capital good	241
	21	Product markets are perfectly competitive, or at least contes-	
		table	243
	22	Neoclassical economics need not be theological	246

	Contents	vii
	2 'Getting into equilibrium' and the long period	305
10	Stability Analysis in Micro and Macro Theory: An Interview <i>Franklin M. Fisher</i>	311
11	On Long-run Equilibrium in Class Society	323
	Lawara Nea 1. The question of the rate of profit	374
	2 The 'Method of Growth Economics'	324
	3 The uniform growth rate	326
	4 The rate of profit and the rate of growth	327
	5 A claim of the critics	328
	6 Capitalism and social classes	329
	7 A simple model of growth equilibrium	330
	8 Class wealth and the salary/wage differential	332
	9 Growth equilibrium v. Class behavior	332
	10 Different propensities to save out of wages and profits	333
	11 Many social classes	334
	12 More on human capital	336
	13 Corporate retained earnings	336
	14 Accumulation, relative shares and class sizes	338
	15 Methods of economic analysis	340
12	Some Notes on Capital, Expectations and the Analysis of Changes	344
	Pierangelo Garegnani	244
	A premise	244
	Appendix I: Comments on Garegnani's paper by Joan Pohinson	360
	Appendix II: Rejoinder by Joan Robinson	361
13	On Sraffa's Contribution to Economic Theory	368
	Pierangelo Garegnani	
PA	RT III: CAPITAL, GROWTH, DISTRIBUTION	
14	Accumulation and Capital Theory	377
	Edward Nell	
	1 The Keynesian problematic	379
	2 The neoclassical response	380
	3 Optimality and the golden rule	381
	4 Technical progress	381
	5 Capital theory	382
	6 Conceptualizing production	384
	/ Neo-Keynesian theory	282
	o Investment and the accelerator	380

Contents

		9 Capacity constraints?	387
		10 Capital value and profit	387
		11 The significance of steady growth	388
		12 Accumulation and technical change	390
		13 Steady growth v. transformational growth	391
		Appendix	392
15	Tro	tting Platinum Ages	413
	Gai	itam Mathur	
	1	Robinsonian golden age	413
	2	The Sraffa and the von Neumann models	414
	3	The Sraffa-von Neumann model	416
	4	The platinum age	418
	5	Galloping and creeping platinum ages	419
	6	Trotting platinum age	421
	7	Development differentiated from growth	422
	8	Development with social justice	425
	9	The role of lower-order machinery	427
	10	The progression of development	431
	11	Conclusion	434
16	Op Rol	timality and Decentralization in Infinite Horizon Economies bert A. Becker and Mukul Majumdar	436
	1	Introduction	436
	2	Issues	438
	3	Efficiency and optimality	458
	4	One-sector models: decentralization	478
	5	Concluding comments	498
17	Caj And	pital Theory Paradoxes: Anything Goes drey Mas-Coleli	505
	1	Introduction	505
	2	The golden rule theorem	508
	3	A converse to the golden rule theorem	511
	4	Proof of the proposition	514
18	Ste	ady States and Determinacy of Equilibria in Economies With	
	Infi	nitely Lived Agents	521
	Tin	10thy J. Kehoe, David K. Levine and Paul M. Romer	
	1	Introduction	521
	2	An example	524
	3	Homogeneous extension of concave functions	529
	4	Formal equilibrium model	531
	5	Social return and savings functions	535
	A	ppendix	542

viii

		Contents	ix		
19	Dy	namic Optimization under Uncertainty: Non-convex Feasible Set	545		
	Mukul Majumdar, Tapan Mitra and Yaw Nvarko				
	1	Introduction	545		
	2	The model	548		
	3	Monotonicity of optimal investment policy function	552		
	4	Interior optimal processes and the stochastic Ramsey-Euler			
		condition	554		
	5	Some properties of the value function and uniqueness of			
		optimal processes	555		
	6	Dynamic behavior of an optimal input process	556		
	7	Some additional results	561		
	8	Proofs	566		
20	Sto	chastic Capital Theory	591		
	Wil	lliam A. Brock, Michael Rothschild and Joseph E. Stiglitz			
	1	Introduction	591		
	2	Discrete time-stochastic processes	594		
	3	One-dimensional diffusion processes	599		
	4	General diffusion processes	618		
21	Der	nand Composition, Income Distribution, and Growth	623		
	Lar	ice Taylor			
	1	The short run	624		
	2	Dynamics in the short run	629		
	3	The steady state	632		
	4	Summary	635		
22	Thr	ee Fundamental Productivity Concepts: Principles and Measure-			
	mer	it in the second s	638		
	Wil	liam J. Baumol and Edward N. Wolff			
	1	Three productivity growth concepts	638		
	2	On productive capacity measures	639		
	3	Imperfect association of productive capacity and welfare	640		
	4	On welfare productivity and its measurement	642		
	5	Crude productivity and the services	644		
	6	Some empirical comparisons	647		
	7	Measurement of growth in productive capacity	649		
	8	Empirical results	655		
	9	Conclusion	657		
23	Tec	hnical Progress, Research and Development	660		
	The	omas K. Rymes			
	1	Introduction	660		
	2	The Robinsonian theory of accumulation and technical			
		progress	661		

Contents

	3	Measures of technical progress and the economic accounting	
		system	665
	4	Capital accumulation, captilized expenditures and recorded	
		technical progress	668
	5	Conclusion	674
24	The	Wage-share and the Rate of Exchange of Labor Time	677
	Rol	pert Dixon	
	1	A model of labor's share	678
	2	An alternative expression for the wage-share	680
	3	The rate of exchange of labor time	681
	4	The rate of exchange of labor time further considered	682
PA	RT I	V: DEVELOPMENT AND TRADE	
25	The	Theory of International Trade, Steady-state Analysis and	
	Eco	pnomics of Development	687
	Τ.	N. Srinivasan	
	1	Introduction	687
	2	Problems with steady-state analysis	688
	3	North-South models	693
	4	Imperfect competition increasing returns international trade	

25	The Theory of International Trade, Steady-state Analysis and		
	Economics of Development	687	
	T. N. Srinivasan		
	1 Introduction	687	
	2 Problems with steady-state analysis	688	
	3 North-South models	693	
	4 Imperfect competition, increasing returns, international trade		
	and development	695	
	Appendix	698	
26	Joan Robinson as a Development Economist	702	
	Irma Adelman and David Sunding		
	1 Development economics in the 1950s and 1960s	702	
	2 Joan Robinson's development economics	704	
	3 Growth and accumulation	705	
	4 Joan Robinson and socialism	708	
	5 Joan Robinson and the mainstream in the 1970s	710
