

Content

1	Introduction	11
2	Literature review	13
2.1	Bovine respiratory disease (BRD)	13
2.2	<i>Pasteurella multocida</i>	13
2.3	<i>Mannheimia haemolytica</i>	15
2.4	<i>Mycoplasma bovis</i>	16
2.5	Viruses	17
2.6	Precision-cut lung slices (PCLS)	18
2.7	Generation of specific immunoglobulin Y (IgY) in chickens	18
3	Materials and Methods	21
3.1	Bacterial strains and culture conditions	21
3.2	Generation of specific antibodies	22
3.2.1	Preparation of antigens	22
3.3	Immunisation of chickens	24
3.4	Purification of chicken IgY	25
3.4.1	Purification of IgY by Tong et al. (2015)	25
3.4.2	Purification of IgY by Tan et al. (2012)	25
3.5	Characterisation of specific antibodies	26
3.5.1	SDS-PAGE and Western blot	26
3.5.2	ELISA of serum IgY	27
3.5.3	Immunofluorescence staining of bacteria	28
3.6	Precision-cut lung slices (PCLS)	28
3.6.1	Preparation of PCLS	28
3.6.2	Infection of PCLS	30
3.6.3	Haematoxylin and eosin (H&E) and immunofluorescence analysis of PCLS	31
3.6.4	Quantitative real time PCR (qRT-PCR)	32
3.6.5	Quantification of colony-forming units by plating	32

4	Manuscript I Generation and purification of immunoglobulin Y (IgY) from egg yolk against <i>Pasteurella multocida</i>, <i>Mannheimia haemolytica</i> and <i>Mycoplasma bovis</i>.....	34
4.1	Introduction.....	35
4.2	Materials and methods	37
4.2.1	Bacterial strains and culture conditions	37
4.2.2	Preparation of antigens.....	37
4.2.3	Immunisation of chickens.....	38
4.2.4	Purification of chicken IgY.....	39
4.2.5	SDS-PAGE and Western blot	40
4.2.6	ELISA	40
4.2.7	Immunofluorescence staining of bacteria.....	41
4.3	Results	42
4.3.1	Detection of IgY-serum titer during immunisation	42
4.3.2	Purification of IgY.....	45
4.3.3	Characterisation of purified IgY.....	47
4.3.4	Immunofluorescence staining of <i>P. multocida</i> and <i>M. haemolytica</i>	49
4.4	Discussion	50
5	Manuscript II Establishment of PCLS as an <i>ex vivo</i> model for infection of lung tissue with <i>Pasteurella multocida</i>	52
5.1	Introduction.....	54
5.2	Materials and methods	56
5.2.1	Bacterial strains and culture conditions	56
5.2.2	Precision-cut lung slices (PCLS).....	56
5.2.3	Infection of PCLS.....	57
5.2.4	H&E and immunofluorescence analysis of PCLS	58
5.2.5	Quantitative real time PCR (qRT-PCR)	58
5.3	Results	60
5.3.1	Viability of bovine PCLS	60
5.3.2	Histopathological changes of the lung tissue and adherence of <i>P. multocida</i> to bovine PCLS	60

5.3.3	Colonization of bovine PCLS by <i>P. multocida</i>	63
5.4	Discussion.....	65
6	Manuscript III Characterisation of different <i>P. multocida</i> strains in bovine precision-cut lung slices (PCLS)	69
6.1	Introduction.....	71
6.2	Materials and methods	72
6.2.1	Bacterial strains and culture conditions	72
6.2.2	Precision-cut lung slices (PCLS).....	73
6.2.3	Infection of PCLS.....	74
6.2.4	Haematoxylin and eosin and immunofluorescence analysis of PCLS ...	75
6.2.5	PCR assay.....	76
6.2.6	Quantitative real time PCR (qRT-PCR)	78
6.3	Results	80
6.3.1	Virulence associated genes and capsule types of different <i>P. multocida</i> strains	80
6.3.2	Effect of inactivation of bacteria on host-pathogen interaction in PCLS	81
6.3.3	Influence of serum supplement on tissue damage in infected PCLS.....	83
6.3.4	Comparison of different <i>P. multocida</i> strains in bovine PCLS.....	87
6.4	Discussion	95
7	General discussion.....	100
8	Summary	104
9	Zusammenfassung	106
10	References	108
11	Appendix	118
11.1	List of Figures	118
11.2	List of Tables	119
