

# Detailed Contents

<b>Preface</b>	<b>xiii</b>
<b>Acknowledgments</b>	<b>xv</b>
<b>1. An Emerging Science</b>	<b>1</b>
The Founding of Psychology	3
A Laboratory for Research	3
Empiricism and Rationalism	5
The Nature of Science	7
The Work of Psychology	9
Scientists and Practitioners	10
Psychology's Dual Goals	12
Scope of Modern Psychology	15
Psychological Perspectives	16
Subfields and Specialties	18
<i>Summary</i>	20
<i>Critical Thinking</i>	21
<b>2. Research Methods</b>	<b>22</b>
The Research Challenge	23
Basic Research Approaches	24
The Problem of Definitions	26
Research and Common Sense	28
Experimental Methods	29
The Classical Experiment	29
Variations in Designs	32
Descriptive Methods	34
Naturalistic Observation	35
The Case Study	36
Survey Methods	39
Analysis of the Data	40

Quantitative Analyses	41
Qualitative Analyses	43
<i>Summary</i>	46
<i>Critical Thinking</i>	48
<b>3. Biological Psychology</b>	<b>49</b>
Origins of Biological Psychology	51
Wundt and Physiology	51
Changing Views of the Brain	53
Basic Research Methods	55
The Nervous System	58
Interlocking Systems	58
Structure of Neurons	59
Neurotransmitters and Drugs	62
Organization of the Brain	66
Maintaining Internal Conditions	67
Responding to External Events	69
The Limbic Connection	70
The Cerebral Cortex	73
Primary and Association Areas	74
Concept of Localization	75
Modern Biomedical Therapy	77
Assessment and Diagnosis	78
Guidelines for Treatment	79
Commentary and Critique	83
<i>Summary</i>	86
<i>Critical Thinking</i>	88
<b>4. Psychoanalysis</b>	<b>89</b>
Background of Psychoanalysis	91
The Freudian Setting	91
Concept of the Unconscious	94
Structure of Personality	96
Development of Personality	99
The Psychosexual Stages	99
Fixations in Everyday Living	103
Crises Through the Life Cycle	105
Expressions of the Unconscious	106
Symbolism in Behavior	107
Dreams and Mistakes	109
Defense Mechanisms	111
Adjustments and Lifestyles	112

Psychoanalysis as a Therapy	114
Use of Free Association	116
Resistance and Transference	118
Commentary and Critique	123
<i>Summary</i>	127
<i>Critical Thinking</i>	129
<b>5. Behaviorism</b>	<b>130</b>
Beginnings of Behaviorism	132
Conditioning as Learning	133
Respondent and Operant Behavior	134
Skinner's Radical Behaviorism	136
Behavioral Science and Society	138
Classical Conditioning	141
The Classical Process	142
Classical Conditioning Principles	145
Operant Conditioning	148
The Operant Process	148
Operant Conditioning Principles	153
Two-Factor Theory	159
Behavior Modification	161
Changing Respondent Behavior	163
Modifying Operant Behavior	164
Use of Observational Learning	167
Commentary and Critique	168
<i>Summary</i>	172
<i>Critical Thinking</i>	174
<b>6. Humanistic Psychology</b>	<b>175</b>
Rise of Humanistic Psychology	177
Rogers and Growth Potential	177
Protest of the Third Force	179
Three Human Characteristics	182
Subjectivity: The Basic Reality	182
Individuality and Self Theory	184
The Capacity for Growth	187
Influence of Early Experience	190
Conditions of Worth	191
Congruence and Incongruence	192
Philosophical and Practical Issues	194
The Question of Free Will	195
Existentialism in Daily Life	196

Toward a Positive Psychology	199
Person-Centered Therapy	202
A Growth-Inducing Environment	203
Facilitating Self-Exploration	207
Commentary and Critique	209
<i>Summary</i>	213
<i>Critical Thinking</i>	215
<b>7. Cognitive Psychology</b>	<b>216</b>
Foundations of Cognitive Psychology	218
Efforts in Gestalt Psychology	219
Piaget's Cognitive Studies	220
The Cognitive Revolution	222
Current Models of the Mind	225
Sensation and Perception	228
Processes in Memory	232
Sensory and Short-Term Memory	232
Memories in Long-Term Storage	236
Thought and Language	241
Components in Thinking	242
Approaches to Problem Solving	243
Language: Symbols of Thought	246
The Cognitive Therapies	249
Rational-Emotive Therapy	250
Therapy for Depression	252
Commentary and Critique	254
<i>Summary</i>	258
<i>Critical Thinking</i>	260
<b>8. Evolutionary Psychology</b>	<b>261</b>
Roots of Evolutionary Psychology	263
The Darwinian Influence	263
Genetic Transmission	266
Mechanisms and Instincts	268
Specificity in Adaptation	271
Evolution of Sexual Behavior	274
Preferences in Mate Selection	274
Common Mating Patterns	276
Adaptations in Parenting	278
Pregnancy Sickness	278
Infant-Directed Speech	279
Dispositions in Group Living	281
Acquisition of Language	282

Shared Emotional Expressions	284
Making Social Contracts	285
Inclination Toward Aggression	288
Promoting Behavioral Change	290
Assessing Therapy Effectiveness	290
A Catalogue of Hypotheses	292
Commentary and Critique	294
<i>Summary</i>	299
<i>Critical Thinking</i>	301
<b>9. Sociocultural Foundations</b>	<b>302</b>
The Inevitable Human Influence	303
Interactions and Traditions	304
Studies of Obedience	305
Social Psychology	308
Forming Impressions of People	309
Modifying Others' Behavior	310
Prejudice and Stereotypes	314
Psychology and Culture	316
Goals in Cultural Studies	317
Individualism and Collectivism	319
Cross-Cultural Comparisons	324
<i>Summary</i>	330
<i>Critical Thinking</i>	331
<b>10. Psychology in Perspective</b>	<b>332</b>
Multiple Bases of Behavior	334
The Search for Causes	334
Convergent Evidence	338
The Perspectives Revisited	340
Orientations in Research	340
Eclecticism in Practice	344
Psychology in the Making	347
Unfinished Business	347
Pathways and Prospects	351
<i>Summary</i>	355
<i>Critical Thinking</i>	356
