

Contents

1	Introduction	1
1.1	Early Theory of Diffraction	1
1.2	Diffraction by Wedges	2
1.3	Method of Automorphic Functions on Complex Characteristics (MAF)	3
1.4	Applications of the MAF Method	4
1.5	General Scheme of the MAF Method	5
1.6	Development of the MAF Method	9
1.7	Comments	10
1.8	Plan of the Book	10
 Part I Survey of Diffraction Theory		
2	The Early Theory of Diffraction	15
2.1	The Grimaldi Observations	15
2.2	The Huygens Principle	16
2.3	The Young Theory of the Interference and Diffraction	16
3	Fresnel–Kirchhoff Diffraction Theory	19
3.1	Fresnel Theory of Diffraction	19
3.2	The Kirchhoff Theory of Diffraction	22
	3.2.1 The Kirchhoff Approximation	24
	3.2.2 The Fraunhofer Diffraction	25
3.3	Diffraction by a Half-Plane in the Fresnel–Kirchhoff Theory	25
3.4	The Fraunhofer/Fresnel Limit: Diffraction of Plane Waves	30
3.5	Geometrical Optics and Diffraction	33
4	Stationary and Time-Dependent Diffraction	37
4.1	Time-Dependent Diffraction and Limiting Amplitude Principle	37
4.2	Stationary Diffraction Theory	40
	4.2.1 The Limiting Absorption Principle	41
	4.2.2 The Sommerfeld Radiation Condition	41

5	The Sommerfeld Theory of Diffraction by Half-Plane	43
5.1	Stationary Diffraction by the Half-Plane	43
5.2	Reflections on the Riemann Surface.....	45
5.3	Integral Representation for Branching Solutions	45
5.3.1	The Maxwell Representation for Spherical Functions	46
5.3.2	The Sommerfeld Limit of Spherical Functions	47
5.3.3	The Sommerfeld Integral Representation	48
5.4	Instructive Examples	50
5.4.1	Rational Density	50
5.4.2	Branching Densities.....	52
5.5	Diffraction by the Half-Plane	52
5.6	The Diffracted Wave	54
5.7	Expression via Fresnel Integrals	57
5.8	Agreement with the Fresnel-Kirchhoff Approximation	58
5.9	Selection Rules for the Sommerfeld Solution.....	61
6	Diffraction by Wedge After Sommerfeld's Article	63
6.1	Stationary Problems in Angles	63
6.2	Time-Dependent Diffraction by Wedges	66
Part II Method of Automorphic Functions on Complex Characteristics		
7	Stationary Boundary Value Problems in Convex Angles	71
8	Extension to the Plane	77
8.1	Regular Solutions	77
8.2	Distributional Solutions	79
9	Boundary Conditions via the Cauchy Data	85
10	Connection Equation on the Riemann Surface	89
11	On Equivalence of the Reduction	93
11.1	Distributional Solutions	93
11.2	Regular Solutions	93
12	Undetermined Algebraic Equations on the Riemann Surface	97
13	Automorphic Functions on the Riemann Surface	99
14	Functional Equation with a Shift	101
15	Lifting to the Universal Covering	105
16	The Riemann-Hilbert Problem on the Riemann Surface	111
17	The Factorization	117
17.1	Ellipticity and Bound Below.....	117
17.2	The Edge-Point Values	118
17.3	Equating Edge-Point Values	119

17.4	Unwinding the Symbol	120
17.5	Asymptotics of the Factorization	122
18	The Saltus Problem and Final Formula	125
18.1	The Saltus Problem	125
18.2	The Final Formula	126
19	The Reconstruction of Solution and the Fredholmness	129
19.1	Reconstruction of Distributional Solutions	129
19.2	Reconstruction of Regular Solutions	131
20	Extension of the Method to Non-convex Angle	139
20.1	Connection Equation for Non-convex Angle	140
20.2	Integral Connection Equation on the Riemann Surface	141
20.3	Lifting onto the Universal Covering	144
20.4	The Cauchy Kernel on the Riemann Surface	146
20.5	Reduction to the Riemann–Hilbert Problem	148
21	Comments	149
A	Sobolev Spaces on the Half-Line	151
