Preface	xxxii
Abbreviations	xxxv

Part I The cognitive linguistics enterprise

1 What do cognitive linguists study?	5
1 What is language for?	6
1.1 The symbolic function of language	6
1.2 The interactive function of language	9
2 The systematic structure of language	11
2.1 Evidence for a system	11
2.2 The systematic structure of thought	14
3 What do cognitive linguists do?	15
3.1 What?	15
3.2 Why?	15
3.3 How?	16
3.4 Speaker intuitions	16
3.5 Converging evidence	17
4 What it means to know a language (from the perspective of cognitive linguistics)	18
Summary	20
Further reading	21
Discussion questions	24
2 Key commitments and research methods	25
1 Two key commitments	25
2 The Generalisation Commitment	26

2.1	Categorisation	26
2.2	Polysemy	33
2.3	Metaphor	35
3	The Cognitive Commitment	37
3.1	Attention: profiling in language	38
3.2	Categorisation: fuzzy categories	40
3.3	Metaphor	40
4	Research methods	41
4.1	Phenomena studied by cognitive linguistics	41
4.2	Research methods in cognitive linguistics	42
5	The field of cognitive linguistics	50
	Summary	53
	Further reading	54
	Discussion questions	55
3	Foundations of experience I: space	56
1	Spatial perception	56
1.1	Three stages of perception	57
1.2	Percepts versus concepts	57
1.3	Types of perceptual experience	58
1.4	How do percepts arise?	59
1.5	Bottom-up theories	59
1.6	Top-down theories: form perception	60
2	Linguistic reflexes of perceptual experience	64
2.1	'What' versus 'where' systems in perception and language	65
2.2	Figure-ground segregation in perception and language	67
3	Spatial representation in language	67
3.1	The nature of spatial schemas	67
3.2	The functional nature of spatial schemas	75
3.3	Spatial frames of reference	79
4	Cross-linguistic variation in the representation of space	86
4.1	Categorising spatial scenes in English and Korean	87
4.2	S-FoRs in Guugu Yimithirr	91
	Summary	92
	Further reading	93
	Discussion questions	95
4	Foundations of experience II: time	96
1	Temporal perception	96
1.1	The subjective reality of time	97
1.2	Facets of temporal experience	100
2	Linguistic representations for time	104
2.1	The spatialisation of time	104
2.2	Lexical concepts for time	111
2.3	Temporal frames of reference	115

3	Cross-linguistic patterns in the conceptualisation of time	119
3.1	The past and future in Aymara	119
3.2	Earlier and later in Mandarin	120
	Summary	122
	Further reading	123
	Discussion questions	125
5	Language in use I: knowledge of language	126
1	Language in use	127
1.1	A usage event	127
1.2	The relationship between usage and linguistic structure	129
1.3	Comprehension and production	130
1.4	Context	130
1.5	Frequency	131
2	Cognitive Grammar	132
2.1	Abstraction, schematisation and language use	132
2.2	Schemas and their instantiations	133
2.3	Partial sanction	134
2.4	The non-reductive nature of schemas	134
2.5	Frequency in schema formation	136
	Summary	138
	Further reading	138
	Discussion questions	140
6	Language in use II: language change, and acquisition	141
1	A usage-based approach to language change	141
1.1	Historical linguistics and language change	141
1.2	The utterance selection theory of language change	143
1.3	The generalised theory of selection and the theory of utterance selection	145
1.4	Causal mechanisms for language change	148
1.5	Causal mechanisms of language stability and change	152
2	The usage-based approach to language acquisition	153
2.1	Empirical findings in language acquisition	154
2.2	The cognitive view: sociocognitive mechanisms in language acquisition	156
	Summary	160
	Further reading	161
	Discussion questions	162
7	Key topics in language science: formal versus cognitive linguistics	163
1	Language origins and time depth	165
1.1	The received view of human evolution	165
1.2	How old is language?	166

1.3	What motivated the rise of language?	167
1.4	Stages in language evolution	168
2	Language universals	169
2.1	The Universal Grammar approach	170
2.2	The cognitive linguistics approach	174
3	Language acquisition	178
3.1	The rise of the nativist approach to L1 acquisition	179
3.2	The cognitive linguistics critique	179
4	Modularity of mind	182
4.1	Double dissociations	182
4.2	Localisation of language	184
4.3	The cognitive linguistics critique	184
5	Semantic universals	185
5.1	The semantic decomposition approach	186
5.2	The cognitive linguistics critique	187
6	Language and thought	188
6.1	Strong versus weak versions of linguistic relativity	188
6.2	The cognitive linguistics perspective	189
	Summary	193
	Further reading	194
	Discussion questions	196

Part II Conceptual Structure

8	What is a cognitive linguistics approach to conceptual structure?	201
1	Guiding principles	201
1.1	Conceptual structure is embodied	201
1.2	Semantic structure reflects conceptual structure	204
2	Comparing and contrasting approaches to conceptual structure	207
2.1	Two views of concepts and the mind	207
2.2	The symbol grounding problem	211
2.3	Evidence for the embodied cognition perspective	211
2.4	Experiential realism	213
3	Embodiment effects in semantic structure	214
3.1	Types of embodiment effects	214
	Summary	217
	Further reading	219
	Discussion questions	220
9	Image schemas and the origin of concepts	221
1	The origin of concepts	221
1.1	Perceptual meaning analysis	222
1.2	The nature of a child's first concepts	223
1.3	The embodied basis of conceptual structure	223

2	Image schema theory	224
2.1	What is an image schema?	225
2.2	An example	225
3	Properties of image schemas	226
3.1	Image schemas are pre-conceptual in origin	226
3.2	An image schema can give rise to more specific concepts	227
3.3	Image schemas derive from interaction with and observation of the world	229
3.4	Image schemas are inherently meaningful	229
3.5	Image schemas are analogue representations	229
3.6	Image schemas can be internally complex	230
3.7	Image schemas are not the same as mental images	231
3.8	Image schemas are multimodal	231
3.9	Image schemas are subject to transformations	231
3.10	Image schemas can occur in clusters	232
3.11	Image schemas underlie linguistic meaning	234
3.12	Image schemas give rise to abstract thought	235
3.13	A partial list of image schemas	235
4	Refining image schema theory	236
4.1	Spatial primitives	236
4.2	Image schemas	237
4.3	Schematic integrations	237
5	Mimetic schemas	238
	Summary	239
	Further reading	240
	Discussion questions	240
10	Cognitive Semantics	241
1	Semantic structure	242
2	The configuration of SPACE and TIME	244
2.1	TIME versus SPACE	244
2.2	Conceptual alternativity	246
3	Schematic systems	247
3.1	The Configurational Structure System	247
3.2	The Attentional System	255
3.3	The Perspectival System	258
3.4	The Force-Dynamics System	262
	Summary	265
	Further reading	266
	Discussion questions	266
11	Categorisation and idealised cognitive models	267
1	A new approach to categorisation and the development of cognitive linguistics	268
2	The classical theory	269
2.1	The definitional problem	270

2.2	The problem of conceptual fuzziness	272
2.3	The problem of prototypicality	272
2.4	Further problems	273
3	Prototype theory	273
3.1	Principles of categorisation	273
3.2	The categorisation system	274
3.3	The vertical dimension	275
3.4	The horizontal dimension	282
3.5	Problems with prototype theory	285
4	The theory of idealised cognitive models	287
4.1	Sources of typicality effects	288
4.2	How the theory of ICMs resolves problems with prototype theory	294
4.3	The structure of ICMs	296
	Summary	297
	Further reading	298
	Discussion questions	299
12	Conceptual metaphor theory	300
1	Literal versus figurative language	301
1.1	Literal and figurative language as complex concepts	301
1.2	Can the distinction be maintained?	302
2	What is metaphor?	306
2.1	The traditional view	306
2.2	Conceptual metaphor	307
3	Conceptual metaphor theory	309
3.1	The unidirectionality of metaphor	310
3.2	Motivation for target and source	310
3.3	Metaphorical entailments	311
3.4	Metaphor systems	312
3.5	Metaphors and image schemas	313
3.6	Invariance	314
3.7	The conceptual nature of metaphor	315
3.8	Hiding and highlighting	316
	Summary	316
	Further reading	317
	Discussion questions	319
13	Primary metaphors and conceptual metonymy	320
1	A primary metaphor account of conceptual metaphors	321
1.1	Three problems for conceptual metaphor theory	322
1.2	Towards a decompositional account of conceptual metaphors	323
1.3	Properties of primary conceptual metaphors	326
1.4	Consequences of primary metaphor theory	333

2	Conceptual metonymy	334
2.1	What is metonymy?	334
2.2	The conceptual basis of metonymy	335
2.3	Conceptual metonymy as a domain highlighting operation	337
2.4	Different metonymic phenomena	338
2.5	Metonymy–metaphor interaction	339
2.6	A typology of conceptual metonymy	342
	Summary	346
	Further reading	346
	Discussion questions	348
Part III Semantic Structure		
14	What is a cognitive linguistics approach to semantic structure?	351
1	Guiding principles	351
1.1	Semantic structure is encyclopaedic	351
1.2	Meaning construction entails simulations	354
2	Formal Semantics	362
2.1	Meaning, truth and reality	362
2.2	Truth–conditional semantics and formal linguistics	365
3	Comparison with the cognitive linguistics approach to semantic structure	370
	Summary	373
	Further reading	374
	Discussion questions	375
15	The encyclopaedic approach to semantic structure I: overview	376
1	The dictionary view of linguistic meaning	376
1.1	The characteristics of the dictionary view	377
1.2	A case study in pragmatics: relevance theory	380
1.3	Problems with the dictionary view	383
2	The encyclopaedic view of linguistic meaning	386
2.1	No principled distinction between semantics and pragmatics	386
2.2	Encyclopaedic knowledge is structured	387
2.3	There is a distinction between encyclopaedic knowledge and contextual information	391
2.4	Lexical expressions facilitate access to encyclopaedic knowledge	392
2.5	Encyclopaedic knowledge is dynamic	392
	Summary	392
	Further reading	393
	Discussion questions	393

16	The encyclopaedic approach to semantic structure II: two theories	394
1	Frame Semantics	394
1.1	What is a semantic frame?	395
1.2	Frames in cognitive psychology	395
1.3	The COMMERCIAL EVENT frame	397
1.4	Speech event frames	400
1.5	Consequences of adopting a frame-based model	401
2	Cognitive Grammar and the theory of domains	402
2.1	What is a domain?	402
2.2	Basic versus abstract domains	403
2.3	Other characteristics of domains	406
2.4	Deploying domains in the service of linguistically mediated meaning	407
2.5	Construal	410
	Summary	417
	Further reading	419
	Discussion questions	419
17	Network approaches to semantic structure	420
1	Lexical versus compositional semantics: a false dichotomy	421
1.1	Word meaning is protean in nature	421
1.2	The conceptual nature of meaning construction	422
1.3	Grammatical constructions are independently meaningful	423
2	Words as radial categories	423
2.1	The nature of polysemy	423
2.2	The polysemy approach to <i>over</i>	425
2.3	Lakoff's full-specification approach	427
2.4	Problems with the full-specification approach	433
2.5	The Principled Polysemy approach	435
2.6	Criticisms of principled polysemy	445
3	Langacker's network conception	447
3.1	Schemas versus instances	447
3.2	The network model	449
3.3	Polysemy in the network model	449
4	The importance of context for polysemy	451
4.1	Usage context: subsenses	452
4.2	Sentential context: facets	453
4.3	Knowledge context: ways of seeing	453
	Summary	454
	Further reading	455
	Discussion questions	457
18	Access Semantics and meaning construction	458
1	Design features for meaning construction	459
1.1	Language employs two qualitatively distinct types of reference	460

1.2	Semantic structure, encoded by linguistic referential vehicles, relates to knowledge of two qualitatively distinct types	469
2	The linguistic focus hypothesis	469
3	The architecture of Access Semantics	471
3.1	Semantic representation in Access Semantics	472
3.2	The cognitive model profile	476
3.3	Semantic composition	484
3.4	Interpretation	486
	Summary	490
	Further reading	491
	Discussion questions	492
19	Mental spaces and discourse meaning	493
1	Key assumptions of mental spaces theory	494
1.1	Formal Semantics revisited	494
1.2	The nature of meaning in mental spaces theory	495
1.3	An overview of mental spaces theory	498
2	The architecture of mental space construction	500
2.1	Space builders	500
2.2	Elements	500
2.3	Properties and relations	501
2.4	Mental space lattices	503
2.5	Counterparts and connectors	504
2.6	The Access Principle	505
2.7	Roles and values	509
3	An illustration of mental space construction	511
4	The dynamic nature of meaning construction	514
4.1	Tense and aspect in English	515
4.2	The tense–aspect system in mental spaces theory	517
4.3	Epistemic distance	521
	Summary	523
	Further reading	524
	Discussion questions	524
20	Conceptual blending and semantic creativity	525
1	The origins of blending theory	526
1.1	Problem 1: metaphor	526
1.2	Problem 2: counterfactual disanalogies	528
2	Towards a theory of conceptual integration	528
2.1	The nature of integration networks	529
2.2	That surgeon is a butcher: the blending theory account	530
2.3	Bill Clinton as French President: the blending theory account	532
3	The nature of blending	534
3.1	The elements of conceptual blending	534

3.2	Further linguistic examples	535
4	Vital relations and compressions	543
4.1	Vital relations	544
4.2	A taxonomy of vital relations and their compressions	545
4.3	Disintegration and decompression	549
5	A taxonomy of integration networks	550
5.1	Simplex networks	550
5.2	Mirror networks	551
5.3	Single-scope networks	551
5.4	Double-scope networks	553
6	Multiple blending	555
7	Constraining blending theory	556
	Summary	558
	Further reading	558
	Discussion questions	560

Part IV Grammar

21	What is a cognitive linguistics approach to grammar?	565
1	Guiding principles	565
1.1	The symbolic thesis	566
1.2	The usage-based thesis	568
2	Formal approaches to grammar	570
2.1	Background: the rise of Transformational Grammar	570
2.2	Assumptions of Transformational Grammar	572
2.3	The nature of Transformational Grammar	574
3	Comparison with cognitive linguistics approaches to grammar	577
3.1	Lexicon–grammar continuum versus autonomous syntax	578
3.2	Inventory versus derivational system	579
3.3	The status of constructions	579
3.4	Schemas versus rules	580
3.5	Redundancy versus economy	580
3.6	Conventionality versus regularity	581
3.7	‘Scaffolding’ versus ‘building blocks’	581
3.8	Constraints on models of grammar	582
3.9	Sanctioning and grammaticality	583
3.10	Emphasis on formalism	584
4	Three cognitive linguistics approaches to grammar	585
4.1	Cognitive Grammar	585
4.2	Construction Grammars	585
4.3	Cognitive linguistics theories of grammaticalisation	586
	Summary	586
	Further reading	587
	Discussion questions	588

22 Cognitive Grammar I: lexical classes	589
1 The semantic basis of word classes	590
2 Nominal predications: nouns	591
2.1 Bounding	593
2.2 Homogeneity versus heterogeneity	594
2.3 Expansibility and contractibility versus replicability	595
2.4 Abstract nouns	595
3 Nominal versus relational predications	596
4 Relational predications: temporal versus atemporal relations	598
4.1 Temporal relations: verbs	599
4.2 Atemporal relations	600
5 Lexical classes: an overview	604
6 Nominal grounding predications	605
Summary	607
Further reading	608
Discussion questions	610
23 Cognitive Grammar II: constructions	611
1 Constituency in symbolic units	611
2 Phrases as constructions	613
2.1 Heads and dependents	613
2.2 Correspondence	614
2.3 Profile determinacy	614
2.4 Conceptual autonomy versus conceptual dependence	615
2.5 Constituency	617
2.6 The prototypical grammatical construction	617
3 Words as constructions	618
3.1 Phonological autonomy and dependence	618
3.2 Semantic autonomy and dependence	619
3.3 Prototypical stems and affixes	619
3.4 Composite structure	620
3.5 Constructional schemas	620
3.6 An example: agreement	621
4 Clauses as constructions	622
4.1 Valence at the clause level	623
4.2 Grammatical functions and transitivity	628
4.3 Case	633
4.4 Marked coding: the passive construction	636
Summary	637
Further reading	637
Discussion questions	638
24 Cognitive Grammar III: the verb string	639
1 English verbs: a brief overview	639
2 The clausal head and the grounding predication	640
3 The clausal head	641

3.1	The clausal head complex	641
3.2	The passive construction: [be_2 [PERF ₃ [V]]]	643
3.3	The progressive construction: [be_1 [-ing [V]]]	644
3.4	The perfect construction: [<i>have</i> [PERF ₄ [V]]]	645
4	The clausal grounding predication	647
4.1	Grounding: a recap	647
4.2	The epistemic model	650
4.3	Modality revisited	652
4.4	Potential and projected reality	652
5	Lexical aspect	653
5.1	Situation types: an overview	653
5.2	Perfective and imperfective PROCESSES	655
5.3	Aspect and the count/mass distinction	656
5.4	Situation types: Cognitive Grammar compared to Vendler (1967)	658
	Summary	659
	Further reading	660
	Discussion questions	660
25	Construction Grammar I: accounting for irregularity in grammar	661
1	Towards a typology of idiomatic expressions	662
1.1	Decoding and encoding idioms	663
1.2	Grammatical versus extragrammatical idioms	663
1.3	Substantive versus formal idioms	663
1.4	Idioms with and without pragmatic point	664
1.5	Familiar pieces familiarly arranged	665
1.6	Familiar pieces unfamiliarly arranged	666
1.7	Unfamiliar pieces familiarly arranged	666
1.8	Unfamiliar pieces unfamiliarly arranged	666
1.9	Overall evaluation	667
2	Two case studies	667
2.1	'The <i>let alone</i> construction	667
2.2	The <i>what's X doing Y</i> construction	669
3	The architecture of Construction Grammar	671
3.1	Construction Grammar: an overview	671
3.2	The status of the 'construction' in Construction Grammar	676
3.3	Compositionality in Construction Grammar	677
3.4	Construction Grammar as usage-based theory	678
4	Comparing Construction Grammar with Cognitive Grammar	679
	Summary	680
	Further reading	680
	Discussion questions	681

26 Construction Grammar II: accounting for generalisations in grammar	682
1 Towards a constructional account of argument structure constructions	683
1.1 Assumptions	683
1.2 Defining a construction	684
1.3 Advantages of a constructional approach to verb–argument structure	685
2 The relationship between verbs and constructions	687
2.1 What is the nature of verb meaning?	687
2.2 What is the nature of constructional meaning?	687
2.3 When can a given verb occur in a given construction?	688
2.4 Argument roles	689
2.5 Constructional profiling	691
2.6 Fusion	691
3 Relationships between constructions	695
3.1 Polysemy links	695
3.2 Subpart links	696
3.3 Instance links	696
3.4 Metaphorical extension links	697
4 Three constructions	698
4.1 The English ditransitive construction (X CAUSES Y TO RECEIVE Z)	698
4.2 The English caused motion construction (X CAUSES Y TO MOVE Z)	700
4.3 The English resultative construction	702
5 Other Construction Grammar approaches	705
5.1 Radical Construction Grammar	706
5.2 Embodied Construction Grammar	709
6 Comparing constructional approaches to grammar	712
Summary	713
Further reading	714
Discussion questions	716
27 The evolution of grammar	717
1 The nature of grammaticalisation	718
1.1 Form change	720
1.2 Meaning change	722
2 Metaphorical extension approaches	723
2.1 The evolution of grammatical concepts	723
2.2 Metaphorical extension	724
2.3 The grammaticalisation continuum	725
2.4 The role of discourse context	725
2.5 The microstructure and macrostructure of grammaticalisation	726
2.6 Case study I: OBJECT-TO-SPACE	727

2.7	Case study II: SPACE-TO-POSSESSION	728
3	Invited inferencing theory	729
3.1	From invited inference to coded meaning	729
3.2	Subjectification	730
3.3	Intersubjectification	731
3.4	The status of metaphor in invited inferencing theory	732
3.5	Case study: the evolution of <i>must</i>	733
4	The subjectification approach	735
4.1	The nature of subjectification	735
4.2	Case study I: <i>be going to</i>	737
4.3	Case study II: the evolution of auxiliaries from verbs of motion or posture	738
5	Comparison of the three approaches: <i>be going to</i>	739
	Summary	740
	Further reading	741
	Discussion questions	743

Part V Applications and Extensions of Cognitive Linguistics

28	Language, society and discourse	747
1	Rethinking cognitive linguistics socially	748
1.1	Joint action, coordination and convention	749
1.2	Linguistic symbols and common ground	751
1.3	Encyclopaedic meaning and shared meaning	751
1.4	Meaning as construal and construal for communication	752
2	Meaning and social reality	753
2.1	Levels of meaning: competency versus affordances	754
2.2	Types of meaning construction	755
2.3	Properties of social constructions	756
3	Cognitive sociolinguistics	758
3.1	What is the nature of cognitive sociolinguistics?	760
3.2	A case study: cognitive dialectology	762
4	Cognitive critical discourse analysis	765
4.1	From CDA to cognitive CDA	765
4.2	A case study: critical metaphor analysis	766
	Summary	768
	Further reading	769
	Discussion questions	770
29	Text, narrative and literature	771
1	Narrative	773
1.1	Towards a theory of narrative in human cognition	773
1.2	The literary mind	781
2	Cognitive poetics	786
2.1	The foci of cognitive poetics	787
2.2	The nature of literariness	788

2.3	Prototypicality in literature	789
2.4	Cognitive poetic applications	790
	Summary	795
	Further reading	796
	Discussion questions	797
30	Gesture and sign language	798
1	The nature of gesture	800
1.1	Classifying gestures	800
