

# Contents

Preface	vii
I. Introduction	
1. Decentralization and Incentives <i>Roy Radner</i>	3
2. Incentive Compatibility since 1972 <i>Theodore Groves and John O. Ledyard</i>	48
II. Informational Comparisons	
3. Informational Requirements of Parametric Resource Allocation Processes <i>Xavier Calsamiglia</i>	115
4. Price versus Direct Revelation: Informational Judgments for Finite Mechanisms <i>Thomas Marschak</i>	132
III. Information and Stability	
5. The Informational Requirements of Local Stability in Decentralized Allocation Mechanisms <i>James S. Jordan</i>	183
6. On the Existence of a Locally Stable Dynamic Process with a Statically Minimal Message Space <i>Kenneth R. Mount and Stanley Reiter</i>	213
IV. Market Mechanisms	
7. Technical Information, Returns to Scale, and the Existence of Competitive Equilibrium <i>Kenneth J. Arrow</i>	243
8. Optimal Nonlinear Pricing with Two-Dimensional Characteristics <i>Jean-Jacques Laffont, Eric Maskin, and Jean-Charles Rochet</i>	256
9. On the Second Welfare Theorem for Anonymous Net Trades in Exchange Economies with Many Agents <i>Andreu Mas-Colell</i>	267

V. Nonmarket and General Mechanisms

10. Incentive Compatible Approximation of a Nashlike Solution under Nonconvex Technology	<i>Masahiko Aoki</i>	295
11. Limited Communication and Incentive-Compatibility	<i>Jerry R. Green and Jean-Jacques Laffont</i>	308
12. Differential Information and Strategic Behavior in Economic Environments: A General Equilibrium Approach	<i>Andrew Postlewaite and David Schmeidler</i>	330
13. Incentives, Information, and Iterative Planning	<i>John Roberts</i>	349
14. The Vulnerability to Manipulative Behavior of Resource Allocation Mechanisms Designed to Select Equitable and Efficient Outcomes	<i>William Thomson</i>	375
