Preface xiii

Chapter 1 Why Are We Forced to Deal with Heterogeneous Computing? 1

- 1.1 The Power Issue 2
- 1.2 Heterogeneity beyond Our Control 5
- 1.3 Heterogeneity within Our Control 9
- 1.4 Seems Like Part of a Solution to Exascale Computing 11

Chapter 2 Different Players: Heterogeneity in Computing 13

- 2.1 Multicore 14
- 2.2 GPUs 17
- 2.3 FPGA 23
- 2.4 Automata Processors 24
- 2.5 Neuromorphic Chips 25
- 2.6 Other Accelerators 26
- 2.7 Mix-and-Match 28
- 2.8 In Conclusion 32

Chapter 3 Architecture: Heterogeneity in Design 33

- 3.1 Memory System 33
- 3.2 Interconnect 35
- 3.3 Examples of Supercomputers 43
- 3.4 Security Challenges Facing Heterogeneous Computing 46
- 3.5 Bandwidth 50
- 3.6 In Conclusion 65

Chapter 4 Programmability 67

- 4.1 Wish List of a Programmer 67
- 4.2 Psychology of Programming 69
- 4.3 What Do We Have? The Current Status Quo 71
- 4.4 In Conclusion 88

Chapter 5 Research Directions 91

- 5.1 Processing-in-Memory (PIM) / Near-Data Processing (NDP) 91
- 5.2 Exascale Computing 92
- 5.3 Neuromorphic Chips 92
- 5.4 Quantum Computing 95
