<i>Introduction (Otto Kinne, Matthias Seaman)</i>	VII
<i>Jonathan J. Cole: A Laudatio (Colin S. Reynolds)</i>	XV
Dedication	XVII
1 PREFACE	1
The carbon song of a buried Bog Man	1
The overly oceanographic view of lake ecosystems	2
Net heterotrophy and terrestrial carbon inputs	4
What about streams?	5
2 THE ROLE OF INLAND WATERS IN THE GLOBAL AND REGIONAL CARBON BALANCE	7
The algebra of ecosystem carbon budgets	7
Inorganic carbon balance and other complications	12
Displaced terrestrial metabolism	13
Fates of terrestrial net ecosystem production in aquatic-system global magnitudes	14
Organic carbon burial	14
Reservoirs	16
Rivers	18
Export to the ocean	18
Gas exchange	19
Putting the pieces together	22
Uses and misconceptions of the global aquatic carbon balance	23
The 'missing terrestrial carbon sink' is underwater	24
Lakes are almost as important to the global carbon balance as the ocean	25
Summary of the role of inland waters in the global carbon balance	25
3 PATTERNS AND MAGNITUDES OF TERRESTRIAL SUBSIDIES: ARE FISH MADE OF TREES?	27
An introduction to allochthony	27
Allochthony in lakes	29
How allochthony is studied	29
Fishes	30
Benthic invertebrates	38
Zooplankton	45
Allochthony of bacteria and sources of carbon for respiration	53

Particulate and dissolved organic matter (POM and DOM)	56
What is in the seston?	56
POM of the whole-lake ¹³ C experiments	61
What is in the DOM?	63
Summaries	65
Conclusions, considerations, and looking forward	67
Some things are better known than others	67
Uncertainty in food sources is a big problem	68
Are terrestrial inputs true subsidies to the aquatic food web?	69
4 THE ALLOCHTHONY CONTROVERSY	71
Why is there a controversy?	71
Whole-lake ¹³ C additions: pros, cons, and resolutions	73
Old autochthony	75
Deep feeding	76
Some strong evidence for a terrestrial subsidy to zooplankton	82
Laboratory evidence that zooplankton can consume terrestrial particles ..	89
Is terrestrial support of lake food webs only in the eye of the beholder?	91
5 WHY IS THERE SO MUCH ORGANIC CARBON IN THE SEDIMENTS OF LAKES?	95
Of Deans and Danes	95
The marine hypotheses for carbon burial	96
What controls carbon burial in lakes?	97
Lake size	97
Burial efficiency and its possible controls	98
A simple predictive model of sediment organic content	100
Experimental approaches	101
Other factors	103
Why are lakes hot spots for organic carbon burial?	104
Conclusions	107
Acknowledgements	109
References	111
