INTRODUCTION	xiii

BOOK I

OF THE PARTS OF PLANTS AND THEIR COMPOSITION. OF CLASSIFICATION

Introductory: How plants are to be classified; difficulty of defining what are the essential 'parts' of a plant, especially if plants are assumed to correspond to animals	3
The essential parts of plants, and the materials of which they are made	9
Definitions of the various classes into which plants may be divided	23
Exact classification impracticable: other possible bases of classification	27
Differences as to appearance and habitat	29
Characteristic differences in the parts of plants, whether general, special, or seen in qualities and properties	33
Differences as to qualities and properties	37
Further 'special' differences	39
Differences in root	41
Of trees (principally) and their characteristic special differences: as to knots	55
As to habit	61
As to shedding of leaves	63
Differences in leaves	69
Composition of the various parts of a plant	77
Differences in seeds	79

CONTENTS

	PAGE
Differences in taste	85
Differences in flowers	89
Differences in fruits	97
General differences (affecting the whole plant)	99

BOOK II

OF PROPAGATION, ESPECIALLY OF TREES

Of the ways in which trees and plants originate. Instances of degeneration from seed	105
Effects of situation, climate, tendance	115
Of spontaneous changes in the character of trees, and of certain marvels	119
Of spontaneous and other changes in other plants	123
Of methods of propagation, with notes on cultivation	127
Of the propagation of the date-palm; of palms in general	133
Further notes on the propagation of trees	145
Of the cultivation of trees	145
Of remedies for the shedding of the fruit : caprification	151

BOOK III

OF WILD TREES

Of the ways in which wild trees originate	159
Of the differences between wild and cultivated trees	165
Of mountain trees : of the differences found in wild trees	171
Of the times of budding and fruiting of wild, as compared with cultivated, trees	179
Of the seasons of budding	185
Of the comparative rate of growth in trees, and of the length of their roots	191
Of the effects of cutting down the whole or part of a tree	197
Of other things borne by trees besides their leaves, flowers and fruit	199
Of 'male' and 'female' in trees : the oak as an example of this and other differences	203

CONTENTS

	PAGE
Of the differences in firs	211
Of beech, yew, hop-hornbeam, lime	221
Of maple and ash	227
Of cornelian cherry, cornel, 'cedars,' medlar, thorns, sorb	233
Of bird-cherry, elder, willow	243
Of elm, poplars, alder, [<i>semyda</i> , bladder-senna]	249
Of filbert, terebinth, box, <i>krataigos</i>	253
Of certain other oaks, arbutus, andrachne, wig-tree	259
Of cork-oak, <i>kolutea</i> , <i>koloitia</i> , and of certain other trees peculiar to particular localities	265
Of the differences in various shrubs—buckthorn, withy, Christ's thorn, bramble, sumach, ivy, smilax, [spindle-tree]	269

BOOK IV

OF THE TREES AND PLANTS SPECIAL TO PARTICULAR DISTRICTS AND POSITIONS

Of the importance of position and climate	287
Of the trees special to Egypt, and of the carob	291
Of the trees and shrubs special to Libya	303
Of the trees and herbs special to Asia	309
Of the plants special to northern regions	323
Of the aquatic plants of the Mediterranean	329
Of the aquatic plants of the 'outer sea' (<i>i.e.</i> Atlantic, Persian Gulf, etc.)	337
Of the plants of rivers, marshes, and lakes, especially in Egypt	345
Of the plants peculiar to the lake of Orchomenos (Lake Copaïs), especially its reeds, and of reeds in general	361
Of rushes	379
Of the length or shortness of the life of plants, and the causes	383
Of diseases and injuries done by weather conditions	391
Of the effects on trees of removing bark, head, heart- wood, roots, etc. ; of various causes of death	405
	vii

CONTENTS

BOOK V

OF THE TIMBER OF VARIOUS TREES AND ITS USES

	PAGE
Of the seasons of cutting	417
Of the wood of silver-fir and fir	421
Of the effects on timber of climate	427
Of knots and 'coiling' in timber	429
Of differences in the texture of different woods	431
Of differences in timber as to hardness and heaviness	439
Of differences in the keeping quality of timber	441
Which kinds of wood are easy and which hard to work. Of the core and its effects	445
Which woods can best support weight	451
Of the woods best suited for the carpenter's various purposes	453
Of the woods used in ship-building	455
Of the woods used in house-building	459
Of the uses of the wood of particular trees	459
Of the localities in which the best timber grows	463
Of the uses of various woods in making fire: charcoal, fuel, fire-sticks	467
