

CONTENTS

<i>Preface</i>	v
Chapter 1. Introduction	1
1.1. Brief historical sketch	1
1.2. The background for the development of macroeconomic planning	11
1.3. Highlights of theoretical developments	21
1.4. A sample of definitions of the concept of planning	38
1.5. Some remarks on the scope of the lectures	50
Chapter 2. A Decision-theoretic Scheme of Planning and Related Concepts	53
2.1. The basic scheme	55
2.2. Team theory and game theory approaches	65
2.3. Non-cooperative and cooperative games – The coordination aspect of economic planning	75
2.4. The relevance of a decision-theoretic scheme in a game situation	99
2.5. Some remarks on the roles of planning experts and political	
2.6. Dynamic interpretation of the planning scheme – The concept of strategy	105
2.7. Some further notes on concepts and terminology related to the planning scheme	111
	125
Chapter 3. Various Ways of Simplifying the Planning Problem and the Planning Scheme in Practice	141
3.1. Introduction	143
3.2. Qualitative and quantitative aspects of planning – Economic systems	146

3.3. Aggregation	160
3.4. Planning in stages	175
3.5. Splitting the problem in separate parts (partitioning)	188
3.6. Short-term, medium-term and long-term plans	203
3.7. Systems of plans and planning models	211
3.8. Some remarks on international coordination of plans and planning models	217
3.9. Separation of selection analysis and implementation	227
3.10. The approach of fixed targets	234
3.11. Some further observations on selection analysis versus the target-instrument approach – Preference constraints	243
3.12. Some remarks on consistency of plans	256
Chapter 4. General Observations on the Use of Mathematically Formulated Models in Economic Planning	263
4.1. Brief remarks on the history and present state	265
4.2. Planning with or without models? – Contacts with traditional methods	272
4.3. Types of relationships and constraints in planning models	286
4.4. The nature of economic systems and the forms of planning models and their relationships	299
4.5. Other considerations which influence the profiles of planning models	310
4.6. The importance of having autonomous relationships	315
4.7. Econometric methodology and planning models	327
4.8. The model in confrontation with realities	332
