<b>Preface</b> . . . . .	xi
<b>List of Symbols</b> . . . . .	xv
<b>1 Monoids, Krull Monoids, Large Monoids</b>	
1.1 Commutative Monoids . . . . .	1
1.2 Preordered Groups, Positive Cones . . . . .	16
1.3 The Monoid $V(\mathcal{C})$ , Discrete Valuations, Krull Monoids . . . . .	18
1.4 Essential Morphisms . . . . .	27
1.5 Further Results on Krull Monoids* . . . . .	28
1.6 Some Further Notions About Commutative Monoids* . . . . .	31
1.7 Appendix to Chapter 1: Sets and Classes* . . . . .	39
1.8 Notes on Chapter 1 . . . . .	46
<b>2 Basic Concepts on Rings and Modules</b>	
2.1 Semisimple Rings and Modules . . . . .	49
2.2 Free Rings and Free Algebras . . . . .	50
2.3 Ranks of Free Modules . . . . .	52
2.4 Projective Modules and Radicals . . . . .	55
2.5 Projective Covers, Injective Envelopes . . . . .	63
2.6 The Monoid $V(R)$ . . . . .	65
2.7 Some Universal Constructions in Ring Theory* . . . . .	69
2.8 The Grothendieck Group $K_0(R)$ . . . . .	79
2.9 Direct Limits of Projectives, Inverse Limits of Injectives* . . . . .	83
2.10 Notes on Chapter 2 . . . . .	88
<b>3 Semilocal Rings</b>	
3.1 Goldie Dimension of Lattices and Modules . . . . .	91
3.2 Dual Goldie Dimension of a Module . . . . .	93
3.3 Semilocal Rings . . . . .	98
3.4 Local Morphisms . . . . .	102
3.5 Modules with Semilocal Endomorphism Rings . . . . .	107
3.6 Notes on Chapter 3 . . . . .	109

<b>4</b>	<b>Additive Categories</b>	
4.1	Preadditive Categories . . . . .	111
4.2	Products, Coproducts, Biproducts of Objects . . . . .	114
4.3	Additive Categories . . . . .	118
4.4	Splitting Idempotents . . . . .	119
4.5	Product and Coproduct of Categories . . . . .	124
4.6	Embedding into an Additive Category . . . . .	126
4.7	Weak Coproduct of Additive Categories . . . . .	129
4.8	Constructions Equivalent to the Construction of Weak Coproduct . . . . .	133
4.9	Ideals in a Preadditive Category . . . . .	134
4.10	The Krull–Schmidt Property . . . . .	136
4.11	Annihilating a Class of Objects . . . . .	141
4.12	Local Functors, Almost Local Functors and Amenable Semisimple Categories . . . . .	144
4.13	An Application: Endomorphism Rings of Finitely Generated Modules over Commutative Semilocal Rings . . . . .	149
4.14	Semilocal Categories . . . . .	151
4.15	Some Realization Theorems . . . . .	153
4.16	Notes on Chapter 4 . . . . .	160
<b>5</b>	<b>Spectral Category and Dual Construction</b>	
5.1	The Spectral Category of a Grothendieck Category . . . . .	165
5.2	Nonsingular Modules . . . . .	167
5.3	The Functor $P$ and Its Right Derived Functors . . . . .	170
5.4	First Applications of Spectral Categories . . . . .	173
5.5	Finitely Copresented Objects . . . . .	177
5.6	The Dual Construction to the Construction of the Spectral Category . . . . .	182
5.7	Applications of the Category $(\mathbf{Mod}\text{-}R)'$ . . . . .	187
5.8	Finitely Presented Modules over a Semilocal Ring . . . . .	190
5.9	Notes on Chapter 5 . . . . .	193
<b>6</b>	<b>Auslander–Bridger Transpose, Auslander–Bridger Modules</b>	
6.1	The Functor Auslander–Bridger Transpose . . . . .	195
6.2	Projective Modules with a Semiperfect Endomorphism Ring . . . . .	200
6.3	Auslander–Bridger Modules . . . . .	203
6.4	The Auslander–Bridger Transpose . . . . .	207
6.5	The Functors $-\otimes_R R/J(R)$ and $\mathrm{Tor}_1^R(-, R/J(R))$ . . . . .	209
6.6	Notes on Chapter 6 . . . . .	213

<b>7 Semilocal Categories and Their Maximal Ideals</b>	
7.1 Maximal Ideals . . . . .	215
7.2 Simple Additive Categories . . . . .	219
7.3 Maximal Ideals Exist in Semilocal Categories . . . . .	221
7.4 The Monoid $V(\mathcal{C})$ for a Semilocal Category $\mathcal{C}$ . . . . .	228
7.5 Comparing Ideals of Endomorphism Rings of Distinct Objects . .	231
7.6 Notes on Chapter 7 . . . . .	233
<b>8 Modules of Type <math>\leq 2</math>. Uniserial Modules</b>	
8.1 Rings and Modules of Type $n$ . . . . .	235
8.2 The Canonical Functor $\mathcal{A} \rightarrow \mathcal{A}/\mathcal{I}_1 \times \cdots \times \mathcal{A}/\mathcal{I}_n$ . . . . .	239
8.3 Semilocal Categories and Local Functors . . . . .	242
8.4 Weak Krull–Schmidt Theorem for Additive Categories . . . . .	245
8.5 Bipartite Digraphs and Hall’s Theorem . . . . .	248
8.6 Functors into Amenable Semisimple Categories . . . . .	250
8.7 Biuniform Modules . . . . .	251
8.8 Further Results on Uniform, Couniform, and Biuniform Modules . . . . .	257
8.9 Infinite Direct Sums of Biuniform Modules . . . . .	261
8.10 Uniqueness of the Monogeny Classes . . . . .	263
8.11 Completely Prime Ideals in a Category . . . . .	264
8.12 Failure of the Krull–Schmidt Uniqueness for Finitely Presented Modules over Serial Rings . . . . .	269
8.13 Cyclically Presented Modules over Local Rings . . . . .	272
8.14 Kernels of Morphisms Between Indecomposable Injective Modules . . . . .	275
8.15 Couniformly Presented Modules . . . . .	278
8.16 Epi-isomorphism and Lower Isomorphism of Auslander–Bridger Modules . . . . .	280
8.17 Dual Auslander–Bridger Modules . . . . .	282
8.18 Notes on Chapter 8 . . . . .	286
<b>9 Modules of Finite Type</b>	
9.1 Associated Ideals and Finite Type . . . . .	291
9.2 A Family of Dimensions . . . . .	295
9.3 Examples of Modules of Finite Type . . . . .	302
9.4 Direct Summands of Cyclically Presented Modules over Rings of Finite Type . . . . .	306
9.5 Maximal Ideals in the Endomorphism Ring . . . . .	310
9.6 Weak Krull–Schmidt Theorem for DCP Modules . . . . .	313
9.7 Kernels of Morphisms Between Injective Modules of Finite Type .	320
9.8 Notes on Chapter 9 . . . . .	325

<b>10 The Krull–Schmidt Theorem in the Case Two</b>	
10.1 The Weak Krull–Schmidt Theorem and the Decomposition $V(\mathcal{C}) \cong V(\mathcal{C}_1) \oplus V(\mathcal{C}_2)$ . . . . .	328
10.2 The Graph $G(\mathcal{C})$ . . . . .	330
10.3 Relations Between the Generators of the Monoid $V(G)$ . . . . .	332
10.4 Two Examples . . . . .	337
10.5 Another Realization Theorem . . . . .	341
10.6 Complete Graphs . . . . .	343
10.7 Condition ( <i>DSP</i> ) . . . . .	344
10.8 Completely Prime Ideals: The Functorial Point of View . . . . .	354
10.9 Direct Summands of Serial Modules of Finite Goldie Dimension . . . . .	358
10.10 Direct Summands of Direct Sums of Modules Whose Endomorphism Rings Have at Most Two Maximal Right Ideals . . . . .	363
10.11 Under Further Hypotheses, All Direct Summands of a Finite Direct Sum of Modules of Type $\leq 2$ Are Direct Sums of Modules of Type $\leq 2$ . . . . .	367
10.12 Examples . . . . .	374
10.13 Notes on Chapter 10 . . . . .	378
<b>11 Serial Modules of Infinite Goldie Dimension</b>	
11.1 Small, $\aleph_0$ -Small, Quasismall Modules . . . . .	379
11.2 A Necessary Condition for Families of Uniserial Modules . . . . .	384
11.3 The Submodules $U_m$ and $U_e$ . . . . .	387
11.4 Existence of Non-quasismall Uniserial Modules . . . . .	390
11.5 Ordered Groups . . . . .	394
11.6 Skew Polynomials and the Ore Condition . . . . .	395
11.7 A Nearly Simple Chain Domain . . . . .	397
11.8 The Weak Krull–Schmidt Theorem for Serial Modules (the Infinite Case) . . . . .	403
11.9 A Graphic Visualization . . . . .	412
11.10 Quasismall Modules and Pure-Projective Modules . . . . .	415
11.11 Nearly Simple Chain Domains and Their Modules . . . . .	419
11.12 Exceptional Chain Rings and Their Modules . . . . .	426
11.13 Dubrovin’s Example . . . . .	428
11.14 Notes on Chapter 11 . . . . .	431
<b>12 Some Open Problems.</b> . . . . .	435
<b>Bibliography</b> . . . . .	443
<b>Index</b> . . . . .	457
