

Contents

Preface xvii

PART I INTRODUCTION

Chapter 1 Introduction 1

- 1-1 What is Macroeconomics? 1
- 1-2 Some of the Key Questions Addressed by Macroeconomics 3
- 1-3 Macroeconomics in Historical Perspective 9
 - BOX 1-1: THE GREAT DEPRESSION 11
- 1-4 Providing a Broader Framework for Macroeconomic Analysis 16
- 1-5 An Outline of the Book 17

Chapter 2 Basic Concepts in Macroeconomics 19

- 2-1 Gross Domestic Product and Gross National Product 19
 - Gross Domestic Product 19, Gross National Product 24*
- 2-2 Real versus Nominal Variables 29
 - The construction of price indexes 30, Real GDP 31*
- 2-3 Flows and Stocks in Macroeconomics 34
 - Investment and the capital stock 34, Saving and wealth 35, The current account and net international investment position 36, Deficits and the stock of public debt 36*
- 2-4 Some Intertemporal Aspects of Macroeconomics: Interest rates and present values 37
- 2-5 The Role of Expectations 39
- 2-6 SUMMARY 40
 - KEY CONCEPTS 42
 - PROBLEMS AND QUESTIONS 42

Chapter 3 Output Determination: Introducing Aggregate Supply and Aggregate Demand 44

- 3-1 Macroeconomics as the Study of Economic Fluctuations 45

- 3-2 The Determination of Aggregate Supply 48
The production function 48, The demand for labor and the output supply function 50, The supply of labor 52
- 3-3 The Classical Approach to Aggregate Supply 55
Deriving the aggregate supply curve 56, Unemployment in the classical approach 57
- 3-4 The Keynesian Approach to Aggregate Supply 60
Sticky wages 60, Involuntary unemployment 62, Aggregate supply: A summary 63
- 3-5 The Determination of Aggregate Demand 64
- 3-6 Equilibrium of Aggregate Supply and Aggregate Demand 66
Demand contraction: A historical example 68, Sources of economic fluctuations 70
- 3-7 Aggregate Supply and Demand in the Short Run and the Long Run 71
- 3-8 SUMMARY 73
 KEY CONCEPTS 75
 PROBLEMS AND QUESTIONS 76

PART II INTERTEMPORAL ECONOMICS

Chapter 4 Consumption and Saving 78

- 4-1 National Consumption and Saving 79
- 4-2 The Basic Unit: The Household 83
- 4-3 The Intertemporal Budget Constraint 85
The budget constraint in the two-period model 85, Graphical treatment of the budget constraint 87
- 4-4 Household Decision Making 88
- 4-5 The Permanent-Income Theory of Consumption 90
Empirical evidence on the permanent-income model 94, Durables and nondurables 96, Consumption and taxes 97
- 4-6 The Life-Cycle Model of Consumption and Saving 98
 BOX 3-1: SOCIAL SECURITY AND SAVING 100, *Evidence on the life-cycle model 101, The role of bequests 101*
- 4-7 Household Liquidity Constraints and Consumption Theory 103
- 4-8 Aggregate Consumption and National Saving Rates 104
- 4-9 Consumption, Saving and the Interest Rate 106
- 4-10 Business Saving and Household Saving: Theory and Evidence 109
- 4-11 SUMMARY 111
 KEY CONCEPTS 113
 PROBLEMS AND QUESTIONS 113

Chapter 5 Investment 115

- 5-1 Types of Capital and Investment 115
Some facts about investment 116, Shortcomings in the measurement of investment spending 119
- 5-2 The Basic Theory of Investment 120
The production function 121, BOX 5-1: CAPACITY UTILIZATION IN THE UNITED STATES 122, The household's investment decisions 123, The case of many periods 126, The role of expectations 127

- 5-3 Extensions to the Basic Theory 128
The separation of households and firms 128, Taxes and subsidies 129
- 5-4 Inventory Accumulation 131
- 5-5 Empirical Investigations of Investment Expenditures 133
The accelerator model of investment 133, The adjustment cost approach 135, The q-theory 137, Theories based on credit rationing 139
- 5-6 Investment in Residential Structures (Optional) 141
- 5-7 SUMMARY 143
 - KEY CONCEPTS 145
 - PROBLEMS AND QUESTIONS 145
 - APPENDIX 147

Chapter 6 Saving, Investment and the Current Account 149

- 6-1 A Formal Analysis of Saving, Investment, and the Current Account 150
- 6-2 The Current Account and International Trade 159
BOX 6-1: WHAT IS HIDDEN BY A SUMMARY CURRENT ACCOUNT STATISTIC? 161
- 6-3 The Determination of the Current Account 163
World interest rates 163, Investment shocks 164, Output shocks 164, Terms-of-trade shocks 165
- 6-4 A Country's Intertemporal Budget Constraint 167
The intertemporal budget constraint in the two-period model 167, The intertemporal budget constraint with many periods 170
- 6-5 Limitations on Foreign Borrowing and Lending 173
Administrative controls 173, Large-country effects on world interest rates 174, Risk and enforcement problems 177
- 6-6 SUMMARY 178
 - KEY CONCEPTS 180
 - PROBLEMS AND QUESTIONS 180
 - APPENDIX 182

Chapter 7 The Government Sector 188

- 7-1 Government Revenues and Expenditures 189
- 7-2 Government Saving, Investment and Borrowing 193
- 7-3 The Government Budget and the Current Account 194
- 7-4 The Interaction of the Private and Public Sectors 197
A temporary tax-financed increase in government spending 197, A permanent increase in government spending 198, Fiscal "crowding out" 199
- 7-5 Ricardian Equivalence 200
A statement of the Ricardian equivalence theorem 201, Limitations of Ricardian Equivalence 203
- 7-6 Some Reasons Why Governments Overspend 205
- 7-7 Other Interactions between the Public and Private Sectors 208
Deadweight losses of taxes 209, The case for tax smoothing 211, Tax rates and tax revenues 212, The cyclical pattern of budget deficits 213
- 7-8 SUMMARY 214
 - KEY CONCEPTS 217
 - PROBLEMS AND QUESTIONS 217

PART III MONETARY ECONOMICS

Chapter 8 Money Demand 219

- 8-1 What is Money? 219
 - BOX 8-1: A BRIEF HISTORY OF MONEY 222
- 8-2 Towards a Theory of Money Demand 225
 - Interest rates and prices in a monetary economy 226, Money and the household budget constraint 228*
- 8-3 The Demand for Money 231
 - The Baumol–Tobin model 231, Demand for money as a store of wealth 237, BOX 8-2: THE UNDERGROUND ECONOMY 238, The velocity of money 240*
- 8-4 Empirical Studies of Money Demand 242
 - Evidence on Baumol-Tobin and the transactions demand for money 242, The evidence on other motives for holding money 245*
- 8-5 The Doctrine of Monetarism 246
- 8-6 SUMMARY 247
 - KEY CONCEPTS 249
 - PROBLEMS AND QUESTIONS 249
 - APPENDIX 1 251
 - APPENDIX 2 252

Chapter 9 The Money Supply Process 253

- 9-1 The Money Supply and the Central Bank: an Overview 253
- 9-2 Central Bank Operations and the Monetary Base 256
 - Open-market operations 256, BOX 9-1: OPEN-MARKET OPERATIONS, BOND PRICES, AND INTEREST RATES 259, The discount window 260, Rediscounting the paper of nonfinancial firms 264, Foreign-exchange operations 264, A fundamental equation for changes in the money stock 266*
- 9-3 The Money Multiplier and the Money Supply 267
 - The ratio of reserves to deposits 270, The ratio of currency to deposits 272, The central bank's control over the money supply 273*
- 9-4 The Money Supply and the Government Budget Constraint 274
 - BOX 9-2: THE CENTRAL BANK AND POLITICS 277
- 9-5 Equilibrium in the Money Market 278
- 9-6 SUMMARY 282
 - KEY CONCEPTS 284
 - PROBLEMS AND QUESTIONS 285

Chapter 10 Money, Exchange Rates and Prices 287

- 10-1 Exchange rate arrangements
 - The operations of a fixed exchange rate regime 292, BOX 10-1: CURRENCY CONVERTIBILITY 293, The operations of a flexible exchange-rate regime, 296*
- 10-2 The Building Blocks of a General Equilibrium Model 297
 - Purchasing power parity 297, International interest arbitrage 301*
- 10-3 General Equilibrium of Price, the Exchange Rate, and Money 303
- 10-4 Monetary Policy under Fixed and Floating Exchange Rates 305
 - Fixed exchange rates 306, Flexible exchange rates 308*
- 10-5 Global Fixed Exchange-Rate Arrangements 308
 - The gold standard 308, A unilateral peg 311, A cooperative peg 314*

- 10-6 The Effects of Devaluation 315
- 10-7 The Case of Capital Controls 317
Fixed exchange rates with no capital mobility 317, Flexible exchange rates with no capital mobility 318, Devaluation with no capital mobility 318
- 10-8 Other Kinds of Exchange Rate Regimes 319
- 10-9 SUMMARY 321
KEY CONCEPTS 323
PROBLEMS AND QUESTIONS 324
APPENDIX 326

Chapter 11 Inflation: Fiscal and Monetary Aspects 327

- 11-1 Government Deficits and Inflation 329
Budget deficits under fixed exchange rates 330, Budget deficits under floating exchange rates 333, Balance-of-payments crisis: the transition from fixed to floating rates 335, BOX 11-1: A CASE OF BALANCE OF PAYMENTS COLLAPSE: ARGENTINA IN 1989 337, Can domestic borrowing be used to avoid inflation? 338
- 11-2 The Inflation Tax and Seigniorage 339
The inflation tax and the household budget constraint 340 The Laffer curve for the inflation tax 342, Can a government earn seigniorage under fixed exchange rates? 343, Who gets the seigniorage? 344
- 11-3 The Costs of Inflation 344
Anticipated inflation 345, BOX 11-2: THE OPTIMAL RATE OF INFLATION 346, Unanticipated inflation 349, Should countries learn to live with inflation? 352
- 11-4 SUMMARY 352
KEY CONCEPTS 354
PROBLEMS AND QUESTIONS 354

PART IV OUTPUT DETERMINATION, STABILIZATION POLICY AND GROWTH

Chapter 12 Macroeconomic Policies and Output Determination in a Closed Economy 356

- 12-1 Aggregate Demand and the Keynesian Multiplier 357
Defining aggregate demand 357, The Keynesian multiplier 359
- 12-2 The IS-LM framework 360
The IS curve 361, The LM schedule 361, Determining aggregate demand with the IS-LM schedules 363
- 12-3 The Effects of Macroeconomic Policies on Aggregate Demand 365
Effects of a rise in government spending 365, Effects of a cut in taxes 367, Effects of a money supply increase 367, Some important special cases 368, The effects of fiscal and monetary policies 372
- 12-4 Implications of the IS-LM Analysis for Stabilization Policy 372
The debate over activist demand management 373, Adding intertemporal considerations into IS-LM analysis 373
- 12-5 IS—LM in the Short Run and the Long Run 374
- 12-6 The Empirical evidence 376
BOX 12-1: LARGE-SCALE ECONOMETRIC MODELS 377
- 12-7 SUMMARY 379
KEY CONCEPTS 381
PROBLEMS AND QUESTIONS 381
APPENDIX 383

Chapter 13 Macroeconomic Policies in the Open Economy: The Case of Fixed Exchange Rates 386

- 13-1 A Model of Internationally Differentiated Products 387
- 13-2 The Determination of Aggregate Demand 388
- 13-3 The IS-LM Model for the Open Economy 393
 - Properties of the IS curve 393, The LM curve and capital mobility 394, Equilibrium in the IS-LM-CM framework 395*
- 13-4 The Determination of Output and the Price Level 397
 - Effects of a fiscal expansion 398, Effects of a monetary expansion 400, Effects of a devaluation 401, The United States as a special case 402*
- 13-5 Capital Controls 403
 - The case of a monetary expansion 404, The case of a fiscal expansion 406*
- 13-6 SUMMARY 407
 - KEY CONCEPTS 409
 - PROBLEMS AND QUESTIONS 409
 - APPENDIX 411

Chapter 14 Macroeconomic Policies in the Open Economy: The Case of Flexible Exchange Rates 414

- 14-1 The IS-LM Framework with Flexible Exchange Rates 414
- 14-2 Macroeconomic Policies in a Small Country Under Free Capital Mobility 417
 - Effects of a fiscal expansion 418, Expansionary monetary policy 419, A comparison of macroeconomic policy under fixed and flexible exchange rates 420*
- 14-3 Exchange Rate Dynamics 421
 - Exchange rate overshooting 421, Expectations and floating exchange rates 424*
- 14-4 Macroeconomic Policies under Free Capital Mobility: The Large-Country Case 426
 - A fiscal expansion 426, An increase in the money supply 427*
- 14-5 Capital Controls and Floating Exchange Rates 428
- 14-6 The Policy Mix 429
- 14-7 Empirical Evidence 430
- 14-8 The Case for Policy Coordination 432
- 14-9 Policy Coordination within Europe 435
- 14-10 SUMMARY 438
 - KEY CONCEPTS 439
 - PROBLEMS AND QUESTIONS 439
 - APPENDIX 441

Chapter 15 Inflation and Unemployment 444

- 15-1 Supply Shocks and Inflation 444
 - Types of supply shocks 444, Wages and aggregate supply shifts 446*
- 15-2 Wage-Price Dynamics and the Problems of Stabilization 448
 - Dynamic links of aggregate supply and aggregate demand 451, A brief history of the Phillips curve 452, Price inflation and the Phillips curve 454*
- 15-3 Expectations Formation Mechanisms and the Phillips Curve 455
 - The short-run and long-run Phillips curve trade-off 456, A detailed*

example 457, The sacrifice ratio 459, BOX 15-1: THE SACRIFICE RATIO AND THE REAGAN DISINFLATION 460, Expectations and wage contracts in inertial inflation 461

- 15-4 The Rational Expectations Approach 462
The inflation-unemployment trade-off under rational expectations 464, Credibility and the costs of disinflation 466
- 15-5 The Use of the Exchange Rate to Stabilize Prices 468
- 15-6 SUMMARY 471
 - KEY CONCEPTS 473
 - PROBLEMS AND QUESTIONS 473
 - APPENDIX 475

Chapter 16 Institutional Determinants of Wages and Unemployment 476

- 16-1 Labor Market Institutions and Aggregate Supply Behavior 477
Formal versus informal wage contracts 477, Unionization 477, Centralization of wage negotiations 478, Timing of wage contracts 479, Incomes policy and the role of government in wage negotiations 480, Wage indexation 481
- 16-2 Labor-Market Institutions and the Supply Shocks of the 1970s 483
A framework to analyze oil price shocks 484, The response to the oil shock of the 1970s: Europe versus the United States 486
- 16-3 A Detailed Look at Unemployment 489
Defining and interpreting unemployment 490, Unemployment in the United States 492, Who is unemployed in the United States? 492, Normal turnover vs. hard core unemployment 493
- 16-4 Determinants of the Natural Rate of Unemployment 496
Migration and demographics 496, Minimum wages 497, Sectoral variability 498, Unemployment insurance 498, Union power 500, Labor taxes 504, Hysteresis in unemployment 505 Measures of the natural rate of unemployment 506
- 16-5 The Costs of Unemployment 507
Structural (or natural) unemployment 508, Cyclical unemployment 509
- 16-6 SUMMARY 510
 - KEY CONCEPTS 512
 - PROBLEMS AND QUESTIONS 512

Chapter 17 Explaining Business Cycles 514

- 17-1 Some General Characteristics of Business Cycles 515
Business cycles in the United States 516, Separating trends and cycles 520
- 17-2 The Impulse-Propagation Approach to Business Cycles 522
- 17-3 Investment Impulses and the Keynesian Business-Cycle Theory 524
The pure inventory cycle 524, The multiplier-accelerator model 527
- 17-4 Policy Shocks as a Source of Business-Cycle Impulses 528
- 17-5 New Classical Theories of the Business Cycle 530
Imperfect information 331, Real business cycles 534
- 17-6 New Keynesian Theories of Wage and Price Rigidities 537
Labor contracts 537, Union wage-setting 538, Implicit contracts 538, Efficiency wages 539, "Menu costs" 540, Some conclusions on new-classical and new-Keynesian theories 541

17-7 Some International Aspects of Business Cycles 542

17-8 SUMMARY 543

KEY CONCEPTS 545

PROBLEMS AND QUESTIONS 545

Chapter 18 Long-Term Growth 547

18-1 Patterns of Growth 550

The emergence of modern economic growth 550, Characteristics of modern economic growth 552

18-2 The Sources of Economic Growth 554

An accounting framework for growth 555, The empirical evidence 556,

BOX 18-1: POSSIBLE EXPLANATIONS OF THE U.S. PRODUCTIVITY SLOWDOWN 560

18-3 The Solow Growth Model 561

Presentation of the Solow model 561, A graphical representation 564, Effects of the saving rate on income and growth 566, Effects of a higher rate of population growth 568, Technological change in the Solow model 569

18-4 New Approaches to Explain Growth 570

18-5 Economic Growth in the Open Economy 572

Growth and international capital flows 572, trade and growth: the developing country debate 573, open economies and economic convergence 578, BOX 18-2: STAGES IN THE BALANCE OF PAYMENTS 574,

European growth after 1992 580

18-6 Macroeconomic Policies to Promote Growth 582

Saving and investment 582, Labor services 583, Productivity 584

18-7 SUMMARY 585

KEY CONCEPTS 586

PROBLEMS AND QUESTIONS 587

PART V SPECIAL IN MACROECONOMICS

Chapter 19 The Theory and Practice of Economic Policy 588

19-1 The Basic Theory of Economic Policy 589

Instruments and targets of economic policy 589, The Tinbergen framework 590, Effective market classification 594, Fewer instruments than targets 595

19-2 The Limitations of Activism under Uncertainty 598

Kinds of uncertainty 598, A simple model of policymaking under uncertainty 599

19-3 Choosing among Policy Instruments 601

19-4 The Lucas Critique to the Theory of Economic Policy 604

19-5 Rules, Discretion and Time Consistency 606

Time consistency 607, BOX 19-1: THE GRAMM-RUDMAN-HOLLINGS BUDGET RULE TO ACHIEVE A ZERO BUDGET DEFICIT 610

19-6 Some Aspects of Actual Government Behavior 613

19-7 SUMMARY 615

KEY CONCEPTS 617

PROBLEMS AND QUESTIONS 618

Chapter 20 Financial Markets 620

20-1 Some Institutional Aspects of Capital Markets: the U.S. Case 621

Financial instruments and markets 621, *Financial intermediaries* 624,
The regulation of financial intermediaries 625

- 20-2 Institutional Changes in Global Financial Markets 626
BOX 20-1: THE SAVINGS AND LOAN CRISIS: A CASE OF LAX REGULATORY CONTROL 627, *Sources of financial globalization* 628, *International financial integration and Europe 1992* 631
- 20-3 Optimal Portfolio Selection under Risk Aversion 632
Expected returns of a portfolio 633, *Risk of a portfolio* 634, *Expected utility as a function of risk and return* 637, *The portfolio set* 638, *Choosing the optimal portfolio* 639, *Some characteristics of optimal portfolios* 641
- 20-4 Capital Market Equilibrium: the Capital Asset Pricing Model (CAPM) 641
- 20-5 International Interest Arbitrage 643
Uncovered interest arbitrage 644, *Covered interest arbitrage* 646
- 20-6 The term structure of interest rates 648
The yield curve 649, *The expectations theory* 650
- 20-7 SUMMARY 653
KEY CONCEPTS 655
PROBLEMS AND QUESTIONS 655

Chapter 21 Tradable and Nontradable Goods 657

- 21-1 Determinants of Tradability and a Broad Classification of Goods 659
- 21-2 Theoretical Framework 660
Aggregate supply in the TNT model 660, *Aggregate demand in the TNT model* 662, *Market equilibrium in the TNT model* 663, *Borrowing and repayment in the TNT model* 665, BOX 21-1: STRUCTURAL ADJUSTMENT PROGRAMS 667, *The Dutch disease* 668
- 21-3 Tradables, Nontradables, and the Price Level 672
Prices, wages, and productivity 673, *Comparing real income levels in different countries* 677
- 21-4 Demand Shocks and the Real Exchange Rate 680
A Keynesian version of the tradable/nontradable model 683, *Devaluation and the structuralist critique* 684
- 21-5 SUMMARY 686
KEY CONCEPTS 688
PROBLEMS AND QUESTIONS 688

Chapter 22 The Developing Country Debt Crisis 690

- 22-1 An Overview of the Debt Crisis 690
- 22-2 The Origins of the Debt Crisis 692
BOX 22-1: SOCIAL DEVELOPMENT AND THE DEBT CRISIS 693
External factors 694, *Domestic policies* 701, *Capital flight* 703
- 22-3 Adjustment Problems and Prospects in Debtor Countries 705
The debt crisis, trade, and domestic economic activity 706, *Changes in the debt burden after 1980* 708, *The adjustment problem from the saving-investment perspective* 710, *The foreign debt problem and the budget crisis* 711, *The adjustment problem: a summary* 712
- 22-4 The Problems of Commercial Bank Creditors 712
- 22-5 Towards a solution of the debt crisis 718
Difficulties in reaching a solution 719, *The Brady Plan* 720

22-6 SUMMARY 722

KEY CONCEPTS 724

PROBLEMS AND QUESTIONS 724

Chapter 23 Stopping High Inflations 726

23-1 A Historical Perspective on Very High Inflations and Hyperinflations 727

Early cases of high inflation 727, The emergence of hyperinflations in the 20th century 729, Recent cases of high inflation 732

23-2 Key Conditions Triggering Hyperinflation 732

War, civil war and revolution 734, Weak governments 735, External shocks with budgetary implications 736

23-3 The Economic Dynamics of Hyperinflation 737

The case of Bolivia 737, A monetary model of hyperinflation 739, Fiscal dynamics 745

23-4 Stabilization Policies for Ending Hyperinflations 745

Exchange-rate stabilization 746, Comprehensive budget policies 747, Monetary and credit policies 749, Monetary reform: the introduction of a new currency 750, Alleviating the external constraint 751, The problem of confidence 751, Why do governments postpone stabilization? 752

23-5 Heterodox Stabilization Programs 754

23-6 Stabilization in Eastern Europe 756

23-7 SUMMARY 759

KEY CONCEPTS 760

PROBLEMS AND QUESTIONS 761

INDEX 762
