

TABLE OF CONTENTS

PREFACE		ix
Chapter 1	EFFICIENCY ANALYSIS IN PRODUCTION	1
1.1	Partial and General Equilibrium Models	2
1.2	Production Frontier as Flexible Production Functions	5
1.3	Parametric Forms and their Econometric Estimation	15
1.4	Nonparametric Theory: Different Facets	25
1.5	Implications of Nonparametric Theory	34
Chapter 2	THE NONPARAMETRIC APPROACH	39
2.1	Convex Hull Method	40
2.2	Stochastic Micro and Macro Frontier	47
2.3	Data Envelopment Analysis	62
2.4	Consistency Approach through Data Adjustment	79
2.5	Distribution of Technical and Price Efficiency	85
Chapter 3	INTERFACE WITH PARAMETRIC THEORY	93
3.1	Average versus Optimal Production Function	94
3.2	Estimation of Production Frontier	113
3.3	Robust Methods of Estimation	122
3.4	Data Screening and Cluster Analysis	130
3.5	Problems in Parametric Theory	133
Chapter 4	IMPLICATIONS OF NONPARAMETRIC THEORY	136
4.1	Economic Implications	136
4.2	Econometrics and Minimax Frontiers	153
4.3	The Regression and Index Number Problem	157
4.4	Joint Costs and Nonlinear Frontiers	162
4.5	Efficiency Analysis in the Stochastic Case	173
Chapter 5	EXTENSIONS OF NONPARAMETRIC APPROACH	180
5.1	Economic Generalizations	180
5.2	Extensions of Data Envelopment Analysis	184
5.3	Combining Parametric and Nonparametric Models	199
5.4	Nonparametric Regression and Bootstrap Methods	207
5.5	Distribution of Technical and Price Efficiency	215
Chapter 6	APPLICATIONS OF NONPARAMETRIC THEORY	224
6.1	Production in Quasi-Market and Non-Market Systems	224
6.2	Managerial Models in Operations Research	228
6.3	Economic Development and International Trade	230
6.4	Stochastic Programming and Markov Process Models	231
6.5	Multivariate Data Analysis and Information Theory	237
