

Contents

1	Probability Distributions and Stochastic Processes	1
1.1	Probability Distributions and Characteristic Functions	1
1.2	Gaussian, Poisson and Infinitely Divisible Distributions	8
1.3	Random Fields and Stochastic Processes.....	14
1.4	Wiener Processes, Poisson Random Measures and Lévy Processes	15
1.5	Martingales and Backward Martingales	25
1.6	Quadratic Variations of Semi-martingales.....	31
1.7	Markov Processes and Backward Markov Processes	37
1.8	Kolmogorov's Criterion for the Continuity of Random Field	41
2	Stochastic Integrals	45
2.1	Itô's Stochastic Integrals by Continuous Martingale and Wiener Process	45
2.2	Itô's Formula and Applications	49
2.3	Regularity of Stochastic Integrals Relative to Parameters	55
2.4	Fisk–Stratonovitch Symmetric Integrals.....	59
2.5	Stochastic Integrals with Respect to Poisson Random Measure	64
2.6	Jump Processes and Related Calculus	67
2.7	Backward Integrals and Backward Calculus	73
3	Stochastic Differential Equations and Stochastic Flows	77
3.1	Geometric Property of Solutions I; Case of Continuous SDE.....	77
3.2	Geometric Property of Solutions II; Case of SDE with Jumps	81
3.3	Master Equation	86
3.4	L^p -Estimates and Regularity of Solutions; C^∞ -Flows	96
3.5	Backward SDE, Backward Stochastic Flow.....	100
3.6	Forward–Backward Calculus for Continuous C^∞ -Flows	101
3.7	Diffeomorphic Property and Inverse Flow for Continuous SDE	104
3.8	Forward–Backward Calculus for C^∞ -Flows of Jumps	109

3.9	Diffeomorphic Property and Inverse Flow for SDE with Jumps	116
3.10	Simple Expressions of Equations; Cases of Weak Drift and Strong Drift.....	119
4	Diffusions, Jump-Diffusions and Heat Equations	125
4.1	Continuous Stochastic Flows, Diffusion Processes and Kolmogorov Equations	126
4.2	Exponential Transformation and Backward Heat Equation	129
4.3	Backward Diffusions and Heat Equations	137
4.4	Dual Semigroup, Inverse Flow and Backward Diffusion	140
4.5	Jump-Diffusion and Heat Equation; Case of Smooth Jumps	146
4.6	Dual Semigroup, Inverse Flow and Backward Jump-Diffusion; Case of Diffeomorphic Jumps.....	155
4.7	Volume-Preserving Flows	161
4.8	Jump-Diffusion on Subdomain of Euclidean Space	164
5	Malliavin Calculus	167
5.1	Derivative and Its Adjoint on Wiener Space	168
5.2	Sobolev Norms for Wiener Functionals	174
5.3	Nondegenerate Wiener Functionals.....	183
5.4	Difference Operator and Adjoint on Poisson Space.....	190
5.5	Sobolev Norms for Poisson Functionals.....	196
5.6	Estimations of Two Poisson Functionals by Sobolev Norms.....	201
5.7	Nondegenerate Poisson Functionals	209
5.8	Equivalence of Nondegenerate Conditions	214
5.9	Product of Wiener Space and Poisson Space.....	222
5.10	Sobolev Norms for Wiener–Poisson Functionals	226
5.11	Nondegenerate Wiener–Poisson Functionals.....	233
5.12	Compositions with Generalized Functions	239
6	Smooth Densities and Heat Kernels	245
6.1	H -Derivatives of Solutions of Continuous SDE	246
6.2	Nondegenerate Diffusions.....	250
6.3	Density and Fundamental Solution for Nondegenerate Diffusion...	253
6.4	Solutions of SDE on Wiener–Poisson Space	259
6.5	Nondegenerate Jump-Diffusions	265
6.6	Density and Fundamental Solution for Nondegenerate Jump-Diffusion	273
6.7	Short-Time Estimates of Densities.....	277
6.8	Off-Diagonal Short-Time Estimates of Density Functions	284
6.9	Densities for Processes with Big Jumps	288
6.10	Density and Fundamental Solution on Subdomain	295
7	Stochastic Flows and Their Densities on Manifolds	303
7.1	SDE and Stochastic Flow on Manifold	303
7.2	Diffusion, Jump-Diffusion and Their Duals on Manifold	311
7.3	Brownian Motion, Lévy Process and Their Duals on Lie Group....	317

7.4 Smooth Density for Diffusion on Manifold 321

7.5 Density for Jump-Diffusion on Compact Manifold 328
