

CONTENTS OF VOLUME I

Introduction to the Series	v
Contents of the Handbook	vii
Preface to the Handbook	xi

PART 1 – SUPPLY OF LABOR

Chapter 1

Labor Supply of Men: A Survey

JOHN PENCAVEL

3

1. Introduction	3
2. Empirical regulations	7
2.1. Trends in work behavior	7
2.2. Cross-sectional variations in work behavior	19
3. Conceptual framework	26
3.1. The canonical model	26
3.2. Aggregation	31
3.3. Nonlinear budget constraint	35
3.4. Restrictions on hours of work by employers	40
3.5. Life-cycle models	44
4. Estimation of the static model	51
4.1. Specification	51
4.2. Empirical results from U.S. nonexperimental data	60
4.3. Empirical results from British data	70
4.4. Empirical results from U.S. experimental data	73
4.5. Conclusions	82
5. Estimation of the life-cycle model	83
6. Conclusions	94
References	96

*Chapter 2***Female Labor Supply: A Survey**

MARK R. KILLINGSWORTH and JAMES J. HECKMAN	103
1. Introduction	103
2. Female labor supply: Some stylized facts	104
2.1. Trends and cyclical patterns in time-series data	104
2.2. Cross-section patterns of female labor supply	123
2.3. Some cautionary remarks	123
3. Theoretical models and female labor supply	124
3.1. Static models	126
3.2. Dynamic models	144
4. Empirical studies of female labor supply	179
4.1. Empirical work on female labor supply: Methodological issues	179
4.2. Estimates of female labor supply elasticities: An overview	185
References	198

*Chapter 3***Models of Marital Status and Childbearing**

MARK MONTGOMERY and JAMES TRUSSELL	205
1. Introduction	205
2. Demographic trends and levels in the United States	206
2.1. Marriage and marital dissolution	206
2.2. Fertility	210
3. Demographic models: Empirical regularities in demographic behavior	214
3.1. A model of marriage	215
3.2. A model of marital fertility	219
3.3. A model of fertility	223
3.4. A summary of empirical demographic models	225
3.5. Birth interval models	226
3.6. Unobserved heterogeneity – a digression	230
4. Economic models of marital status	231
4.1. Age at first marriage	233
4.2. The gains to marriage	237
4.3. Marital dissolution	240
5. Economic models of fertility: One-period models	242
5.1. Static models	242
5.2. The effect of husband's income on fertility	245
5.3. Child care arrangements and labor supply	247
5.4. Extensions of the static model: Child quality	248
5.5. Extensions of the static model: Taste formation	251
5.6. Child costs and equivalence scales	253

6. Life cycle fertility models	255
6.1. Time costs in life cycle fertility models	255
6.2. The irreversibility of childbearing	259
6.3. Dynamic programming models under uncertainty	260
6.4. Life cycle fertility models with employment	262
6.5. Contraceptive histories	263
7. Conclusions	263
References	266

Chapter 4

Home Production – A Survey

REUBEN GRONAU	273
1. Introduction	273
2. Theory	273
3. The allocation of time	279
4. The allocation of goods	288
5. The value of time and the value of home output	292
6. Summary and evaluation	300
References	302

Chapter 5

Retirement from the Labor Force

EDWARD P. LAZEAR	305
1. Introduction and summary	305
2. Some basic facts on retirement	307
3. The definition of retirement	309
4. Models of retirement	312
4.1. The one-period work–leisure analysis	312
4.2. A simple lifetime retirement model	314
4.3. More sophisticated multi-period models	316
4.4. Endogenous compensation profiles and retirement	320
5. Empirical results on retirement behavior	324
5.1. A brief history of the U.S. social security system	324
5.2. Effects of social security on retirement	325
5.3. Effects of private pensions on retirement	328
6. Pensions	330
7. Retirement, savings, and consumption	351
References	352

*Chapter 6***Demand for Education**

RICHARD B. FREEMAN	357
1. Introduction	357
2. Societal demand for education: Productivity	358
3. Sectoral shifts and demand for education	362
4. Substitutability between educated labor and other inputs	364
5. Individual decision-making: Demand for education	367
6. Salary determination	375
7. Probing the education–earnings link	377
8. Changes over time and market dynamics	379
9. Public finance of education	381
10. Conclusion	382
References	382

*Chapter 7***Forestalling the Demise of Empirical Economics: The Role of Microdata in Labor Economics Research**

FRANK STAFFORD	387
1. Introduction	387
2. The changing character of labor economics research, 1965–83	389
3. The interaction between theory and data base development	397
4. Advantages and disadvantages of different types of microdata and some data based pitfalls	404
4.1. Advantages and disadvantages of micro cross-sections	405
4.2. Advantages and disadvantages of panel data	411
4.3. Have social experiments been useful in labor economics?	413
4.4. Limitations of research based on microdata	418
5. Conclusion	419
References	421

PART 2 – DEMAND FOR LABOR*Chapter 8***The Demand for Labor in the Long Run**

DANIEL S. HAMERMESH	429
1. Introduction	429
2. Two factors – the theory	430
2.1. Cobb–Douglas technology	435
2.2. Constant elasticity of substitution technology	436

2.3. Generalized Leontief	438
2.4. Translog	438
3. Several factors – the theory	439
3.1. Multi-factor Cobb–Douglas and CES functions	443
3.2. Generalized Leontief	444
3.3. Translog	445
4. Homogeneous labor – estimation and empirical issues	447
4.1. Specification	447
4.2. Measurement and interpretation issues	449
5. Homogeneous labor – results and problems	451
5.1. Results with output constant and wages exogenous	451
5.2. Varying output or endogenous wages	454
6. Heterogeneous labor – estimation and empirical issues	455
6.1. Specification	455
6.2. Measurement and interpretation issues	457
7. Heterogeneous labor – results and problems	461
8. Conclusions	466
References	468

Chapter 9

Dynamic Models of Labour Demand

S. J. NICKELL

1. Introduction	473
2. The size and structure of adjustment costs	474
2.1. How much does it cost to hire and fire?	474
2.2. The structure of adjustment costs	477
3. Dynamic theories of labour demand	478
3.1. Strictly convex adjustment costs	480
3.2. Dynamic monopsony	486
3.3. Linear adjustment costs	490
4. The transition to empirical work	499
4.1. The specification of N^*	504
4.2. Expectations	506
4.3. Stochastic structure	509
4.4. Aggregation	509
4.5. General problems	511
5. Empirical investigations	513
5.1. A general description	513
5.2. Some results on the dynamic structure of labour demand	516
6. Summary and directions of future research	520
References	521

PART 3 – WAGE STRUCTURE

Chapter 10

Wage Determinants: A Survey and Reinterpretation of Human Capital Earnings Functions

ROBERT J. WILLIS	525
1. Introduction	525
2. Statistical earnings functions	527
2.1. The theory in a nutshell	527
2.2. Statistical earnings functions	529
2.3. Internal rate of return	529
2.4. The self-selection problem	534
2.5. Empirical internal rate of return studies	535
2.6. The human capital earnings function: Empirical results	541
3. Homogeneous human capital models	548
3.1. Background	548
3.2. Mincer's schooling model	550
3.3. Rosen's schooling model	551
4. A model of heterogeneous human capital	556
4.1. The general model	556
4.2. Non-competing groups	559
4.3. Perfectly equalizing differentials	561
4.4. Life cycle earnings growth and perfectly equalizing differentials	567
4.5. Generalizations	569
5. Inequality of opportunity and ability	570
5.1. Inequality of opportunity	571
5.2. Inequality of ability	572
5.3. The Roy model	574
5.4. Empirical studies of ability bias	581
6. Other topics	590
6.1. Education and economic growth	590
6.2. Screening and signalling	591
6.3. Specific human capital	594
6.4. Agency theories of life cycle wages	596
7. Conclusion	598
References	599

Chapter 11

The Determination of Life Cycle Earnings: A Survey

YORAM WEISS	603
1. Introduction	603
2. The human capital framework	604

3. The wealth maximizing model	609
4. Life cycle earnings with endogenous labor supply	616
5. Comparative statics and dynamics	623
6. Extensions of the basic model	630
6.1. Borrowing constraints	630
6.2. Uncertainty	632
7. Specific human capital and binding labor contracts	634
References	638

Chapter 12

The Theory of Equalizing Differences

SHERWIN ROSEN

641

1. Introduction	641
2. Equalizing differences for work-related consumption	644
2.1. Preferences, opportunities and worker choices	645
2.2. Market supply	647
2.3. Technology, opportunities and firm choices	650
2.4. Market demand	652
2.5. Market equilibrium and selection	653
3. Generalizations	658
4. Applications	661
4.1. Value of safety	661
4.2. Worker and job characteristics	663
4.3. Wages and working conditions	666
4.4. Equalizing differences for locational amenities	673
5. Further applications	676
5.1. Human capital	676
5.2. Uncertain prospects	680
5.3. Equalizing differences on working hours	682
5.4. Unemployment and income risk	684
6. Conclusions	688

References

688

Chapter 13

The Economic Analysis of Labor Market Discrimination: A Survey

GLEN G. CAIN

693

1. Introduction	693
2. The definition of economic discrimination	694
2.1. Concepts	694
2.2. Summary statistics for two concepts of economic discrimination	701
3. Theories of economic discrimination in the labor market	709
3.1. Nonstochastic competitive neoclassical models: Discrimination by consumers	710
3.2. Nonstochastic monopolistic neoclassical models: Product monopoly	717

3.3. Stochastic neoclassical models and statistical discrimination	722
3.4. Institutional theories of discrimination	729
4. Empirical research on labor market discrimination	731
4.1. Testing hypotheses suggested by theoretical models of discrimination	731
4.2. Estimating labor market discrimination	743
5. Policy implications and conclusions	772
5.1. Explaining and judging discrimination: The diversity of cases	772
5.2. The effects of discrimination on total output	774
5.3. Measuring the impact of policies	775
5.4. Results of time-series analyses	777
5.5. Final word	781
References	781
Index	787
