

# Contents

<b>1</b>	<b>Preliminaries</b> .....	1
1.1	Limits and Kan Extensions .....	1
1.2	Simplicial Objects .....	2
1.3	Homotopy Limits of Diagrams of Spaces .....	4
<b>2</b>	<b>Topological 1-Segal and 2-Segal Spaces</b> .....	9
2.1	Topological 1-Segal Spaces and Higher Categories .....	9
2.2	Membrane Spaces and Generalized Segal Maps.....	12
2.3	2-Segal Spaces.....	19
2.4	Proto-Exact Categories and the Waldhausen S-Construction .....	21
2.5	Unital 2-Segal spaces .....	25
2.6	The Hecke-Waldhausen Space and Relative Group Cohomology .....	27
<b>3</b>	<b>Discrete 2-Segal Spaces</b> .....	31
3.1	Examples: Graphs, Bruhat-Tits Complexes .....	31
3.2	The Twisted Cyclic Nerve .....	34
3.3	The Multivalued Category Point of View .....	36
3.4	The Hall Algebra of a Discrete 2-Segal Space.....	43
3.5	The Bicategory Point of View .....	46
3.6	The Operadic Point of View .....	52
3.7	Set-Theoretic Solutions of the Pentagon Equation .....	58
3.8	Pseudo-Holomorphic Polygons as a 2-Segal Space .....	63
3.9	Birationally 1- and 2-Segal Semi-Simplicial Schemes .....	67
<b>4</b>	<b>Model Categories and Bousfield Localization</b> .....	71
4.1	Concepts from Model Category Theory.....	71
4.2	Enriched Model Categories .....	73
4.3	Enriched Bousfield Localization.....	78
4.4	Homotopy Limits in Model Categories .....	81

<b>5</b>	<b>The 1-Segal and 2-Segal Model Structures</b> .....	85
5.1	Yoneda Extensions and Membrane Spaces .....	85
5.2	1-Segal and 2-Segal Objects .....	90
5.3	1-Segal and 2-Segal Model Structures .....	92
<b>6</b>	<b>The Path Space Criterion for 2-Segal Spaces</b> .....	95
6.1	Augmented Simplicial Objects .....	95
6.2	Path Space Adjunctions .....	96
6.3	The Path Space Criterion .....	100
6.4	The Path Space Criterion: Semi-Simplicial Case .....	102
<b>7</b>	<b>2-Segal Spaces from Higher Categories</b> .....	107
7.1	Quasi-Categories vs. Complete 1-Segal Spaces .....	107
7.2	Exact $\infty$ -Categories .....	109
7.3	The Waldhausen S-Construction of an Exact $\infty$ -Category .....	111
7.4	Application: Derived Waldhausen Stacks .....	115
7.5	The Cyclic Bar Construction of an $\infty$ -Category .....	122
<b>8</b>	<b>Hall Algebras Associated to 2-Segal Spaces</b> .....	125
8.1	Theories with Transfer and Associated Hall Algebras .....	125
8.2	Groupoids: Classical Hall and Hecke Algebras .....	128
8.3	Groupoids: Generalized Hall and Hecke Algebras .....	133
8.4	$\infty$ -Groupoids: Derived Hall Algebras .....	142
8.5	Stacks: Motivic Hall Algebras .....	148
<b>9</b>	<b>Hall <math>(\infty, 2)</math>-Categories</b> .....	153
9.1	Hall Monoidal Structures .....	153
9.2	Segal Fibrations and $(\infty, 2)$ -Categories .....	157
9.3	The Hall $(\infty, 2)$ -Category of a 2-Segal Space .....	161
<b>10</b>	<b>An <math>(\infty, 2)</math>-Categorical Theory of Spans</b> .....	169
10.1	Spans in Kan Complexes .....	170
10.2	Vertical Spans .....	172
10.3	Horizontal Spans .....	194
10.4	Bispans .....	198
<b>11</b>	<b>2-Segal Spaces as Monads in Bispans</b> .....	201
11.1	The Higher Hall Monad .....	201
<b>A</b>	<b>Bicategories</b> .....	209
	<b>References</b> .....	213
