PART I ONE SECTOR MODELS

A Deterministic Models

1. F.P. Ramsey (1928), 'A Mathematical Theory of Saving', *Economic Journal*, **38** (152), December, 543–59 5
2. D. Cass (1965), 'Optimum Growth in an Aggregative Model of Capital Accumulation', *Review of Economic Studies*, **32** (91), July, 233–40 22
3. R. Beals and T.C. Koopmans (1969), 'Maximizing Stationary Utility in a Constant Technology', *SIAM Journal of Applied Mathematics*, **17** (5), September, 1001–15 30
4. W.D. Dechert and K. Nishimura (1983), 'A Complete Characterization of Optimal Growth Paths in an Aggregated Model with a Non-Concave Production Function', *Journal of Economic Theory*, **31** (2), December, 332–54 45

B Stochastic Models

5. L. Mirman (1980), 'One Sector Economic Growth and Uncertainty: A Survey', *Stochastic Programming*, M.A.H. Dempster (ed.), New York: Academic Press, 537–67 71
6. L.G. Epstein (1983), 'Stationary Cardinal Utility and Optimal Growth under Uncertainty', *Journal of Economic Theory*, **31** (1), October, 133–52 102

PART II MODELS WITH TWO OR MORE SECTORS

A Deterministic Models

7. J. Benhabib and K. Nishimura (1979), 'The Hopf Bifurcation and the Existence and Stability of Closed Orbits in Multisector Models of Optimal Economic Growth', *Journal of Economic Theory*, **21** (3), December, 421–44 127
8. J. Benhabib and K. Nishimura (1981), 'Stability of Equilibrium in Dynamic Models of Capital Theory', *International Economic Review*, **22** (2), June, 275–93 151

9. L.W. McKenzie (1983), 'Turnpike Theory, Discounted Utility, and the von Neumann Facet', *Journal of Economic Theory*, **30** (2), August, 330–52 170
10. M. Boldrin and L. Montrucchio (1986), 'On the Indeterminacy of Capital Accumulation Paths', *Journal of Economic Theory*, **40** (1), October, 26–39 193

B Stochastic Models

- × 11. R. Radner (1973), 'Optimal Stationary Consumption with Stochastic Production and Resources', *Journal of Economic Theory*, **6** (1), February, 68–90 209
12. M. Majumdar and R. Radner (1983), 'Stationary Optimal Policies with Discounting in a Stochastic Activity Analysis Model', *Econometrica*, **51** (6), November, 1821–37 232

PART III SENSITIVITY, CAPITAL DEEPENING AND COMPARATIVE DYNAMICS

A Deterministic Models

13. W.A. Brock (1971), 'Sensitivity of Optimal Growth Paths with Respect to a Change in Target Stocks', in *Contributions to the von Neumann Growth Model*, G. Bruckmann and W. Weber (eds), Vienna: Springer-Verlag, 73–89 253
14. E. Burmeister and N. van Long (1977), 'On Some Unresolved Questions in Capital Theory: An Application of Samuelson's Correspondence Principle', *Quarterly Journal of Economics*, **41** (2), May, 289–314 270
15. R.A. Becker (1985), 'Comparative Dynamics in Aggregate Models of Optimal Capital Accumulation', *Quarterly Journal of Economics*, **50** (4), November, 1235–56 296

B Stochastic Models

- ✓ 16. J.-P. Danthine and J.B. Donaldson (1981), 'Stochastic Properties of Fast vs Slow Growing Economies', *Econometrica*, **49** (4), July, 1007–33. 321
17. M. Majumdar and I. Zilcha (1987), 'Optimal Growth in a Stochastic Environment: Some Sensitivity and Turnpike Results', *Journal of Economic Theory*, **43** (1), 116–33 348
18. P.K. Dutta (1987), 'Capital Deepening and Impatience Equivalence in Stochastic Aggregative Growth Models', *Journal of Economic Dynamics and Control*, **11** (4), December, 519–30 366

PART IV VON NEUMANN MODEL AND TURNPIKE THEORY

19. J. von Neumann (1945–46), ‘A Model of General Economic Equilibrium’, *Review of Economic Studies*, **13**, 1–9 381
 20. L.W. McKenzie (1967), ‘Maximal Paths in the von Neumann Model’, *Activity Analysis in the Theory of Growth and Planning*, E. Malinvaud and M. Bacharach (eds), London: Macmillan Press, 43–63 390
 21. J. Tsukui (1968), ‘Application of a Turnpike Theorem to Planning for Efficient Accumulation: An Example for Japan’, *Econometrica*, **36** (1), January, 172–86 411
- Name Index* 427
