

## TABLE OF CONTENTS

### PART 1 / INTRODUCTION

1. The Indivisibilist Controversy	3
Indivisibilists: 1.1. Henry of Harclay	4
1.2. Robert Grosseteste	5
1.3. Walter Chatton	7
1.4. William Crathorn	8
Divisibilists: 1.5. William of Ockham	10
1.6. John Duns Scotus	12
1.7. William of Alnwick	12
1.8. Walter Burley	13
2. Tractatus de indivisibilibus	13
2.1. The Author	13
2.2. The Contents	14
2.3. Date Written	15
2.4. Quaestio de divisione et compositione continui	16
2.5. The Date of the <i>Quaestio</i>	17
3. Editorial Principles	19
4. Notes to the Introduction	21

### PART II / TEXT AND TRANSLATION

Question 1: Whether forms or extended continua are composed of indivisibles	33
Article 1: Twelve arguments proving that continua are not composed of indivisibles	35
Article 2: Twelve arguments by Harclay and Chatton purporting to show that continua are composed of indivisibles	93
Article 3: Refutation of Harclay's and Chatton's arguments	103

Question 2: Whether among continua there is any indivisible extensive quantum, or among augmentable forms any intensive indivisible	123
Article 1: A proof that neither points nor lines nor surfaces exist	123
Article 2: Arguments purporting to show that there must be indivisibles in continua	139
Article 3: Replies to the arguments in article 2	143
Question 3: Doubts about whether a continuum is infinitely divisible or composed of indivisibles	165
Doubts based on Zeno's arguments	165
Doubt 1	165
Doubt 2	171
Doubt 3	175
Doubt 4	181
Doubt 5: Whether there are actually infinitely many parts in a continuum	183
Doubt 6: Whether there is a natural minimum or least indivisible part	191
Doubt 7: Whether a continuum can be divided into infinitely many parts of the same size	201
Arguments purporting to show that if it is composed of infinitely many such parts, then it is actually infinite	201
Proof that a continuum may be divided into infinitely many completely distinct parts	205
Reply to the first arguments	209
Question 4: Whether the infinite divisibility of a continuum can be reduced to actuality	213
Article 1: A continuum cannot be divided into its parts	213
Article 2: The parts of a continuum can be divided	225
Doubts	227
Question 5: Whether there are more parts of the same proportion in a larger continuum than in a smaller	237
Article 1: Proof that there are more parts of the same proportion in a larger continuum	239
Article 2: Objections against this proof	247
Article 3: Replies to the objections	261

## PART III / NOTES TO THE TEXT

Notes to Question 1	277
Notes to Question 2	294
Notes to Question 3	298
Notes to Question 4	300
Notes to Question 5	302

## PART IV / APPENDIX

William Crathorn, "De continuo"	309
Indices	321
