## Contents

	Preface to the Second Edition	xi
<b>1</b>	<b>Introduction</b>	<b>1</b>
	1.1 Pure Theory of Trade	1
	1.2 Distinguishing Features of International Trade Theory	1
	1.3 Positive and Normative Aspects	2
	1.4 Organization of the Volume	3
	1.5 Standardized Notation	3
<b>I</b>	<b>THEORIES OF INTERNATIONAL TRADE</b>	<b>7</b>
<b>2</b>	<b>Model and Analytic Relationships in Ricardian Theory</b>	<b>9</b>
	2.1 Ricardian Model	9
	2.2 Supply Relations	9
	2.3 Self-Sufficiency Equilibrium	14
	2.4 Trade Equilibrium and Offer Curves	15
	2.5 Trade-Indifference Curves	20
	2.6 Formal Notes on the Ricardian Model	25
<b>3</b>	<b>Ricardian Theory and the Pattern of Trade</b>	<b>29</b>
	3.1 Alternative Demand Assumptions	32
	3.2 Weaker Formulation of Ricardian Theorem	34
<b>4</b>	<b>Some Extensions of Ricardian Theory</b>	<b>35</b>
	4.1 Multiple Countries	35
	4.2 Multiple Goods	40
	4.3 Transportation Costs	42
	4.4 Tariffs	44
	4.5 Nontraded Goods	46
	4.6 Continuum-of-Goods Model	47
<b>5</b>	<b>Model and Analytic Relationships under the Heckscher-Ohlin Theory</b>	<b>53</b>
	5.1 Heckscher-Ohlin Model	53
	5.2 Supply Relations	54
	5.3 Competitive System	58
	5.4 Depiction of Free-Trade Equilibrium	72
<b>6</b>	<b>Pattern of Trade and the Heckscher-Ohlin Theory</b>	<b>79</b>
	6.1 Heckscher-Ohlin Theorem with Physical Definition of Factor Abundance	79
	6.2 Heckscher-Ohlin Theorem with Price Definition of Factor Abundance	82
	6.3 Factor-Price Equalization	84

<b>7</b>	<b>Specific-Factors Model</b>	91
	7.1 Specific-Factors Model: Basic Analysis	92
	7.2 Comparative Statics: A Change in Goods Prices	94
	7.3 Comparative Statics: A Change in Factor Endowments	96
	7.4 Interpreting the SF Model as the Short-Run Version of the $2 \times 2$ Model	98
	7.5 Source of Factor Specificity and the Choice of a Model	101
<b>8</b>	<b>Generalizations and Empirical Verification of the Heckscher-Ohlin Theory</b>	107
	8.1 Many Goods, Two Factors	108
	8.2 Two Goods, Many Factors	114
	8.3 Many Goods and Many Factors	114
	8.4 Empirical Verification of the Heckscher-Ohlin Theory	120
<b>9</b>	<b>Dual Approach: Basic Tools</b>	131
	9.1 Envelope Theorem and Envelope Function	131
	9.2 Unit-Cost Function	133
	9.3 Revenue Function	136
	9.4 Expenditure Function	137
	9.5 Equilibrium	138
	9.6 Trade Elasticities and Stability in a Two-Good Model	140
<b>10</b>	<b>Mathematical Analysis of the <math>2 \times 2</math> and <math>2 \times 3</math> Models</b>	143
	10.1 The $2 \times 2$ Model	143
	10.2 The $2 \times 3$ Specific-Factors Model	154
	10.3 Dynamic Adjustment with Adjustment Costs	158
<b>11</b>	<b>Economies of Scale</b>	163
	11.1 Models of Perfect Competition	163
	11.2 Models of Monopolistic Competition	178
<b>II</b>	<b>TRADE INTERVENTIONS AND TRANSFERS</b>	201
<b>12</b>	<b>Tariffs and Trade Equilibrium</b>	203
	12.1 Free-Trade Version of the Classical Model	203
	12.2 Effect of a Tariff on External and Domestic Terms of Trade	204
	12.3 Geometry of Tariffs	206
	12.4 Metzler Paradox	212
	12.5 Some Extensions: Metzler Production Paradox	214
	12.6 Lerner Symmetry Theorem	215

<b>13</b>	<b>Tariffs versus Quotas</b>	221
	13.1 Equivalence Argument	221
	13.2 Breakdown of Equivalence	223
	13.3 An Alternative Question	225
	13.4 Applications of Analysis to Other Forms of Tariffs and Quotas	226
<b>14</b>	<b>Other Commercial Policy Instruments</b>	229
	14.1 Voluntary Export Restraints	229
	14.2 Voluntary Import Expansions	233
	14.3 Antidumping Actions	235
<b>15</b>	<b>Effective Rate of Protection</b>	239
	15.1 Two Definitions	240
	15.2 Predictive Power of ERP Indexes	242
<b>16</b>	<b>Transfer Problem</b>	247
	16.1 Direct Solution	247
	16.2 Two-Stage Derivation	248
	16.3 Welfare Impact	250
	16.4 Immiserizing Transfers: Other Models	251
	16.5 Transfer Criteria in Other Models	252
<b>III</b>	<b>TRADE AND WELFARE IN AN OPEN ECONOMY</b>	255
<b>17</b>	<b>Principal Issues and Policy Instruments</b>	257
	17.1 Major Concepts and Distinctions	257
	17.2 Alternative Policy Instruments and Hierarchy of Policies	258
<b>18</b>	<b>Gains from Trade</b>	265
	18.1 Basic Theorem without Prices	265
	18.2 Basic Theorem with Prices	268
	18.3 Optimality of Free-Trade Policy for a Small Country	271
	18.4 Optimality of Free Trade from World Viewpoint	273
	18.5 Superiority of Trade over Autarky, without Lump-Sum Transfers	274
	18.6 Illustrating the Dixit-Norman Argument	276
<b>19</b>	<b>Measuring Gains from Trade</b>	281
	19.1 Gains from Free Trade	281
	19.2 Decomposing Gains from Trade	281
	19.3 Factor Immobility	282
	19.4 Other Considerations	284

<b>20</b>	<b>Distortions: Departures from Free-Trade Optimality</b>	285
<b>21</b>	<b>Monopoly Power in Trade</b>	289
	21.1 Optimal Policy Intervention	289
	21.2 Tariff Level	289
	21.3 Can the Optimal Tariff Be Negative?	292
	21.4 Optimal Tariff Structure with Several Traded Goods	293
	21.5 Retaliation or Extortion	293
	21.6 Ranking Alternative Policies	296
<b>22</b>	<b>Production Externalities</b>	301
<b>23</b>	<b>Monopoly in Production</b>	309
	23.1 Nontangency	309
	23.2 Welfare Analysis	309
	23.3 Gains from Trade	309
<b>24</b>	<b>Monopsony</b>	313
	24.1 Positive Analysis of Monopsony Distortion	313
	24.2 Welfare Implications	319
<b>25</b>	<b>Wage Differentials</b>	323
	25.1 Nature of the Distortion	323
	25.2 Analysis	324
<b>26</b>	<b>Generalized Sticky Wages</b>	331
	26.1 One-Good Model with Sticky Wage	331
	26.2 Two-Good Model with Factor Immobility	331
	26.3 Generalized Sticky Wage with Full Factor Mobility in $2 \times 2$ Model	333
<b>27</b>	<b>Sector-Specific Sticky Wages</b>	343
	27.1 Harris-Todaro Model	343
	27.2 Policy Implications	345
	27.3 Other Extensions	348
<b>28</b>	<b>Noneconomic Objectives</b>	351
	28.1 Different Objectives	351
	28.2 Formal Mathematics of the Problem	359
	28.3 Turning Noneconomic Objectives into Economic Objectives	364
<b>29</b>	<b>Immiserizing Growth</b>	369
	29.1 Original Case	369
	29.2 Immiserizing Growth for a Small Country with a Tariff	370

29.3	Generalized Theory	371
29.4	Two Caveats	373
29.5	Diverse Applications of Immiserizing-Growth Theory	373
29.6	Algebra of the Bhagwati and the Johnson Cases	375
<b>30</b>	<b>Imperfect Competition and Trade Policy</b>	<b>381</b>
30.1	Oligopoly: Competition in the Third-Country Market	381
30.2	Oligopoly in Two-Country Models	401
30.3	Monopolitic Competition	416
<b>31</b>	<b>Uniform versus Preferential Tariff Reduction</b>	<b>421</b>
31.1	Uniform Reduction	421
31.2	Preferential Reduction	427
31.3	Recent Static Analyses	439
31.4	Recent "Dynamic Time-Path" Analyses	444
<b>32</b>	<b>International Capital Flows</b>	<b>455</b>
32.1	Goods-Price Equalization: Turning Factor-Price Equalization on its Head	455
32.2	Diversification with Different Technologies	456
32.3	Welfare Analysis: Inflows without Optimal Policy Intervention	457
32.4	Welfare Analysis: Optimal and Second-Best Interventions	462
32.5	Other Welfare-Theoretic Questions	463
<b>33</b>	<b>International Migration</b>	<b>467</b>
33.1	Asymmetries	467
33.2	Choice between International Labor and Capital Mobility	469
33.3	Response to Import Competition	470
<b>IV</b>	<b>RECENT THEORETICAL DEVELOPMENTS</b>	<b>473</b>
<b>34</b>	<b>Directly Unproductive Profit-Seeking (DUP) Activities</b>	<b>475</b>
34.1	Tariff Evasion	476
34.2	Revenue Seeking	481
34.3	Tariff Seeking	485
34.4	General Theory of DUP Activities	486
34.5	Price versus Quantity Distortions	492
<b>35</b>	<b>Trade Reform</b>	<b>497</b>
35.1	Normative Analysis	497
35.2	Positive Analysis	513

<b>36</b>	<b>Growth and Welfare</b>	517
	36.1 Distortionary Situations	517
	36.2 Optimal Policies Everywhere: Absence of Deadweight Loss under Free Trade	519
	36.3 Steady States, Trade, and Welfare	520
<b>37</b>	<b>Endogenous Growth, Innovation, and Trade</b>	527
	37.1 Endogenous Growth and Trade	528
	37.2 Innovation-Based Growth and Technology Diffusion among Countries	533
<b>38</b>	<b>Shadow Prices for Project Selection in Open Economies</b>	541
	38.1 “World-Price”–Valuation Rule	541
	38.2 Derivation of World-Price–Valuation Shadow Prices with Given Distortion	543
	38.3 Negative Shadow Prices	545
	38.4 Other Issues and Extensions	546
<b>39</b>	<b>Uncertainty</b>	549
	39.1 Ricardian Model for Complete Set of Markets	551
	39.2 Ricardian Model for Securities and Spot Markets	552
	39.3 Ricardian Model for Equivalence of World Market with Securities Market and with Complete Set of Markets	554
	39.4 Models with an Incomplete Set of Markets	556
	<b>Appendixes</b>	563
	A Alternative Elasticity Formulas	565
	B Basic Results of the $2 \times 2$ Neoclassical Model of Trade Theory	569
	C Classical Comparative-Statics Model and Analytical Relationships	583
	Index	595
