

# Contents

<b>1</b>	<b>Introduction</b> .....	1
<b>2</b>	<b>Notations and Preliminaries</b> .....	7
2.1	Spaces of Functions .....	7
2.2	Divided Differences .....	10
2.3	Linear Operators .....	11
2.4	Schatten-von Neumann Classes .....	12
2.5	Product of Spectral Measures .....	15
2.6	Classical Noncommutative $L^p$ -Spaces and Weak $L^p$ -Spaces .....	18
2.7	The Haagerup $L^p$ -Space .....	22
2.8	Symmetrically Normed Ideals .....	24
2.9	Traces on $L^{1,\infty}(\mathcal{M}, \tau)$ .....	26
2.10	Banach Spaces and Spectral Operators .....	29
2.11	Differentiability of Maps on Banach Spaces .....	32
<b>3</b>	<b>Double Operator Integrals</b> .....	35
3.1	Double Operator Integrals on Finite Matrices .....	35
3.1.1	Definition .....	36
3.1.2	Relation to Finite-Dimensional Schur Multipliers .....	36
3.1.3	Properties of Finite Dimensional Double Operator Integrals .....	37
3.2	Double Operator Integrals on $\mathcal{S}^2$ .....	41
3.2.1	Definition .....	41
3.2.2	Relation to Schur Multipliers on $\mathcal{S}^2$ .....	43
3.2.3	Basic Properties of Double Operator Integrals on $\mathcal{S}^2$ .....	44
3.3	Double Operator Integrals on Schatten Classes and $\mathcal{B}(\mathcal{H})$ .....	45
3.3.1	Daletskii-Krein's Approach .....	45
3.3.2	Extension from the Double Operator Integral on $\mathcal{S}^2$ .....	46
3.3.3	Approach via Separation of Variables .....	47
3.3.4	Approach Without Separation of Variables .....	50
3.3.5	Properties of Double Operator Integrals on $\mathcal{S}^p$ and $\mathcal{B}(\mathcal{H})$ .....	51

3.3.6	Symbols of Bounded Double Operator Integrals .....	54
3.3.7	Transference Principle .....	58
3.4	Nonself-adjoint Case .....	60
3.5	Double Operator Integrals on Noncommutative $L^p$ -Spaces.....	60
3.5.1	Extension from the Double Operator Integral on $L^2(\mathcal{M}, \tau)$ .....	61
3.5.2	Approach via Separation of Variables .....	61
3.5.3	Approach Without Separation of Variables .....	61
3.5.4	Properties of Double Operator Integrals on $L^p(\mathcal{M}, \tau)$ .....	62
3.6	Double Operator Integrals on Banach Spaces .....	63
<b>4</b>	<b>Multiple Operator Integrals</b> .....	<b>65</b>
4.1	Multiple Operator Integrals on Finite Matrices .....	65
4.1.1	Definition .....	65
4.1.2	Relation to Multilinear Schur Multipliers .....	66
4.1.3	Properties of Finite Dimensional Multiple Operator Integrals .....	67
4.1.4	Estimates of Multiple Operator Integrals via Double Operator Integrals .....	74
4.2	Multiple Operator Integrals on $\mathcal{S}^2$ .....	74
4.2.1	Pavlov's Approach .....	74
4.2.2	Coine-Le Merdy-Sukochev's Approach .....	75
4.3	Multiple Operator Integrals on Schatten Classes and $\mathcal{B}(\mathcal{H})$ .....	77
4.3.1	Approach via Separation of Variables .....	77
4.3.2	Approach Without Separation of Variables .....	79
4.3.3	Properties of Multiple Operator Integrals on $\mathcal{S}^p$ and $\mathcal{B}(\mathcal{H})$ .....	81
4.3.4	Nonself-adjoint Case .....	93
4.3.5	Change of Variables .....	99
4.4	Multiple Operator Integrals on Noncommutative and Weak $L^p$ -Spaces .....	100
4.4.1	Approach via Separation of Variables .....	100
4.4.2	Approach Without Separation of Variables .....	100
4.4.3	Properties of Multiple Operator Integrals on $L^{p,\infty}(\mathcal{M}, \tau)$ .....	101
<b>5</b>	<b>Applications</b> .....	<b>113</b>
5.1	Operator Lipschitz Functions .....	113
5.1.1	Commutator and Lipschitz Estimates in $\mathcal{S}^2$ .....	114
5.1.2	Commutator and Lipschitz Estimates in $\mathcal{S}^p$ and $\mathcal{B}(\mathcal{H})$ .....	115
5.1.3	Commutator and Lipschitz Estimates: Nonself-adjoint Case .....	119
5.1.4	Lipschitz Type Estimates in Noncommutative $L^p$ -Spaces .....	121
5.1.5	Lipschitz Type Estimates in Banach Spaces .....	122
5.1.6	Operator $\mathcal{I}$ -Lipschitz Functions .....	123

5.2	Operator Hölder Functions .....	128
5.3	Differentiation of Operator Functions .....	129
5.3.1	Differentiation of Matrix Functions .....	129
5.3.2	Differentiation in $\mathcal{B}(\mathcal{H})$ Along Multiplicative Paths of Unitaries .....	132
5.3.3	Differentiation in $\mathcal{B}(\mathcal{H})$ and $\mathcal{S}^1$ Along Linear Paths of Self-adjoints .....	135
5.3.4	Differentiation in $\mathcal{S}^p$ Along Linear Paths of Self-adjoints .....	137
5.3.5	Differentiation of Functions of Contractive and Dissipative Operators .....	140
5.3.6	Differentiation in Noncommutative $L^p$ -Spaces .....	141
5.3.7	Gâteaux and Fréchet $\mathcal{I}$ -Differentiable Functions .....	142
5.4	Taylor Approximation of Operator Functions .....	145
5.4.1	Taylor Remainders of Matrix Functions .....	145
5.4.2	Taylor Remainders for Perturbations in $\mathcal{S}^p$ and $\mathcal{B}(\mathcal{H})$ .....	149
5.4.3	Taylor Remainders for Unsummable Perturbations .....	153
5.5	Spectral Shift .....	154
5.5.1	Spectral Shift Function for Self-adjoint Operators .....	155
5.5.2	Spectral Shift Function for Nonself-adjoint Operators .....	162
5.5.3	Spectral Shift Measure in the Setting of von Neumann Algebras .....	165
5.6	Spectral Flow .....	166
5.7	Quantum Differentiability .....	170
5.8	Differentiation of Noncommutative $L^p$ -Norms .....	172
	<b>References</b> .....	179
	<b>Index</b> .....	189
