- 1 Introduction — 1**
  - 1.1 Aim of the study — 1
  - 1.2 Treatment of the examples — 5
  - 1.3 Outline — 6
  
- 2 Phonological typology — 9**
  - 2.1 Traditional typology — 9
    - 2.1.1 Syllable structure — 10
    - 2.1.2 Phoneme inventories — 12
  - 2.2 Rhythm-based classifications — 16
    - 2.2.1 The isochrony hypothesis — 16
    - 2.2.2 The rhythm class hypothesis — 19
  
- 3 Typology of syllable and word languages — 26**
  - 3.1 Theoretical framework — 27
  - 3.2 The syllable and the phonological word — 32
    - 3.2.1 The syllable — 34
    - 3.2.2 The phonological word — 39
  - 3.3 Research areas — 42
    - 3.3.1 Language typology — 43
    - 3.3.2 Historical linguistics — 43
    - 3.3.3 Language variation — 44
  
- 4 Typological parameters — 46**
  - 4.1 Review of the typological parameters — 46
    - 4.1.1 Geminates — 48
    - 4.1.2 Vowel harmony — 51
  - 4.2 Evaluating the prosodic domains — 52
  - 4.3 Syllable structure — 55
    - 4.3.1 Classification of syllable complexity — 55
    - 4.3.2 Emergence of syllable complexity — 57
    - 4.3.3 Research on syllable structure — 59
  - 4.4 Phonotactic restrictions — 60

4.4.1	Stress-related restrictions — 61
4.4.2	Position-related restrictions — 61
4.5	Syllable- and word-related processes — 64
4.6	Syllable-optimizing processes — 66
4.6.1	Consonant deletion — 66
4.6.2	Vowel deletion — 67
4.6.3	Consonant epenthesis — 68
4.6.4	Vowel epenthesis — 70
4.7	Word-optimizing processes — 72
4.7.1	Unstressed vowel reduction — 72
4.7.1.1	Neutralization of height and length contrasts — 74
4.7.1.2	Neutralization of nasalization — 77
4.7.1.3	Neutralization of roundness — 77
4.7.1.4	Discussion — 79
4.7.2	Vowel lengthening and diphthongization — 81
4.7.3	Consonant deletion — 83
4.7.4	Vowel deletion — 84
4.7.5	Consonant epenthesis — 87
4.7.6	Vowel epenthesis — 89
4.7.7	Consonant cluster simplification — 90
4.8	Syllabification and resyllabification — 91
