# Table of Contents

<b>Preface.....</b>	<b>ix</b>
<b>1. Introducing the Service Mesh.....</b>	<b>1</b>
What Is a Service Mesh?	1
Fundamentals	1
Sailing into a Service Mesh	2
Client Libraries: The First Service Meshes?	3
Why Do You Need One?	5
Don't We Already Have This in Our Container Platforms?	6
Landscape and Ecosystem	7
Landscape	7
Ecosystem	7
The Critical, Fallible Network	8
The Value of a Service Mesh	8
The Istio Service Mesh	11
The Origin of Istio	11
The Current State of Istio	12
Cadence	13
Releases	14
Feature Status	15
Future	15
What Istio Isn't	15
It's Not Just About Microservices	16
Terminology	16
<b>2. Cloud Native Approach to Uniform Observability.....</b>	<b>21</b>
What Does It Mean to Be Cloud Native?	21
The Path to Cloud Native	22

Packaging and Deployment	24
Application Architecture	24
Development and Operations Processes	24
Cloud Native Infrastructure	25
What Is Observability?	25
Pillars of Telemetry	27
Logs	27
Metrics	27
Traces	28
Combining Telemetry Pillars	29
Why Is Observability Key in Distributed Systems?	30
Uniform Observability with a Service Mesh	32
Client Libraries	32
Interfacing with Monitoring Systems	33
<b>3. Istio at a Glance.....</b>	<b>35</b>
Service Mesh Architecture	35
Planes	36
Istio Control-Plane Components	37
Service Proxy	39
Istio Data-Plane Components	40
Gateways	42
Extensibility	44
Customizable Sidecars	45
Extensible Adapters	46
Scale and Performance	47
Deployment Models	48
<b>4. Deploying Istio.....</b>	<b>49</b>
Preparing Your Environment for Istio	49
Docker Desktop as the Installation Environment	49
Configuring Docker Desktop	50
Installing Istio	54
Istio Installation Options	56
Registering Istio's Custom Resources	57
Installing Istio Control-Plane Components	59
Deploying the Bookinfo Sample Application	62
Deploying the Sample App with Automatic Sidecar Injection	64
Networking with the Sample App	65
Uninstalling Istio	67
Helm-Based Installations	67
Install Helm	67

Install with Helm Template	68
Confirming a Helm-Based Installation	69
Uninstalling a Helm-Based Installation	69
Other Environments	69
<b>5. Service Proxy.....</b>	<b>71</b>
What Is a Service Proxy?	72
An iptables Primer	73
Envoy Proxy Overview	74
Why Envoy?	75
Envoy in Istio	76
Sidecar Injection	77
Manual Sidecar Injection	77
Ad Hoc Sidecarring	79
Automatic Sidecar Injection	80
Kubernetes Init Containers	82
Sidecar Resourcing	83
Envoy's Functionality	83
Core Constructs	84
Certificates and Protecting Traffic	85
<b>6. Security and Identity.....</b>	<b>89</b>
Access Control	90
Authentication	90
Authorization	90
Identity	91
SPIFFE	91
Key Management Architecture	93
Citadel	94
Node Agents	96
Envoy	97
Pilot	97
mTLS	98
Configuring Istio Auth Policies	98
Authentication Policy: Configuring mTLS	98
Authorization Policy: Configuring Who Can Talk to Whom	102
<b>7. Pilot.....</b>	<b>105</b>
Configuring Pilot	105
Mesh Configuration	106
Networking Configuration	108
Service Discovery	108

Configuration Serving	109
Debugging and Troubleshooting Pilot	111
istioctl	111
Troubleshooting Pilot	112
Tracing Configuration	114
Listeners	114
Routes	117
Clusters	120
<b>8. Traffic Management.....</b>	<b>123</b>
Understanding How Traffic Flows in Istio	123
Understanding Istio's Networking APIs	124
ServiceEntry	125
DestinationRule	128
VirtualService	131
Gateway	136
Traffic Steering and Routing	144
Resiliency	150
Load-Balancing Strategy	150
Outlier Detection	151
Retries	152
Timeouts	153
Fault Injection	154
Ingress and Egress	155
Ingress	155
Egress	156
<b>9. Mixer and Policies in the Mesh.....</b>	<b>159</b>
Architecture	159
Enforcing Policy	161
Understanding How Mixer Policies Work	163
Reporting Telemetry	163
Attributes	165
Sending Reports	165
Checking Caches	166
Adapters	166
In-Process Adapters	167
Out-of-Process Adapters	167
Creating a Mixer Policy and Using Adapters	167
Mixer Configuration	168
Open Policy Agent Adapter	169
Prometheus Adapter	170

<b>10. Telemetry.....</b>	<b>175</b>
Adapter Models	175
Reporting Telemetry	176
Metrics	176
Configuring Mixer to Collect Metrics	176
Setting Up Metrics Collection and Querying for Metrics	177
Traces	179
Disabling Tracing	180
Logs	181
Metrics	184
Visualization	184
<b>11. Debugging Istio.....</b>	<b>187</b>
Introspecting Istio Components	187
Troubleshooting with a Management Plane	189
Parlaying with kubectrl	189
Workload Preparedness	191
Application Configuration	191
Network Traffic and Ports	191
Services and Deployments	192
Pods	193
Istio Installation, Upgrade, and Uninstall	194
Installation	194
Upgrade	194
Uninstallation	195
Troubleshooting Mixer	195
Troubleshooting Pilot	196
Debugging Galley	197
Debugging Envoy	198
Envoy's Administrative Console	198
503 or 404 Requests	199
Sidecar Injection	199
Version Compatibility	201
<b>12. Real-World Considerations for Application Deployment.....</b>	<b>203</b>
Control-Plane Considerations	204
Galley	204
Pilot	206
Mixer	208
Citadel	211
Case Study: Canary Deployment	212
Cross-Cluster Deployments	218

<b>13. Advanced Scenarios.....</b>	<b>221</b>
Types of Advanced Topologies	221
Single-Cluster Meshes	221
Multiple-Cluster Meshes	222
Use Cases	225
Choosing a Topology	226
Cross-Cluster or Multicluster?	227
Configuring Cross-Cluster	230
Configure DNS and Deploy Bookinfo	231
<b>Index.....</b>	<b>239</b>
