Preface	vii
Notation and Conventions	xi
Chapter I. Groups with commutator relations	1
§1. Nilpotent sets of roots	2
§2. Reflection systems and root systems	9
§3. Groups with commutator relations	22
§4. Categories of groups with commutator relations	34
§5. Weyl elements	52
Chapter II. Groups associated with Jordan pairs	73
§6. Introduction to Jordan pairs	74
§7. The projective elementary group I	96
§8. The projective elementary group II	112
§9. Groups over Jordan pairs	123
Chapter III. Steinberg groups for Peirce graded Jordan pairs	139
§10. Peirce gradings	139
§11. Groups defined by Peirce gradings	152
§12. Weyl elements for idempotent Peirce gradings	160
§13. Groups defined by sets of idempotents	168
Chapter IV. Jordan graphs	184
§14. 3-graded root systems	185
§15. Jordan graphs and 3-graded root systems	204
§16. Local structure	220
§17. Classification of arrows and vertices	232
§18. Bases	245
§19. Triangles	254
Chapter V. Steinberg groups for root graded Jordan pairs	265
§20. Root gradings	266
§21. Groups defined by root gradings	272
§22. The Steinberg group of a root graded Jordan pair	291
§23. Cogs	305
§24. Weyl elements for idempotent root gradings	326
§25. The monomial group	345
§26. Centrality results	357

Chapter VI. Central closedness	363
§27. Statement of the main result and outline of the proof	364
§28. Invariant alternating maps	372
§29. Vanishing of the binary symbols	384
§30. Vanishing of the ternary symbols	398
§31. Definition of the partial sections	415
§32. Proof of the relations	427
Bibliography	443
Subject Index	449
Notation Index	453
