<b>Preface</b>	xi
<b>Acknowledgements</b>	xv
<b>Thoughts on the subject</b>	xvii
<b>CHAPTER 1</b>	1
<b>A General Introduction</b> <i>What is a Data Warehouse?—Why Build a Data Warehouse?—The Development of Decision Support Systems—The Need for Integrated Data—Knowing your Customer—The Strategic Nature of Information—Mining Data: Harvesting Knowledge.</i>	
<b>CHAPTER 2</b>	13
<b>Information Enterprises: the Early Innovators</b> <i>Competition as a Motor for the Data Warehouse—The Telecommunications Industry—The Retailing Industry—The Banking and Insurance Industries—Using Corporate Data in Marketing Alliances—The Integrated Customer Profile.</i>	
<b>CHAPTER 3</b>	21
<b>The Case for Utilising Corporate Data: the Basis for Strategy</b> <i>Strategic and Operational Decision Making—The Orientation of Decision Making—The Impact of Cognitive Psychology—Decision Theory—Sources of Internal Corporate Data—Sources of External Data—Corporate Planning Models—Analysis Techniques.</i>	
<b>CHAPTER 4</b>	41
<b>The History of Decision Support Systems: a Record of Failure</b> <i>The Failure of Online Transaction Systems to Provide a Decision Support Capability—History of Database Development—The Obstacles to Integrated Data—Semantic and Syntactic Meaning in Data—Decentralised Processing—Executive Information Systems—Expert Systems—Query Tools—Structured Query Language—An Overview of the Development of Decision Support Systems.</i>	

## CHAPTER 5

### **Defining the Business Requirements: Building an ‘Enterprise Model’**

61

*What is an Enterprise Model?—Why Build an Enterprise Model?—Linking Business Processes and Key Information Needs—Enterprise Integration—Defining Data Warehouse Applications—Using Focusing Sessions—Managing Conflict—An Overview of Enterprise Modelling Techniques.*

## CHAPTER 6

### **Mass Customisation of Products and Services—the Future Trend**

81

*From Mass Production to Mass Customisation—Mechanisms for Segmenting Markets—Personalisation versus Customisation—Integrating Customer Service—Seeing a Single Customer, Not Many Accounts.*

## CHAPTER 7

### **Aligning the Data Warehouse with Organisational Culture—a Key Concern**

91

*Mapping Decision Support Applications on to Organisational Structure—The Influence of Organisational Culture—The Relationship of the Data Warehouse to Business Process Redesign—Control Orientation—Market Orientation.*

## CHAPTER 8

### **Managing a Pan-corporate Project—a Planning and Sponsorship Model**

103

*Planning the Data Warehouse Project—Phasing the Data Warehouse Project—A Data-Driven Approach—An Application-Driven Approach—An Identification of Problems and Issues—The Overall Corporate Sponsor—The Functional Subject Area Sponsor—The Application Sponsor—The Software Engineering Project Team—Managing Expectations—Critical Success Factors—Barriers to Implementation.*

## CHAPTER 9

### **Justifying a Corporate Data Warehouse—the Business Case**

119

*Information as a Product—The Data Warehouse Marketplace—Tangible and Intangible Benefits—Investment Appraisal Options—Phasing the Deployments of the Data Warehouse—The Maturity of the Corporate Information Systems—Data as a Corporate Asset—Relating Applications to Business Goals—Competitive Positioning.*

## CHAPTER 10

### **Building the Corporate Data Warehouse—an Architectural Model**

131

*The ‘Simple’ Solution—The ‘Point Solution’—The ‘Perfect Solution’—Data Conditioning—Data Validation—Data Mapping—Data Refresh—Data Update—Data Propagation—Data Transformation—Data Enrichment—Data Integrity—Data Reformating—Data Loading—Data Purging—Data Partitioning—Database Design—Building Applications—Data Granularity—The Presentation Interface.*

## CHAPTER 11

### **Choosing the Right Platform—the Technology Options**

153

*Hardware Platform Options—Extraction Tools—The Database Engine—Benchmark Testing the Solution—Mass Access Data Warehouse Environment—Strategic Data Warehouse Environment—Simple Queries and Complex Queries—The Mix of Queries.*

<b>CHAPTER 12</b>	175
<b>The Future—Threats and Opportunities</b>	
<i>Data Protection Regulation—Neural Networks—Disk Storage Technology—Parallel Processing Technology—Use of Integrated Data Warehouse Schema—Organisational Culture—Causes of Failure—Reorganising the Technology Architecture—The Intellectual Deficit.</i>	
<b>Reference</b>	195
<b>Index</b>	197
