Part I Novel Insights About Accelerated Motion: The Challenge of Swinging and Rolling		
2	Before Natural Acceleration	25
2.1	Velocity, Motion as a Changing Quality, and Galileo's Early Account of Acceleration	28
2.2	Motion Along Inclined Planes and Dynamics	42
	References	57
3	A Glimpse at a Challenging Research Agenda: Galileo to Guidobaldo del Monte in 1602	61
	References	72
4	Sparking the Investigation of Naturally Accelerated Motion: The Pendulum Plane Experiment	75
4.1	Experimenting with Swinging and Rolling	77
4.2	The Experiment in Context	82
4.3	The Single Chord Hypothesis as Starting Point	86
4.4	Summarizing Conclusion	93
	References	94
5	Squaring the Pendulum's Arc: Motion Along Broken Chords	97
5.1	Toward a Proof of the Law of the Broken Chord	99
5.2	Expanding on the Law of the Broken Chord	116
5.3	Tackling the Problem of Motion on an Arc: The Broken Chord Approach	120
5.4	Summarizing Conclusion	140
	References	143

6	Swinging and Rolling Revisited: Motion Along Broken Chords and the Pendulum Plane Experiment	145
6.1	Reevaluating the Experimental Data Under a New Conceptualization	147
6.2	The Pendulum Plane Experiment from a Modern Perspective ...	152
6.3	Swinging and Rolling: From Promising Start to Dead End.....	159
	References.....	167
7	Accumulating Insights: The Problem of Motion Along Broken Chords Driving Conceptual Development	169
7.1	A New Technique for the Diagrammatical Representation of Motion	170
7.2	The Length Time Proportionality as a Spin-Off.....	182
7.3	Bent Planes Traversed in Least Time	188
7.4	Galileo's Considerations on Motion Along Bent Planes as the Source of New Propositions	196
7.5	Summarizing Conclusion.....	204
	References.....	207
8	Toward a Foundation: The Ex Mechanicis Proof of the Law of Chords	209
8.1	The Formation of the Ex Mechanicis Proof of the Law of Chords	211
8.2	The Role of the Ex Mechanicis Proof for the New Science of Motion	227
8.3	The Origin of the Law of Chords as a Heuristic Assumption.....	233
8.4	Summarizing Conclusion.....	237
	References.....	239
9	Whatever Happened to Swinging and Rolling: Faint Echoes and a Late Insight	241
9.1	The Brachistochrone Argument	243
9.2	A Reply to Baliani Drafted ca. 1638: An Unexpected Twist of Swinging and Rolling	252
9.3	Summarizing Conclusion.....	265
	References.....	267

Part II Novel Insights and Old Concepts: From Exploration to Formalization

10	Toward a New Science: Gathering Results and the Rise and Demise of a Dynamical Foundation	271
10.1	The Star Group Folios: A First Step Toward a New Science	273
10.2	The Rise and Demise of a Dynamical Foundation	307
10.3	Summarizing Conclusion.....	314
	References.....	316

11	Toward a New Science: Axiomatization and a New Foundation	317
11.1	1602: Immersed in Foundational Problems	319
11.2	The 1602 Foundational Situation in Context	337
11.3	Toward a New Foundation in 1604.....	349
11.4	Summarizing Conclusion	354
	References.....	357
12	Conclusion: The Emergence and Early Evolution of Galileo's New Science of Motion	359
13	Appendix: Folio Pages	369
13.1	Folio 90.....	370
13.2	Folio 115	372
13.3	Folio 121	374
13.4	Folio 129	376
13.5	Folio 130	379
13.6	Folio 148	386
13.7	Double Folio 149, 150	392
13.8	Folio 151	396
13.9	Folio 153	400
13.10	Folio 154	402
13.11	Folio 155	405
13.12	Double Folio 156, 157	408
13.13	Folio 166	413
13.14	Folio 167	420
13.15	Folio 176	423
13.16	Folio 183	427
13.17	Folio 184	429
13.18	Folio 185	435
13.19	Folio 186	439
13.20	Folio 189	442
13.21	Folio 192	454
	References.....	457
14	Appendix: Documents	459
14.1	Letter from Paolo Sarpi to Galileo, 2 September 1602.....	459
14.2	Letter from Galileo to Guidobaldo del Monte, 29 November 1602	461
14.3	Letter to Paolo Sarpi, 16 October 1604	465
14.4	Draft of a Reply to Baliani Composed ca. 1640.....	467
	References.....	470
