Chapter 30					
The Causal	Effect	of	Education	on	Earnings

VID CARD			1801
Abstract			1802
JEL codes			1802
1		oduction and overview	1802
2		human capital earnings function	1803
	2.1	Functional form	1804
	2.2	Measurement of education	1806
	2.3	Which measure of earnings?	1808
	2.4	Summary	1809
3	Causal modelling of the return to education		1810
	3.1	Theoretical issues	1810
	3.2	Observed schooling and earnings outcomes	1813
	3.3	Measurement error	1815
	3.4	Instrumental variables estimates of the return to schooling	1817
	3.5	Limitations of instrumental variables	1819
	3.6	Family background	1822
	3.7	Models for siblings and twins	1826
	3.8	Summary	1831
4	A selective review of recent empirical studies		1834
	4.1	Instrumental variables based on institutional features of the school system	1834
	4.2	Estimators using family background as a control or instrument	1842
	4.3	Studies of education and earnings using twins	1846
	4.4	Direct evidence on the heterogeneity in returns to education	1852
5	Cor	nclusions	1855
Ap	openc	lix A	1856
	A.1	OLS estimation of a random coefficients model	1856
	A.2	Estimation of a random coefficients model	1857
	A.3	Measurement error in a bivariate regression model	1858

The Economics and Econometrics of Active Labor Market Programs		
JAMES J. HECKMAN, ROBERT J. LALONDE and JEFFREY A. SMITH		
Abstracts		
JEL codes		
1 Introduction	1867	
2 Public job training and active labor market policies	1871	
The evaluation problem and the parameters of interest in evaluating		
social programs	1877	
3.1 The evaluation problem	1877	
3.2 The counterfactuals of interest	1879	
3.3 The counterfactuals most commonly estimated in the literature	1882	
3.4 Is treatment on the treated an interesting economic parameter?	1886	

Content	 4 Prototypical solutions to the evaluation problem 4.1 The before-after estimator 4.2 The difference-in-differences estimator 4.3 The cross-section estimator 			
4	Prototypical solutions to the evaluation problem	1891		
		1891		
		1894		
	4.3 The cross-section estimator	1896		
5	Social experiments	1899		
	5.1 How social experiments solve the evaluation problem	1899		
	5.2 Intention to treat and substitution bias	1903		
	5.3 Social experiments in practice	1905		
6	Econometric models of outcomes and program participation	1914		
	6.1 Uses of economic models	1914		
	6.2 Prototypical models of earnings and program participation	1914		
	6.3 Expected present value of earnings maximization	1915		
	6.4 The role of program eligibility rules in determining participation	1932		
	6.5 Administrative discretion and the efficiency and equity of training provision	1933		
	6.6 The conflict between the economic approach to program evaluation and the modern			
	approach to social experiments	1935		
7	Non-experimental evaluations	1936		
	7.1 The problem of causal inference in non-experimental evaluations	1936		
	7.2 Constructing a comparison group	1938		
	7.3 Econometric evaluation estimators	1941		
	7.4 Identification assumptions for cross-section estimators	1950		
	7.5 Using aggregate time series data on cohorts of participants to evaluate programs	1972		
	7.6 Panel data estimators	1973		
	7.7 Robustness to biased sampling plans	1985		
	7.8 Bounding and sensitivity analysis	1989		
8	Econometric practice	1992		
	8.1 Data sources	1993		
	8.2 Characterizing selection bias	1998		
	8.3 A simulation study of the sensitivity of non-experimental methods	2007		
	8.4 Specification testing and the fallacy of alignment	2025		
9	Indirect effects, displacement and general equilibrium treatment effects	2033		
	9.1 Review of the traditional approaches to displacement and substitution	2035		
	9.2 General equilibrium approaches	2036		
	9.3 Summary of general equilibrium approaches	2043		
1	0 A survey of empirical findings	2043		
	10.1 The objectives of program evaluations	2043		
	10.2 The impact of government programs on labor market outcomes	2050		
	10.3 The findings from US social experiments	2054		
	10.4 The findings from non-experimental evaluations of US programs	2064		
1	10.5 The findings from European evaluations	2069 2080		
	11 Conclusions			
К	eferences	2085
