Introduction	vii
Chapter 1. Historical Definitions and Basic Properties	1
§1.1. Definitions of Hochschild homology and cohomology	1
§1.2. Interpretation in low degrees	9
§1.3. Cup product	13
§1.4. Gerstenhaber bracket	16
§1.5. Cap product and shuffle product	20
§1.6. Harrison cohomology and Hodge decomposition	22
Chapter 2. Cup Product and Actions	25
§2.1. From cocycles to chain maps	25
§2.2. Yoneda product	27
§2.3. Tensor product of complexes	32
§2.4. Yoneda composition and tensor product of extensions	35
§2.5. Actions of Hochschild cohomology	38
Chapter 3. Examples	45
§3.1. Tensor product of algebras	45
§3.2. Twisted tensor product of algebras	52
§3.3. Koszul complexes and the HKR Theorem	58
§3.4. Koszul algebras	62
§3.5. Skew group algebras	70
§3.6. Path algebras and monomial algebras	74

Chapter 4. Smooth Algebras and Van den Bergh Duality	79
§4.1. Dimension and smoothness	79
§4.2. Noncommutative differential forms	83
§4.3. Van den Bergh duality and Calabi-Yau algebras	88
§4.4. Skew group algebras	91
§4.5. Connes differential and Batalin-Vilkovisky structure	94
Chapter 5. Algebraic Deformation Theory	99
§5.1. Formal deformations	99
§5.2. Infinitesimal deformations and rigidity	104
§5.3. Maurer-Cartan equation and Poisson bracket	108
§5.4. Graded deformations	110
§5.5. Braverman-Gaitsgory theory and the PBW Theorem	112
Chapter 6. Gerstenhaber Bracket	117
§6.1. Coderivations	118
§6.2. Derivation operators	121
§6.3. Homotopy liftings	125
§6.4. Differential graded coalgebras	131
§6.5. Extensions	136
Chapter 7. Infinity Algebras	141
§7.1. A_∞ -algebras	141
§7.2. Minimal models	145
§7.3. Formality and Koszul algebras	148
§7.4. A_∞ -center	149
§7.5. L_∞ -algebras	152
§7.6. Formality and algebraic deformations	155
Chapter 8. Support Varieties for Finite-Dimensional Algebras	159
§8.1. Affine varieties	160
§8.2. Finiteness properties	162
§8.3. Support varieties	167
§8.4. Self-injective algebras and realization	170
§8.5. Self-injective algebras and indecomposable modules	173
Chapter 9. Hopf Algebras	181
§9.1. Hopf algebras and actions on rings	181

§9.2. Modules for Hopf algebras	185
§9.3. Hopf algebra cohomology and actions	190
§9.4. Bimodules and Hochschild cohomology	196
§9.5. Finite group algebras	202
§9.6. Spectral sequences for Hopf algebras	205
Appendix A. Homological Algebra Background	211
§A.1. Complexes	211
§A.2. Resolutions and dimensions	214
§A.3. Ext and Tor	218
§A.4. Long exact sequences	221
§A.5. Double complexes	224
§A.6. Categories, functors, derived functors	226
§A.7. Spectral sequences	230
Bibliography	235
Index	247
