

Contents

1	Introduction—The Hydrogen Economy Today	1
1.1	Perceptions and Reality	5
1.2	The Uses of Hydrogen Today	5
1.3	Hydrogen Demand Growth	7
1.4	Fossil Fuel Hydrogen: Low Tech?	8
1.5	Fuels in Transition	9
1.6	Future Prospects for Fossil-Fuel-Based Hydrogen Production	10
1.7	The Hydrogen Council	11
	References	13
2	The Future of Energy and Mobility	15
2.1	A Very Brief History of the Car	15
2.2	Fuel Cell Electric Vehicles and the Future of Mobility	17
2.2.1	The Toyota Mirai	20
2.2.2	Green Car and Better Car	22
2.3	Hydrogen Safety	23
2.4	Vehicle Refuelling	24
2.5	Low Hanging Fruit	26
	References	30
3	Hydrogen Chemical Engineering—<i>The Future</i>	33
3.1	Steam Methane Reforming	34
3.2	Partial Oxidation Gasification	37
3.3	Innovation in Hydrogen Production	37
3.4	Methane and the Atmosphere	40
	References	41
4	Towards a Hydrogen Economy	43
4.1	Origins	43
4.2	Emergence	44

4.3	Castro-Dominguez/Kazantzis Review 2018	45
4.4	Looking to the Future	49
	References	51
5	Carbon Capture, Utilisation and Storage	53
5.1	The Case for Carbon Capture and Storage	54
5.2	Carbon Capture Direct from the Air	61
5.3	Carbon Utilisation	62
	5.3.1 Fracking and the Plastics Industry	64
5.4	The Way Ahead for CCS	65
	References	66
6	Hydrogen Infrastructures	69
6.1	Hydrogen Storage and Distribution	69
6.2	European Experience	71
6.3	The US Gulf Coast	73
6.4	Partial Oxidation—A Provider of Hydrogen and Molecular Building Blocks	76
6.5	US CO ₂ Pipelines	76
	References	77
7	The Proposed Natural Gas to Hydrogen Transition in the UK	79
7.1	An All-Electric Future?	81
7.2	A Future Role for Hydrogen in UK Domestic Heat	85
	7.2.1 To Blend or not to Blend?	86
7.3	Leeds Gateway “H21” Proposition	87
7.4	HyNET Project in the North-West of England	90
7.5	The Wider UK Context	92
7.6	Ammonia and the World	93
	References	93
8	Small-Scale Local Hydrogen Production	95
8.1	The Proposition	95
8.2	Small Scale Alternatives	97
8.3	Relative Merits of Local Hydrogen from Electricity and Natural Gas	98
	References	100
9	Hydrogen Cryomagnetism—A Physics-Based Innovation	101
9.1	Hydrogen Cryomagnetism—An Introduction	102
9.2	Pathways to the Hydrogen Economy	103
9.3	The Attributes of Liquid Hydrogen	104
9.4	Liquid Hydrogen Storage	106
	References	107

10 Deep Decarbonisation—*The Role of Hydrogen* 109
 10.1 The Environmental Impacts of Steel Production 110
 10.2 The Prospect of Low Emission Steel Production 111
