CONTENTS

1 Introduction and Preview 1

1.1 General Organization 1

1.2 Part I: Utilities without Probabilities 2

1.3 Parts II and III: Utilities with Probabilities 3

PART I UTILITIES WITHOUT PROBABILITIES

2 Preference Orders and Utility Functions for Countable Sets 9

2.1 Binary Relations 10

2.2 Preference as a Weak Order 11

2.3 Preference as a Strict Partial Order 15

2.4 Ordered Indifference Intervals 18

2.5 Summary 22

3 Utility Theory for Uncountable Sets 26

3.1 The Denseness Axiom and Weak Orders 26

3.2 Preference as a Strict Partial Order 29

3.3 Preferences on Re^n 31

3.4 Continuous Utilities 35

3.5 Summary 39

4 Additive Utilities with Finite Sets 42

4.1 Preference Independence among Factors 43

4.2 Theorem of The Alternative 46

4.3 Lexicographic Utilities 48
4.4 Summary 50

5 Additive Utilities with Infinite Sets 54
5.1 Strictly Ordered Groups 54
5.2 Algebraic Theory for *n* Factors 57
5.3 Topological Preliminaries 62
5.4 Topological Theory for *n* Factors 65
5.5 Summary 76

6 Comparison of Preference Differences 80
6.1 "Measurable" Utility 81
6.2 Theory with Finite Sets 82
6.3 Review of Infinite-Set Theories 84
6.4 Summary 86

7 Preferences on Homogeneous Product Sets 89
7.1 Persistence and Impatience 90
7.2 Persistent Preference Differences 92
7.3 Constant Discount Rates 95
7.4 Summary 97

PART II EXPECTED-UTILITY THEORY

8 Expected Utility with Simple Probability Measures 103
8.1 Example 103
8.2 Simple Probability Measures 105
8.3 Expected Utility for Simple Measures 107
8.4 Mixture Sets 110
8.5 Summary 115

9 Expected Utility for Strict Partial Orders 121
9.1 An Expected Utility Theorem 121
9.2 Convex Sets and Cones 122

9.3 Proof of Theorem 9.1 125
9.4 Summary 126

10 Expected Utility for Probability Measures 129
10.1 Two Examples 129
10.2 Probability Measures 130
10.3 Expectations 134
10.4 Preference Axioms and Bounded Utilities 137
10.5 Theorems 139
10.6 Proofs of Theorems 10.1, 10.3, and 10.5 142
10.7 Summary 144

11 Additive Expected Utility 148
11.1 Expected Utility with $X = \Pi X_i$ 148
11.2 Additive Expectations with $X \subseteq \Pi X_i$ 150
11.3 Additive, Interdependent Expectations for ΠX_i 153
11.4 Probability Measures on Homogeneous Product Sets 156
11.5 Summary 157

PART III STATES OF THE WORLD

12 States of the World 163
12.1 States and States 163
12.2 Expected Utility Preview 166
12.3 Models without State Probabilities 168
12.4 Summary 170

13 Axioms with Extraneous Probabilities 175
13.1 Horse Lotteries 175
13.2 Finite States Theory 177
13.3 Homogeneous Horse Lottery Theory 178
13.4 The Part II Decision Model 185
13.5 Summary 186

14 Savage's Expected-Utility Theory **191**
14.1 Savage's Expected-Utility Theorem 191
14.2 Axioms for Probability 194
14.3 Probabilities from Preferences 200
14.4 Utility for Simple Acts 201
14.5 Utilities Are Bounded 206
14.6 Utility for All Acts 207
14.7 Summary 210

Answers to Selected Exercises **215**
