

## SECTION 1 Critical Care and Critical Illness

1. **Has Evidence-Based Medicine Changed the Practice of Critical Care?, 1**  
*Andrew T. Levinson and Mitchell M. Levy*
2. **Do Protocols/Guidelines Actually Improve Outcomes?, 5**  
*Jon Sevransky, William S. Bender, and Bram Bochwerg*
3. **What Happens to Critically Ill Patients After They Leave the ICU?, 11**  
*Jason H. Maley and Mark E. Mikkelsen*
4. **What Can Be Done to Enhance Recognition of the Post-ICU Syndrome (PICS)? What Can Be Done to Prevent It? What Can Be Done to Treat It?, 17**  
*Jakob I. McSparron and Theodore J. Iwashyna*
5. **How Have Genomics Informed Our Understanding of Critical Illness?, 23**  
*Kelly R. Genga, Mark Trinder, and James A. Russell*

## SECTION 2 Basic Respiratory Management and Mechanical Ventilation

6. **Is Oxygen Toxic?, 36**  
*Bryan T.G. Reidy, Pauline Whyte, and Patrick J. Neligan*
7. **What is the Role of Noninvasive Respiratory Support and High-Flow Nasal Cannula in the Intensive Care Client?, 43**  
*Joshua Iokepa Santos and Jason C. Brainard*
8. **What Is the Role of PEEP and Recruitment Maneuvers in ARDS?, 50**  
*Sinead Egan and Gerard P. Curley*
9. **What Is the Best Way to Wean and Liberate Patients from Mechanical Ventilation?, 57**  
*Alistair Nichol, Pierce Geoghegan, Stephen Duff, David Devlin, and David J. Cooper*
10. **How Does Mechanical Ventilation Damage Lungs? What Can Be Done to Prevent It?, 68**  
*Ron Leong, Joshua A. Marks, and Maurizio Cereda*

## SECTION 3 Non-ARDS and Noninfectious Respiratory Disorders

11. **How Should Exacerbations of COPD Be Managed in the Intensive Care Unit?, 74**  
*Christina Campbell, Tara Cahill, and Anthony O'Regan*
12. **Is Diaphragmatic Dysfunction a Major Problem Following Mechanical Ventilation?, 82**  
*Ewan C. Goligher and Martin Dres*

## SECTION 4 ARDS

13. **ARDS—Are the Current Definitions Useful?, 90**  
*Jason H. Maley and B. Taylor Thompson*
14. **What Are the Pathologic and Pathophysiologic Changes That Accompany ARDS?, 95**  
*Jonathan Dale Casey and Lorraine B. Ware*
15. **What Factors Predispose Patients to Acute Respiratory Distress Syndrome?, 103**  
*Yewande Odeyemi, Alice Gallo De Moraes, and Ognjen Gajic*
16. **What Is the Best Mechanical Ventilation Strategy in ARDS?, 109**  
*Yasin A. Khan and Niall D. Ferguson*
17. **Is Carbon Dioxide Harmful or Helpful in ARDS?, 121**  
*Claire Masterson, Shahd Horie, Emanuele Rezoagli, and John G. Laffey*
18. **Does Patient Positioning Make a Difference in ARDS?, 130**  
*Amy L. Bellinghausen, Robert L. Owens, and Atul Malhotra*
19. **Do Inhaled Vasodilators in ARDS Make a Difference?, 137**  
*Francois Lamontagne, Paige Guyatt, and Maureen O. Meade*
20. **Does ECMO Work?, 142**  
*Jesse M. Raiten, William J. Vernick, and Jacob T. Gutsche*
21. **What Lessons Have We Learned from Epidemiologic Studies of ARDS?, 149**  
*Jordan Anthony Kempker and Greg S. Martin*
22. **What Are the Long-Term Outcomes after ARDS?, 155**  
*Catherine L. Hough*

## SECTION 5 General Critical Care Management

23. **How Do I Approach Fever in ICU and Should Fever Be Treated?, 161**  
*Anne M. Drewry*
24. **What Fluids Should be Given to the Critically Ill Patient? What Fluids Should be Avoided?, 169**  
*Anders Perner*
25. **Should Blood Glucose Be Tightly Controlled in the Intensive Care Unit?, 174**  
*Olivier Lheureux and Jean-Charles Preiser*
26. **Is There a Role for Therapeutic Hypothermia in Critical Care?, 179**  
*Tomas Drabek and Patrick M. Kochanek*
27. **How Do I Manage the Morbidly Obese Critically Ill Patient?, 186**  
*Ali A. El Solh*

**28. How Do I Safely Transport the Critically Ill Patient?, 199**

*Bairbre Aine McNicholas and John James Bates*

**29. What Are the Causes of and How Do I Treat Critical Illness Neuropathy/Myopathy?, 208**

*Frank Brunkhorst and Hubertus Axer*

**SECTION 6 Sepsis**

**30. What is Sepsis? What is Septic Shock? What are MODS and Persistent Critical Illness?, 215**

*Daniel E. Leisman and Clifford Deutschman*

**31. How Do I Identify the Patient With "Sepsis"?, 221**

*Craig M. Coopersmith and Katherine Lyn Nugent*

**32. Is There Immune Suppression in the Critically Ill Patient – Pro?, 226**

*Kenneth E. Remy and Isaiah R. Turnbull*

**33. Is There Immune Suppression in the Critically Ill Patient – Con?, 233**

*Jean-Marc Cavaillon and Evangelos J. Giamarellos Bourboulis*

**34. Does the Timing of Antibiotic Administration Matter in Sepsis?, 241**

*Ithan D. Peltan and Vincent X. Liu*

**35. What Is the Role of Vasopressors and Inotropes in Septic Shock?, 250**

*David Devlin, Clifford S. Deutschman, and Patrick J. Neligan*

**36. Does Monitoring the Microcirculation Make a Difference in Sepsis? Outcome?, 256**

*Goksel Guven and Can Ince*

**37. Are We Getting Any Better at Diagnosing Sepsis?, 262**

*Stephanie Royer Moss and Hallie C. Prescott*

**38. Do the Surviving Sepsis Campaign Guidelines Work?, 270**

*Laura Evans and Ariella Prutzer*

**39. Has Outcome in Sepsis Improved? What Works? What Does Not?, 274**

*Jean-Louis Vincent*

**SECTION 7 Persistent Critical Illness**

**40. What Happens to the Autonomic Nervous System in Critical Illness?, 279**

*Gareth L. Ackland*

**41. Is Persistent Critical Illness a Syndrome of Ongoing Inflammation/Immunosuppression/Catabolism?, 285**

*McKenzie K. Hollen, Philip A. Efron, and Scott C. Brakenridge*

**SECTION 8 Infection**

**42. How Do I Optimize Antibiotic Use in Critical Illness?, 291**

*Cheston B. Cunha and Steven M. Opal*

**43. How Do I Identify Pathologic Organisms in the 21st Century?, 299**

*Tjitske S.R. van Engelen and Tom van der Poll*

**44. How Do I Diagnose and Manage Catheter-Related Bloodstream Infections?, 307**

*Michael Scully*

**45. How Do I Manage Central Nervous System Infections (Meningitis/Encephalitis)?, 313**

*Amy C. Walker, David Foster Gaieski, and Nicholas J. Johnson*

**46. How Can Biomarkers Be Used to Differentiate Between Infection and Non-Infectious Causes of Inflammation?, 319**

*Alexandra Binnie, Joel Lage, and Claudia C. Dos Santos*

**47. What is Ventilator-Associated Pneumonia? How Do I Diagnose It? How Do I Treat It?, 325**

*Eman Ansari and Michael Klompas*

**SECTION 9 Hemodynamic Management**

**48. What Is the Role of Invasive Hemodynamic Monitoring in Critical Care?, 332**

*Daniel De Backer*

**49. Does the Use of Echocardiography Aid in the Management of the Critically Ill?, 338**

*Jennifer Cruz and Steven M. Hollenberg*

**50. How Do I Manage Hemodynamic Decompensation in a Critically Ill Patient?, 345**

*Allison Dalton and Michael F. O'Connor*

**51. What are the Best Tools to Optimize the Circulation?, 351**

*Garima Gupta and Michael R. Pinsky*

**52. How Should Cardiogenic Shock Be Managed (Including Assist Devices)?, 359**

*Matthew R. Biery and Benjamin Kohl*

**SECTION 10 Cardiovascular Critical Care**

**53. How Do I Manage Acute Heart Failure?, 366**

*Larry X. Nguyen and Benjamin Kohl*

**54. How Do I Diagnose and Manage Myocardial Ischemia in the ICU?, 371**

*Audrey E. Spelde, Kristen Carey Rock, and Emily K. Gordon*

**55. How Do I Prevent or Treat Atrial Fibrillation in Postoperative Critically Ill Patients?, 379**

*Jonathan K. Frogel and Stuart J. Weiss*

**SECTION 11 Kidney Injury and Critical Illness**

**56. How Do I Rapidly and Correctly Identify Acute Kidney Injury?, 389**

*Gianluca Villa, Zaccaria Ricci, and Claudio Ronco*

**57. What Is the Role of Renal Replacement Therapy in the Intensive Care Unit?, 395**

*Adeel Rafi Ahmed, Michelle O'Shaughnessy, John O'Regan, and David William Lappin*

**58. What is the Value of Nondialytic Therapy in Acute Kidney Injury?, 402**

*Stephen Duff and Patrick T. Murray*

**SECTION 12 Metabolic Abnormalities in Critical Illness**

**59. How Should Acid-Base Disorders Be Diagnosed?, 408**

*Patrick J. Neligan*

**60. Is Hyperchloremia Harmful?, 419**

*Ida-Fong Ukor and Keith R. Walley*

**61. Dysnatremias—What Causes Them and How Should They Be Treated?, 426**

*Peter Moran, John Bates, and Patrick J. Neligan*

**62. Why Is Lactate Important in Critical Care?, 439**

*Jan Bakker*

**63. How Does Critical Illness Alter Metabolism?, 444**

*Mark E. Nunnally and Greta Piper*

**SECTION 13 Neurological Critical Care**

**64. How Should Traumatic Brain Injury Be Managed?, 451**

*Lindsay Raab, W. Andrew Kofke, and Danielle K. Sandsmark*

**65. How Should Aneurysmal Subarachnoid Hemorrhage Be Managed?, 461**

*Rick Gill, David Kung, and Joshua M. Levine*

**66. How Should Acute Ischemic Stroke Be Managed in the Intensive Care Unit?, 475**

*Yunis Mayasi and Robert David Stevens*

**67. How Should Status Epilepticus Be Managed?, 484**

*Jessica Falco-Walter and Thomas P. Bleck*

**SECTION 14 Nutrition, Gastrointestinal, and Hepatic Critical Care**

**68. When and How Should I Feed the Critically Ill Patient?, 489**

*Patrick J. Neligan*

**69. What Does Critical Illness Do to the Liver?, 497**

*Michael Bauer and Andreas Kortgen*

**70. How Do I Manage a Patient With Acute Liver Failure?, 500**

*Mark T. Keegan*

**SECTION 15 Endocrine Critical Care**

**71. Is There a Place for Anabolic Hormones in Critical Care?, 512**

*Nicholas Heming, Virginie Maxime, Hong Tuan Ha Vivien, and Djillali Annane*

**72. How Do I Diagnose and Manage Acute Endocrine Emergencies in the ICU?, 519**

*Joseph Fernandez-Moure, Anna E. Garcia Whitlock, and Carrie A. Sims*

**73. What Is the Current Role for Corticosteroids in Critical Care?, 529**

*Craig Lyons and Leo G. Kevin*

**SECTION 16 Trauma, Surgery, Obstetrics, and Environmental Injuries**

**74. How Should Trauma Patients Be Managed in the Intensive Care Unit?, 534**

*Brian P. Smith and Patrick M. Reilly*

**75. What Is Abdominal Compartment Syndrome and How Should It Be Managed?, 541**

*Michael A. Vella and Lewis J. Kaplan*

**76. How Should Patients With Burns Be Managed in the Intensive Care Unit?, 548**

*Marc G. Jeschke*

**77. What Is the Best Approach to Resuscitation in Trauma?, 556**

*Samuel A. Tisherman, Megan T. Quintana, and Jason S. Radowsky*

**78. How Do I Diagnose and Treat Major Gastrointestinal Bleeding?, 567**

*Charles R. Vasquez and Niels D. Martin*

**79. How Should the Critically Ill Pregnant Patient Be Managed?, 573**

*Ariel Tamara Slavin and Lauren A. Plante*

**80. How Do I Diagnose and Manage Patients Admitted to the ICU After Common Poisonings?, 579**

*Jakub Furmaga and Kurt Kleinschmidt*

**SECTION 17 Hematology Critical Care**

**81. When Is Transfusion Therapy Indicated in Critical Illness and When Is It Not?, 584**

*Babak Sarani and Cheralyn J. Hendrix*

**82. Is There a Role for Granulocyte-Macrophage Colony-Stimulating Factor and/or Erythropoietin in Critical Illness?, 593**

*McKenzie K. Hollen, Philip A. Efron, and Alicia M. Mohr*

**83. What Anticoagulants Should be Used in the Critically Ill Patient? How Do I Choose?, 598**

*Cheralyn J. Hendrix, Lisbi Rivas, and Babak Sarani*

**SECTION 18 Critical Care Resource Use and Management**

**84. Is There a Better Way to Deliver Optimal Critical Care Services?, 605**

*Ian J. Barbash and Jeremy M. Kahn*

**85. How Do Critical Care Pharmacists Contribute to Team-Based Care?, 612**

*Judith Jacobi*

**86. What Is the Role of Advance Practice Nurses and Physician Assistants in the ICU?, 618**

*Ruth Kleinpell and W. Robert Grabenkort*

**SECTION 19 Patient Suffering and Other Ethical Issues**

**87. Do the Guidelines for Brain Death Determination Need to Be Revised?, 624**

*Ariane Lewis and Sam D. Shemie*

**88. How Do I Diagnose, Treat, and Reduce Delirium in the Intensive Care Unit?, 631**

*Christina Boncyk, E. Wesley Ely, and Pratik Pandharipande*

**Index, 643**

**E-ONLY CHAPTER**

**Is Hypothermia Useful to Prevent Brain Injury after Cardiac Arrest? In Other Settings?**

*Damon C. Scales and Laura Dragoi*

**Addition to Sections 10 (Cardiovascular Critical Care) and 13 (Neurologic Critical Care)**
