

Table of Contents

List of Abbreviations.....	ix
Abstract.....	xi
Zusammenfassung.....	xiii
Resumo.....	xv
1.Introduction	1
1.1. The role of the human movement analysis	1
1.2. Motivation.....	3
2. Background.....	4
2.1. Obstetric Brachial Plexus Palsy	4
2.2. The Upper Extremity	6
2.2.1. Innervation.....	6
2.2.2. Upper arm: shoulder articulation.....	9
2.2.3. Forearm: elbow and distal radioulnar articulations	12
2.3. The upper extremity movement's state-of-art analysis.....	13
2.3.1.3D motion	13
2.3.2. Inertial and acceleration sensors	14
2.3.3. Mallet Scale.....	15
3. Purpose of the study	17
4. Methods.....	19
4.1. Subjects	19
4.2. Accelerometers and their position.....	19
4.3. Test procedure.....	21
4.4. Features extraction.....	22
4.4.1. The effect of fatigue and learning process	23
4.4.2. Assessment of the movement performance's quality.....	29
4.5. SCORE to assess the movement's quality.....	33
5. Results.....	35
5.1. The effect of the fatigue and the learning process	35
5.2. The quality of the movement	45
5.2.1. Hand-to-Mouth (HM).....	46
5.2.2. Hand-to-Neck (HN)	48
5.2.3. Hand-to-Spine (HS)	49

6. Discussion	51
7. Conclusion	57
8. References	59
9. Appendix	63
