

TABLE OF CONTENTS

Kurzfassung	III
ABSTRACT	IV
TABLE OF CONTENTS	V
LIST OF FIGURES	X
LIST OF TABLES	XV
ABBREVIATIONS	XVIII
LIST OF SYMBOLS	XX
1. Objectives and Structure of the Thesis	1
1.1 Motivation	1
1.2 Research Objectives	1
1.3 Significance of the Study	1
1.4 Structure of the Work	2
1.5 Research Methodology	3
2. Introduction	5
2.1. Sultanate of Oman: Background and Overview	5
2.1.1. Geography	5
2.1.2. Politics	6

2.1.3. Population.....	7
2.1.4. Transportation	7
2.1.5. Economic Profile.....	9
2.2. Grid Systems in Oman	10
2.2.1 The Main Interconnected System (MIS)	10
2.2.2 Petroleum Development Oman (PDO) Power System.....	12
2.2.3 The Gulf Cooperation Council (GCC) Power Grid.....	12
2.2.4 Off-Grid System	13
3. Literature Review.....	15
3.1 Generation Expansion Planning (GEP).....	15
3.2 Existing Research for Generation Expansion Planning (GEP) Problems	16
3.2.1 Single Objective (lowest-cost) Generation Expansion Planning (GEP).....	16
3.2.2 Multi-Objective GEP.....	17
3.3. Levelized Cost of Electricity (LCOE).....	18
3.4. Optimization Software Tools	20
3.4.1. Hybrid Optimization Model for Electric Renewables (HOMER) Modeling Software.....	20
3.4.2. EnergyPro Model	22
4. Input Data	23

4.1. Power Demand History and Forecasts for Oman.....	23
4.1.1. Historical Growth Demand.....	23
4.1.2. Power Demand Forecasts in the Oman Power and Water Procurement (OPWP) Seven-Year Statements, 2015-2022	25
4.1.3. Long-term Power Demand Outlook (through 2035)	26
4.1.4 Load Profile in HOMER	29
4.2. Equipment	30
4.3 Resources	32
4.3.1 Solar.....	32
4.3.2. Wind.....	33
4.4. Fuel.....	35
4.5 Further Input Parameters.....	36
5. Evaluation of the Existing Power System in Oman	38
5.1. Actual Electricity Costs and Subsidies.....	38
5.2 Benchmarking with HOMER and EnergyPro.....	41
6. Generation Expansion Planning Scenarios for Oman	43
6.1. Base Case Scenario (100% Natural Gas)	44
6.2. Extreme Case Scenario.....	45
6.2.1. Generation expansion planning (GEP) based on a renewable energy-only model..	45

6.2.2 Generation expansion planning (GEP) based on nuclear or coal powered systems	45
6.3. Optimal Case Scenario	47
6.4. Comparison of Generation Expansion Planning (GEP) Scenarios	48
7. Implementation of and Financing for the Best Design (2016-2035)	53
7.1 Financing Options for Renewable Energy	53
7.2 Implementation Schedules for Optimal System Design	54
8. Evaluations and Data Validation	57
8.1. First Method of Validation: the Potential of Different Technologies in Oman	57
8.1.1. Nuclear	58
8.1.2. Coal	58
8.1.3. Oil	58
8.1.4. Natural Gas	58
8.1.5 Renewable Energy (Solar and Wind)	61
8.1.6 Summary of Energy Potential in Oman	65
8.2. Second Method of Validation: Using the United Arab Emirates (UAE) Nuclear Power Program	67
8.2.1. Evaluation of the United Arab Emirates (UAE) nuclear program using Hybrid Optimization Model for Electric Renewables [HOMER] modeling	70
8.2.2. Simulation Results and Analyses	71

8.3. Third Method of Validation: Comparing Simulated Results within Global Markets’ Power Technologies	73
8.4. Cost Reduction Potential of Solar and Wind Power Units.....	77
8.5. Weaknesses and Limitations of this Study.....	81
9. Conclusions and Recommendations	83
9.1. Conclusions	83
9.2. Recommendations	85
9.3. Further Research Areas	86
References	89
