Contents

MODULE 1 The Challenges of Managing in an Information Age 1

1. The Information Technology Challenge 3

IT Management Concepts 5
- Strategic Relevance 5
- Corporate Culture 5
- Contingency 6
- Technology Transfer 6

Challenges in Managing IT 6
- A Young Technology 7
- Technological Growth 7
- IT End-User Coordination 8
- Specialization 9
- Shift in Focus 9

Questions from Senior Management 11
Conclusion 12

2. Manageable Trends 15

Theme 1: Strategic Impact 16
- A Contingency Approach to IT Use 19
- A Contingency Approach to IT Management 21

Theme 2: Integrating Changing Technology Platforms 24
- Era I 25
- Era II 25
- Era III 26

Theme 3: Assimilating Emerging Technologies 26
- Phase 1. Technology Identification and Investment 27
- Phase 2. Technological Learning and Adaptation 27
- Phase 3. Rationalization/Management Control 28
- Phase 4. Maturity/Widespread Technology Transfer 28

Theme 4: Sourcing Policies for the IT Value Chain 29
Theme 5: Applications Development Process 31
Design 33
Construction 33
Implementation 34
Operation 34
Maintenance 35
Theme 6: Partnership of Three Constituencies 36
IT Management 37
User Management 37
General Management 38
Summary 38
Case 1–1: VeriFone (1997) 40
Case 1–2: A Tale of Two Airlines in the Information Age: Or Why the Spirit of King George III Is Alive and Well! 56

MODULE 2 Information Technology and Strategy 59

3. Effects of IT on Strategy and Competition 61

Forces That Shape Strategy 63
Search for Opportunity 66
Can IT Build Barriers to Entry? 66
Can IT Build in Switching Costs? 67
Can IT Change the Basis of Competition? 68
Can IT Change the Balance of Power in Supplier Relationships? 69
Can IT Generate New Products? 70
Analyzing the Value Chain for IT Opportunities 71
Inbound Logistics 71
Operations and Product Definition 72
Outbound Logistics 73
Marketing and Sales 73
After-Sales Service 74
Corporate Infrastructure 75
Human Resources 75
Technology Development 76
Procurement 76
The Risks of Information Systems Success 77
Problems and Evaluations 77
Assessing Competitor Risk 81
The Challenge 82
A New Point of View Is Required 83
Planning Issues 83

Confidentiality and Competition 83
The IT-Management Partnership 85
Summary 85

4. Electronic Commerce: Trends and Opportunities 87

The Evolution of Interorganizational Systems 88
IOS Evolution at American Hospital Supply and American Airlines 89
Evolution and Revolution: Introduction of the Internet 94
Learning from the Past as We Create the Future 100
Lesson 1: Build Internal Capabilities 100
Lesson 2: Penetrate Quickly and Leverage the Community 104
Lesson 3: Exploit the Economic Value of Information 111
Conclusion 117
Case 2–1: Canadian Airlines (A): Reservations about Its Future 119
Case 2–2: H. E. Butt Grocery Company: A Leader in ECR Implementation (Abridged) 131
Case 2–3: Internet Securities, Inc.: Building an Organization in Internet Time 143

MODULE 3 Information Technology and Organization 171

5. Information, Organization, and Control 173

Learning from Mistakes 178
Creating the Information Age Organization 182
Maintaining Flexibility, Innovation, and Control 184
Maximizing Independence and Interdependence: Collaboration, the Missing Organization Design Criterion 189
Summary 194
Appendix A Overview of Traditional Organization Design Models 195
The Bureaucratic Hierarchy 196
The Entrepreneurial Organization 198
The Matrix Organization 199
The Adhocracy 199
A Framework for Organization Design 201

6. IT Architecture: Evolution and Alternatives 207

Evolution and Revolution: 30 Years of IT Impact 208
Evolution of IT Architecture 209
Era I: The Mainframe (1950s to 1970s) 211

Era II: The Personal Computer (Late 1970s to 1980s) 215
Era III: Network Computing (1990s to Present) 216
Value Creation in a Networked Environment 218
Implementation Issues 221
Maintaining a Reliable and Secure Environment for Doing Business 222
Assimilating Emerging Information Technologies 226
Managing the IT Legacy 229
Merging the Islands of Automation 231
Summary 234
Appendix A: Guidelines for IT Architecture Assessment 235
Appendix B: Year 2000 Computing Crisis: A Testing Guide 237
Overview of GAO's Managed, Five-Step Approach to Year 2000 Testing 241
Case 3–1: Taco Bell, Inc. (1983–1994) 247
Case 3–2: Frito-Lay, Inc.: A Strategic Transition, 1980–1986 263
Case 3–3: Frito-Lay, Inc.: A Strategic Transition, 1987–1992 (Abridged) 291
Case 3–4: MicroAge, Inc.: Orchestrating the Information Technology Value Chain 312

MODULE 4 Managing Information Assets 347

7. Organizing and Leading the Information Technology Function 349

Organizing Issues in IT Development 349
Some Examples 351
Implications 353
Pressures toward User Dominance 354
Pent-Up User Demand 354
Staff Flexibility and Growth 354
Staff Professional Growth 355
Competitive and Service Growth in the IT Market 355
User Control 355
Fit with the Organization 356
User Learning 356
Summary 356
Pressures toward IT Control 357
Staff Professionalism 357
Feasibility Concerns 358
Corporate Databases 359
Fit with the Corporate Structure and Strategy 361
Cost Analysis 361
Summary 362
Coordination and Location of IT Policy 362

IT Responsibilities 362
User Responsibilities 364
General Management Support and Policy Overview 364
Summary 366

8. Managing IT Outsourcing 369

Why Outsourcing Alliances Are So Difficult 370
Outsourcing in Retrospect 371
Outsourcing in the 1990s 372
Acceptance of Strategic Alliances 372
IT's Changing Environment 373
What Drives Outsourcing? 374
When to Outsource IT 378
Position on the Strategic Grid 379
Development Portfolio 380
Organizational Learning 381
A Firm's Position in the Market 382
Current IT Organization 382
Structuring the Alliance 382
Contract Flexibility 383
Standards and Control 383
Areas to Outsource 384
Cost Savings 385
Supplier Stability and Quality 385
Management Fit 386
Conversion Problems 386
Managing the Alliance 387
The CIO Function 387
Performance Measurements 388
Mix and Coordination of Tasks 388
Customer-Outsourcer Interface 389

9. IT Operations 391

Changing Operations Environment 392
A Focused Service Organization Alternative—An Example 393
Alternative Organizations 394
Developing an Operations Strategy 395
Technology Planning 396
Innovation Phase 398
Control Phase 401
Measuring and Managing Capacity 401
Managing the IT Operations Workforce 404
Selection Factors for Operations Manager and Staff 406
Human Issues in Managing the Workforce 406
Production Planning and Control 407

Setting Goals 407
Establishing Priorities 407
Strategic Impact of IT Operations 408
Implementing Production Control and Management 409
Security 410
Privacy 411
The Roots of the Privacy Issue 412
The Implications 414
Summary 417

10. IT Management Processes 419

Management Control 419
IT Evolution and Management Control 421
Software Issues 421
Operations Issues 421
Corporate Control Process 423
Strategic Impact of IT on the Corporation 424
Looking Ahead: Other Aspects of Control 425
Results Control Architecture 425
Unallocated Cost Center 425
Allocated Cost Center and Charge-Out 426
Profit Center 431
Financial Reporting Process 432
Nonfinancial Reporting Process 434
IT Audit Function 435
Summary 436
Planning—A Contingent Focus 437
Pressures toward IT Planning 438
External (Corporate) Pressures 438
Internal (IT Process) Pressures 439
Limitations on IT Planning Results 441
Planning as a Resource Drain 442
Fit to Corporate Culture 442
Strategic Impact of IT Activities 442
Mismatches: Using the Strategic Grid 443
Corporate Environmental Factors That Influence Planning 445
Summary 449

11. A Portfolio Approach to Information Technology Development 451

Project Risk 452
Elements of Project Implementation Risk 452
Project Categories and Degree of Risk 454

Assessing Risk of Individual Projects 454
Portfolio Risk 458
Summary 459
Project Management: A Contingency Approach 459
Management Tools 459
Influences on Tool Selection 460
Relative Contribution of Management Tools 463
Summary 465
Case 4–1: Xerox: Outsourcing Global Information Technology Resources 466
Case 4–2: General Dynamics and Computer Sciences Corporation: Outsourcing the IS Function (A+B, Abridged) 490
Case 4–3: Singapore Unlimited: Building the National Information Infrastructure 514
Case 4–4: BAE Automated Systems (A): Denver International Airport Baggage-Handling System 546

MODULE 5 Special Topics 563

12. Global Issues 565

Information Technology Impact on Transnational Firms 567
Geographic Transfer of Work 567
Global Networking and Expertise Sharing 568
Global Service Levels 568
Time-Based Competition 569
Cost Reduction 569
Country Diversity 570
Sociopolitical 570
Language 571
Local Constraints 571
Economics 571
Currency Issues 572
Autonomy 572
National Infrastructure 572
Summary 572
National IT Environment Issues 573
Availability of IT Professional Staff 573
Central Telecommunications 573
National IT Strategy 574
General Level of IT Sophistication 574
Size of Local Market 575
Data Export Control 575
Technological Awareness 575
Summary 576

Corporate Factors Affecting IT Requirements 576
Nature of the Firm's Business 576
Strategic Impact of IT 577
Corporate Organization 577
Company Technical and Control Characteristics 578
Other Considerations 579
Transnational IT Policy Issues 579
Guidance on Architecture 579
Central Hardware/Software Concurrence or Approval 580
Central Approval of Software Standards and Feasibility Studies 581
Central Software Development 581
IT Communications 582
Staff Rotation 583
Consulting Services 584
Central IT Processing Support 585
Technology Appraisal Program—An Example 585
Summary 586

13. The IT Business 589

"The IT Business" Analogy 589
The IT Marketing Mix 591
The Products 591
The IT Customer 593
Costs 595
Channels of Distribution 597
Competition 599
Promotion 599
Price 600
The Role of the Board of Directors 602
The Role of the IT Chief Executive Officer 603
Summary 604
Case 5–1: Colliers International Property Consultants, Inc.: Managing a Virtual Organization 605
Case 5–2: www.springs.com 624
Case 5–3: Providian Trust: Tradition and Technology (A) 648
Case 5–4: Southwire: Beyond 2000 672

Annotated Bibliography 692
Index 697
