## Contents

Abstract I

Deutschsprachige Zusammenfassung II

Acknowledgements V

1 Introduction 1

2 Theory 3

2.1 Introduction to Press-Hardening 3

2.2 Preliminary Considerations Regarding Relevant Mechanical Properties for Press-Hardening Steels 5

2.3 Introduction to 3rd Gen. Advanced High Strength Steels 10

2.4 Impact of RA on Mechanical Properties 14

2.5 Cementite Precipitation During AHSS Heat Treatments 17

2.6 Steel and Heat Treatment Design 20

3 Experimental 28

3.1 Summary of Alloys and Heat Treatments 28

3.2 Detailed Description of Manufacturing and Characterisation Techniques 30

4 Characterisation of 22MnB5+X Treated by Q&P and IB 35

4.1 Hot Strip Microstructures 35

4.2 Quenching and Partitioning of 22MnB5+X 37

4.2.1 RA Content and Microstructure 38

4.2.2 Mechanical Properties 44

4.2.3 Heat Treatment, Microstructure, Mechanical Properties Correlation and Assessment with Respect to Press-Hardening 48

4.3 Isothermal Bainite Formation of 22MnB5+X 51

4.3.1 Assessment of Minimal Si Content for Significant RA Stabilisation in 22MnB5 51

4.3.2 Mechanical Properties 54

4.3.3 Assessment of the Mechanical Properties with Respect to Press-Hardening 58
## Contents

5 Si Impact on Microstructure Evolution in 3rd Generation AHSS 59
  5.1 Impact of Si on Microstructure Evolution During IB .......... 60
  5.2 Impact of Si on Microstructure Evolution During Q&P ...... 70
  5.3 Differences Between Cementite Formation from Bainitic Ferrite/Martensite and Austenite ........................................ 76
  5.4 Similarities and Differences between Cementite Precipitation during Q&P and IB ............................................... 84

6 Impact of RA and its Stability on Mechanical Properties 87
  6.1 ... After Quenching and Partitioning ......................... 88
  6.2 ... After Isothermal Bainite Formation ....................... 95

7 Conclusions ................................................................. 104

8 Future Work ...................................................................... 105

9 Appendix ........................................................................... 106

Bibliography ......................................................................... 108

Abbreviations ...................................................................... 121
