1 Introduction..... 1

2 State of the art 3

2.1 Service conditions of hot-forging die 3

2.1.1 Thermal loads 3

2.1.2 Mechanical loads 6

2.2 Failures of hot forging dies 7

2.2.1 Wear 8

2.2.2 Mechanical fatigue 10

2.2.3 Thermal fatigue 10

2.2.4 Plastic deformation 10

2.3 Methods to prolong tool life 11

2.3.1 Surface treatments 11

2.3.2 Coating 14

2.3.3 Inserts and other methods 17

2.3.4 Rework and repair of forging dies 18

2.3.5 Conclusions 18

2.4 Modeling of hot forging process and tool life of dies 19

2.4.1 Process parameters models 20

2.4.2 Material models 21

2.4.3 Modeling of tool life of forging dies 22

2.5 Tooling costs 24

2.5.1 Cost of die materials 25

2.5.2 Costs of manufacture of hot-forging dies 26

2.5.3 Cost of forging die setup 28

2.5.4 Cost of repair and rework of hot-forging dies 29

2.6 The concept of die cover and previous research 30

2.6.1 The concept of die cover 30

2.6.2 Review of previous research 31

3 Motivation and scope 34

4 Exploration of feasible applications of the die cover concept 36

4.1	Analysis of the deformation behavior of die covers during forging	36
4.1.1	Deformation behavior of die covers	36
4.1.2	Simulation model	37
4.1.3	Analysis of the deformation problems of die covers	40
4.2	Influence of friction coefficients on die cover behavior	45
4.2.1	Influence of the friction coefficient between the billet and the die cover	47
4.2.2	Influence of the friction coefficient between die cover and the forging die ...	48
4.3	Influence of geometrical features	50
4.3.1	Influence of face angle	50
4.3.2	Influence of die depth.....	51
4.3.3	Influence of billet geometry	51
4.4	Material selection for die covers	53
4.4.1	Requirements for the material selection	53
4.4.2	Comparison of different die cover materials	54
4.4.3	Experimental validation	57
4.5	Case study 1: the exploration of feasible cases	59
4.5.1	Geometry design	59
4.5.2	Numerical study.....	60
4.5.3	Experimental validation	61
4.5.4	Results and discussion	62
5	Developments of the die cover concept	65
5.1	Developments of the die cover concept.....	66
5.1.1	The geometry of die cover	66
5.1.2	The process of applying die covers	68
5.2	Case study 2	70
5.2.1	Geometries design	70
5.2.2	Manufacture of die covers.....	71
5.2.3	Experimental validation	72
5.2.4	Results and discussions	73
6	Evaluation of the die cover concept	77
6.1	Protective effect of die covers	77
6.1.1	Thermal loads.....	77

6.1.2 Mechanical loads	83
6.1.3 Wear	85
6.2 The service life of die covers	85
6.3 Tool life of forging dies with die covers	91
6.4 Economic evaluation	92
7 Summary and outlook	100
References	102
Abbreviations and symbols	109
List of figures	112
List of Tables	115
