Chapter 1	Introduction and Overview	1
	<i>Emma Goosey and Martin Goosey</i>	
1.1	Introduction	2
1.2	Legislative Influences on Electronics Recycling	5
1.2.1	Producer Responsibility Legislation	5
1.2.2	The WEEE Directive	5
1.2.3	The RoHS Directive	7
1.2.4	Other Examples of Legislation	8
1.3	Treatment Options for WEEE	10
1.3.1	Background	10
1.3.2	Material Composition of WEEE	11
1.4	Recent and Emerging WEEE Challenges	13
1.4.1	Critical Raw Materials	13
1.4.2	Changes in Lighting Technology	13
1.4.3	Photovoltaic Panels	14
1.4.4	Printed Electronics and Additive Manufacturing	15
1.4.5	Batteries	15
1.4.6	Socioeconomic Factors	16
1.5	Logistics of WEEE	18
1.6	WEEE – A European Perspective	20
1.7	Barriers to Recycling of WEEE	22
1.8	The Recycling Hierarchy and Markets for Recyclate	22
1.9	WEEE Health and Safety Implications	25
1.10	Future Factors That May Influence Electronic Waste Management	26

1.11	Summary and Conclusions	27
	References	28
Chapter 2	Materials Used in Manufacturing Electrical and Electronic Products	33
	<i>Martin Goosey and Emma Goosey</i>	
2.1	Current Perspective	34
2.2	Impact of Legislation on Materials Used in Electronics	34
2.2.1	Overview	34
2.2.2	The RoHS2 Directive and Proscribed Materials	36
2.2.3	Where Do RoHS Proscribed Materials Occur?	37
2.3	Soldering and the Move to Lead-free Assembly	39
2.3.1	Introduction	39
2.3.2	Lead-free Solder Choices	40
2.4	Printed Circuit Board (PCB) Materials	40
2.4.1	Introduction	40
2.4.2	PCB Materials	41
2.4.3	Provision of Flame Retardancy in PCBs	43
2.4.4	Non-ferrous and Precious Metals	45
2.5	Encapsulants of Electronic Components	45
2.6	Indium Tin Oxide and Liquid Crystal Display Screens	45
2.7	Polymeric Materials in Enclosures, Casings and Panels	46
2.7.1	Polycarbonate	47
2.7.2	Acrylonitrile-butadiene-styrene (ABS)	47
2.7.3	High Impact Polystyrene (HIPS)	48
2.7.4	Polyphenyleneoxide (PPO)	48
2.7.5	PC/ABS Blends	48
2.8	Critical Raw Materials	49
2.8.1	Gallium	50
2.8.2	Cobalt	51
2.8.3	Tantalum	52
2.8.4	Indium	53
2.8.5	Antimony	53
2.8.6	Silicon	54
2.8.7	Critical Raw Materials and New Developments in Electronics	55
2.9	Materials Composition of WEEE	56
2.9.1	Introduction	56
2.9.2	Mobile Phones	56

2.9.3	Televisions	57
2.9.4	Washing Machines	58
2.10	Summary and Conclusions	59
	Acknowledgements	60
	References	60
Chapter 3	A Circular Economy for Consumer Electronics	66
	<i>Marco A. Meloni</i>	
3.1	Introduction	67
3.2	Addressing Waste: A Wealth of Opportunities	68
3.3	The Circular Economy Framework	69
3.3.1	Principles	69
3.3.2	A Vision for Circular Consumer Electronics	71
3.4	The Road to Circularity	72
3.4.1	Design to Keep Products, Components and Materials in Use for Longer	73
3.4.2	Enhance Reverse Logistics, Remanufacturing, Parts Harvesting and Recycling Processes	79
3.4.3	Put in Place the Right Enabling Conditions	84
3.5	Harnessing New Digital Technologies to Catalyse the Transition	90
3.5.1	Intelligent Assets and Enabling Technologies	90
3.5.2	Artificial Intelligence and the Circular Economy	92
3.6	Closing Considerations	93
	Acknowledgements	94
	References	94
Chapter 4	An Overview of Electronic Waste Management in the UK	101
	<i>Sam Reeve and Gev Eduljee</i>	
4.1	Introduction	102
4.2	Legislative Background	102
4.3	Product Categories	103
4.4	The WEEE Management System	104
4.5	Targets and Fees	105
4.6	EEE and WEEE Arisings	107
4.7	Collection Pathways and Fate of WEEE	110
4.8	Recycling of WEEE	113
4.8.1	Recovery of CRMs	113

4.8.2	Processing and Technologies	115
4.8.3	Operating Standards	117
4.9	Reuse of WEEE	118
4.9.1	Value of Reuse	118
4.9.2	Potential for Reuse	119
4.9.3	Pathways for Reuse	120
4.10	Market Demand	123
4.11	Barriers and Measures to Increase the Reuse of WEEE	124
4.11.1	Barriers	124
4.11.2	Design for Disassembly and Repair	124
4.11.3	Setting Targets for Reuse	128
4.11.4	Fostering Dialogue Across the Supply Chain	128
4.11.5	Improving the Marketability of Reusable WEEE	129
4.12	Prospects	130
	References	131
Chapter 5	Management of Electronic Waste in Africa	137
	<i>Margaret Bates and Oladele Osibanjo</i>	
5.1	Introduction	138
5.2	Sources of E-waste	141
5.2.1	Introduction	141
5.2.2	Nigeria	141
5.2.3	Kenya	144
5.2.4	South Africa	145
5.2.5	Synthesis	145
5.3	Collection and Management of E-waste	146
5.3.1	Collection of E-waste	146
5.3.2	Management of E-waste	146
5.4	Environmental and Health Impacts	149
5.4.1	Overview	149
5.4.2	Environmental Impacts	150
5.4.3	Health Impacts	150
5.5	Socio-economic Impact of E-waste Management	152
5.6	Governance Issues in E-waste Management	153
5.7	Effective Business Models for Sound Management of E-waste in Africa	155
5.7.1	The Basel Convention Project	155
5.7.2	Best of Two Worlds	156
5.7.3	A Producers' Model for the Future	156

5.7.4	Hinckley Recycling	159
5.8	Recommendations for Environmentally Sound Management of E-waste in Africa	161
	References	162
Chapter 6	Electronic Waste Management in the Asia Pacific Region <i>Sadhan Kumar Ghosh</i>	166
6.1	Introduction	167
6.2	Collection Systems and Refurbishment	169
6.3	E-waste Generation, Management and Governance	170
6.3.1	Australia	172
6.3.2	China	172
6.3.3	Indonesia	174
6.3.4	India	175
6.3.5	The Philippines	176
6.3.6	Vietnam	177
6.3.7	Malaysia	177
6.3.8	Japan	178
6.3.9	Pakistan	179
6.4	Transboundary Movement of E-waste in the Asia-Pacific	180
6.4.1	A Global Issue	180
6.4.2	China	181
6.4.3	Indonesia	181
6.4.4	Vietnam	181
6.4.5	The Philippines	182
6.4.6	Malaysia	182
6.4.7	Australia	182
6.4.8	Japan	182
6.4.9	Thailand	182
6.4.10	Singapore	183
6.4.11	Republic of Korea	183
6.4.12	India	183
6.5	Summary	184
	References	184
Chapter 7	Traceability of Electronic Waste Using Blockchain Technology <i>Azadeh Dindarian and Sid Chakravarthy</i>	188
7.1	Introduction	189

7.2	Overview of Blockchain	190
7.2.1	Principles	190
7.2.2	Blockchain Use Cases	194
7.2.3	Blockchain in Supply Chain Management	197
7.3	Blockchain Technology and WEEE Management	198
7.3.1	Legal and Regulatory Obligations	199
7.3.2	New Business Models	205
7.4	Future Trends and Conclusion	206
	Acknowledgements	207
	References	207
Chapter 8	Electronics: A Broken Story about Production and Consumption	213
	<i>Sabine Opris</i>	
8.1	Introduction	214
8.1.1	Measuring Economic, Social and Environmental Impact	215
8.2	Electronics Production: The Role of Companies	215
8.2.1	Background	215
8.2.2	Product Planning, Design and Engineering	216
8.2.3	Procurement, Manufacturing and Logistics	220
8.2.4	Marketing and Sales	223
8.2.5	Service, Recycling and Disposal	225
8.3	Electronics Consumption: The Role of Consumers	228
8.3.1	Need Recognition/Inspiration	229
8.3.2	Information Searches, Evaluation and Purchase	229
8.3.3	Usage, Recycling and Disposal	232
8.4	Discussion and Implementation	235
8.4.1	Companies	235
8.4.2	Consumers	236
8.4.3	Policymakers	236
	References	237
Chapter 9	The Recycling of Lithium-ion Batteries: Current and Potential Approaches	246
	<i>Rod Kellner and Emma Goosey</i>	
9.1	Introduction	246
9.2	Waste and Redundancy Issues of Exhausted Batteries	249

9.3	EU Legislation	251
9.3.1	Directives and Regulations	251
9.3.2	Targets	252
9.4	UK Legislation	253
9.4.1	Relevant Regulations	253
9.4.2	Producer Responsibility	255
9.4.3	Obligations of Retailers Selling Portable Batteries	255
9.4.4	Duty of Care and Waste Classification	256
9.4.5	Other Relevant Legislation	257
9.4.6	Safe Transportation	257
9.5	Waste Battery Treatment Options	258
9.5.1	Prevention	258
9.5.2	Reuse/Reconfiguration	260
9.5.3	Recycling	260
9.5.4	Application of Recycling Technologies	261
9.5.5	Examples of Hydrometallurgical Approaches	262
9.5.6	Global Recycling Overview	263
9.5.7	Disposal	265
9.6	Proposed Hydrometallurgical Approaches	265
9.6.1	Pre-commercial Approaches	265
9.6.2	Commercial Approaches	268
9.7	Funded Projects	269
9.7.1	UK Battery Funded Projects	269
9.7.2	EU Battery Funded Projects	271
9.7.3	Potential Impacts of EU Funding	274
9.8	Conclusions	275
	References	276

Chapter 10 Environmentally Sustainable Solvent-based Process Chemistry for Metals in Printed Circuit Boards 278
Karl S. Ryder, Andrew D. Ballantyne, Emma L. Smith, Emma J. R. Palin and Andrew P. Abbott

10.1	Introduction and Overview	279
10.2	DESs as Alternative Solvents for PCB Coatings	282
10.2.1	Electrolytic Coatings from DES	284
10.2.2	Galvanic Immersion Coatings	285
10.3	DESs in PCB Assembly and Process Control	295
10.3.1	Soldering	295
10.3.2	Surface-mount Assembly	297

10.3.3	A New Solderable Surface Finish	299
10.3.4	Process Control and Analysis	302
10.4	Waste Processing and Metal Recovery	304
10.5	Conclusion	308
	Acknowledgements	309
	References	309
Chapter 11	Plastics in Electronic Waste: Results from the PolyCE Project	313
	<i>Rebecca Colley-Jones, Alessia Accili, Luca Campadello and Johanna Emmerich</i>	
11.1	Introduction	314
11.2	PolyCE project: Objectives and Methodology	315
11.3	PolyCE Circular Business Models	318
11.3.1	Business Model Characterisation	318
11.3.2	Dematerialisation Models, Opportunities and Barriers	319
11.4	The WEEE Plastics Value Chain	322
11.4.1	The Role of Stakeholders	322
11.4.2	WEEE Recycling Processes	324
11.5	Material Flow and Mass Balance: Current Situation	325
11.5.1	PCR Plastic Availability	325
11.6	Closing the Loop: the ReValue Model	329
11.6.1	Supply and Demand	329
11.6.2	Material Flow and Mass Balance Considerations	330
11.7	Barriers and Challenges to Adopting the ReValue Model	331
11.8	Large Scale Demonstrator Prototypes	332
11.8.1	Aims and Objectives	332
11.8.2	Demonstrator 1: Cooling and Freezing Appliances	333
11.8.3	Demonstrator 2: Large Household Appliances	333
11.8.4	Demonstrator 3: Small Household Appliances	334
11.9	Summary and Conclusions	334
	Acknowledgements	336
	References	336
	Subject Index	338
