

Contents

Editors Preface	vii
Section 1 Supercritical processes	
H. COHN. Supercritical branching processes: a unified approach	1
J.-P. DION & B. ESSEBBAR. On the statistics of controlled branching processes	14
Section 2 Critical processes	
M.P. QUINE & W. SZCZOTKA. Aspects of the critical case of a generalized Galton-Watson branching process	22
V.A. TOPCHIJ. Critical general branching processes with long-living particles	28
G.P. YANEV & N.M. YANEV. Critical branching processes with random migration	36
Section 3 Processes with immigration	
K.V. MITOV. Some results for multitype Bellman-Harris branching processes with state-dependent immigration	47
I. RAHIMOV. Branching processes as sums of dependent random variables	58
I. RAHIMOV, F. YILDIRIM & A. TESHABAEV. Non-homogenous decomposable branching processes	67
M.N. SLAVTCHOVA-BOJKOVA & N.M. YANEV. Age-dependent branching processes with state dependent immigration	77
Section 4 Processes with varying environments	
S.R. ADKE & V.G. GADAG. A new class of branching processes	90
J.C. D'SOUZA. The extinction time of the inhomogeneous branching process	106
M. IOSIFESCU. Smith-Wilkinson branching processes with random environment and dependence with complete connections	118
Section 5 Measure-valued processes	
D.A. DAWSON, K. FLEISCHMANN & J.-F. LEGALL. Super-Brownian motions in catalytic media	122
L.G. GOROSTIZA. Multitype branching particle systems and high density limits	135
Section 6 Variants on the branching model	
K. HAMZA & F.C. KLEBANER. Representation of Markov chains as stochastic differential equations	144
C.J. MODE. An extension of a Galton-Watson process to a two density dependent model.	152
J. RADCLIFFE & L.RASS. Multitype contact branching process	169
