

# Contents

<i>Preface</i> . . . . .	v
<i>Contributors</i> . . . . .	ix
PART I GENERAL EXPERIMENTAL METHODS	
1 Flow Cytometry and Direct Sequencing of Viruses . . . . . <i>Mária Džunková</i>	3
2 Tissue-Based Universal Virus Detection (TUViD-VM) Protocol for Viral Metagenomics . . . . . <i>Claudia Kohl and Andreas Kurth</i>	15
3 Protocol for Generating Infectious RNA Viromes from Complex Biological Samples . . . . . <i>Sonia Monteil-Bouchará, Sarah Temmam, and Christelle Desnues</i>	25
4 Phage on Tap: A Quick and Efficient Protocol for the Preparation of Bacteriophage Laboratory Stocks . . . . . <i>Natasha Bonilla and Jeremy J. Barr</i>	37
PART II GASTROINTESTINAL TRACT	
5 Extraction and Purification of Viruses from Fecal Samples for Metagenome and Morphology Analyses . . . . . <i>Josué L. Castro-Mejía, Ling Deng, Finn K. Vogensen, Alejandro Reyes, and Dennis S. Nielsen</i>	49
6 Virome Sequencing of Stool Samples . . . . . <i>Lenka Kramná and Ondřej Cinek</i>	59
7 NetoVIR: Modular Approach to Customize Sample Preparation Procedures for Viral Metagenomics . . . . . <i>Nádia Conceição-Neto, Kwe Claude Yinda, Marc Van Ranst, and Jelle Matthijssens</i>	85
8 Viral Genome Isolation from Human Faeces for Succession Assessment of the Human Gut Virome . . . . . <i>David Mayo-Muñoz</i>	97
PART III RESPIRATORY TRACT	
9 Introduction to Techniques and Methodologies for Characterizing the Human Respiratory Virome . . . . . <i>Alicia B. Mitchell and Allan R. Glanville</i>	111
10 Targeted Sequencing of Respiratory Viruses in Clinical Specimens for Pathogen Identification and Genome-Wide Analysis . . . . . <i>Yu Yung, Shannon D. Walls, Stephen M. Gross, Gary P. Schroth, Richard G. Jarman, and Jun Hang</i>	125

**PART IV ORAL CAVITY**

- 11 Methods for Enrichment and Sequencing of Oral Viral Assemblages:  
Saliva, Oral Mucosa, and Dental Plaque Viromes . . . . . 143  
*Marcos Parras-Moltó and Alberto López-Bueno*

**PART V BLOOD-PLASMA**

- 12 A Method for Isolation of the Virome from Plasma Samples . . . . . 165  
*Pilar Domingo-Calap and Juan Vicente Bou*
- 13 Viral Concentration and Amplification from Human Serum Samples  
Prior to Application of Next-Generation Sequencing Analysis. . . . . 173  
*Xavier Fernandez-Cassi, Marta Rusiñol,  
and Sandra Martínez-Puchol*

**PART VI URINARY TRACT**

- 14 Identification and Quantification of DNA Viral Populations  
in Human Urine Using Next-Generation Sequencing Approaches . . . . . 191  
*Tasha M. Santiago-Rodriguez*

**PART VII BIOINFORMATICS**

- 15 Diversity Analysis in Viral Metagenomes . . . . . 203  
*Jorge Francisco Vázquez-Castellanos*
- 16 Construction of a Comprehensive Database from the Existing  
Viral Sequences Available from the International Nucleotide  
Sequence Database Collaboration . . . . . 231  
*Rodrigo García-López*
- 17 Robust Analysis of Time Series in Virome Metagenomics . . . . . 245  
*Jose Manuel Martí*
- 18 Bioinformatics Assembling and Assessment of Novel Coxsackievirus  
B1 Genome . . . . . 261  
*Jake Lin, Bryn T. Kimura, Sami Oikarinen, and Matti Nykter*

- Index* . . . . . 273
