Preface	xi
0.1 What is web mapping?	xi
0.2 What is JavaScript?	xiii
0.3 Why use JavaScript for web mapping?	xiii
0.4 Learning objectives	xiv
0.5 Software	xiv
0.6 Background knowledge	xvi
0.7 Online version	xvii
0.8 Acknowledgments	xvii
Author	xix
I Introduction to Web Technologies	1
1 HTML	3
1.1 Introduction	3
1.2 How do people access the web?	4
1.3 Web pages	5
1.4 Text editors	7
1.5 What is HTML?	8
1.6 Common HTML elements	10
1.7 id, class, and style attributes	29
1.8 Code layout	30
1.9 Inspecting elements	31
1.10 Exercise	32
2 CSS	33
2.1 Introduction	33
2.2 What is CSS?	33
2.3 CSS rules	33
2.4 CSS selectors	35
2.5 CSS conflicts	37
2.6 CSS inheritance	38
2.7 Linking CSS to HTML	39
2.8 CSS properties	41
2.9 Hurricane scale example	52
2.10 Map description example	54
2.11 Exercise	58
3 JavaScript Basics	59
3.1 Introduction	59
3.2 What is JavaScript?	59

3.3	Client-side vs. server-side	60
3.4	The JavaScript console	60
3.5	Assignment	62
3.6	Data types	63
3.7	Functions	70
3.8	Methods	71
3.9	Scope	74
3.10	Flow control	75
3.11	JavaScript Object Notation (JSON)	79
3.12	Exercise	82
4	JavaScript Interactivity	85
4.1	Introduction	85
4.2	The Document Object Model (DOM)	85
4.3	Accessing and modifying elements	87
4.4	What is jQuery?	93
4.5	Including the jQuery library	94
4.6	Selecting elements	96
4.7	Operating on selection	96
4.8	Binding event listeners	101
4.9	Hello example	102
4.10	Poles example	104
4.11	The event object	106
4.12	Iteration over arrays and objects	108
4.13	Modifying page based on data	109
4.14	Working with user input	113
4.15	Exercise	114
5	Web Servers	117
5.1	Introduction	117
5.2	Web servers	118
5.3	Communicating through HTTP	118
5.4	Static vs. dynamic servers	120
5.5	URLs and file structure	124
5.6	Running a static server	127
II	Web Mapping with Leaflet	137
6	Leaflet	139
6.1	Introduction	139
6.2	What is a web map?	139
6.3	What is Leaflet?	140
6.4	Alternatives to Leaflet	140
6.5	Creating a basic web map	142
6.6	Adding vector layers	154
6.7	Adding popups	159
6.8	Adding a description	160
6.9	Introducing map events	163
6.10	Exercise	167

7	GeoJSON	169
7.1	Introduction	169
7.2	What is GeoJSON?	169
7.3	GeoJSON structure	170
7.4	Editing GeoJSON	178
7.5	Adding GeoJSON to Leaflet map	181
7.6	GeoJSON viewer example	184
7.7	Ajax	188
7.8	The \$.getJSON function	192
7.9	Exercise	196
8	Symbology and Interactivity	199
8.1	Introduction	199
8.2	L.geoJSON options	199
8.3	Constant style	200
8.4	Varying style	201
8.5	Constructing popups from data	209
8.6	Adding a legend	211
8.7	Using CSS to style the legend	213
8.8	Dynamic style	214
8.9	Exercise	223
III	Databases	225
9	Databases	227
9.1	Introduction	227
9.2	What is CARTO?	228
9.3	Databases	229
9.4	Spatial databases	230
9.5	What is PostGIS?	231
9.6	What is SQL?	231
9.7	The CARTO SQL API	236
9.8	CARTO and Leaflet	242
9.9	Exercise	245
10	Non-spatial Queries	247
10.1	Introduction	247
10.2	Subsetting with SQL	247
10.3	Creating a dropdown menu	250
10.4	Populating dropdown options	253
10.5	Updating the map	259
10.6	Refactoring the code	263
10.7	Exercise	265
11	Spatial Queries	267
11.1	Introduction	267
11.2	Adding markers on click	267
11.3	Spatial PostGIS operators	273
11.4	Adding nearest points to map	277
11.5	Drawing line connectors	280
11.6	Exercise	283

IV	Advanced Topics	285
12	Client-Side Geoprocessing	287
12.1	Introduction	287
12.2	Geoprocessing with Turf.js	288
12.3	Great Circle line	289
12.4	Continuously updated TIN	291
12.5	Clustering	299
12.6	Heatmaps with Leaflet.heat	307
12.7	Exercise	308
13	Collaborative Mapping	311
13.1	Introduction	311
13.2	Crowdsourcing	311
13.3	The drawing control	313
13.4	Working with drawn items	316
13.5	Submission form	320
13.6	Sending features to the database	324
13.7	Exercise	333
V	Appendices	335
A	Associated files	337
B	List of examples	339
C	List of exercise solutions	341
	Bibliography	343
	Index	345
