1. Salivary cortisol as a non-invasive window on the brain	1
Angela Clow and Nina Smyth	
1. Why is cortisol interesting?	2
2. What is cortisol?	3
3. Stress and its measurement	4
4. Salivary cortisol measurement in human studies	6
5. Stress reactivity studies	6
6. Basal pattern of salivary cortisol secretion	8
7. The ultradian pattern of cortisol secretion and the cortisol awakening response	9
8. Alternative strategies to probe brain function using salivary cortisol	11
9. Methodological issues when measuring basal salivary cortisol secretion	12
10. Conclusions	13
References	14
2. Prenatal stress: Effects on fetal and child brain development	17
Alexandra Lautarescu, Michael C. Craig, and Vivette Glover	
1. Introduction	18
2. Effects of prenatal stress on fetal brain development	20
3. Underlying mechanisms	33
4. Conclusions	35
References	35
3. The development of stress reactivity and regulation during human development	41
Melissa L. Engel and Megan R. Gunnar	
1. Anatomy and physiology of the HPA axis and its development	43
2. Theoretical perspectives on stress and development	53
3. Sensitive periods	57
4. Social regulation of stress during development	63
5. Conclusions and future directions	68

Acknowledgments	70
References	70
Further reading	76
4. The impact of childhood poverty on brain health: Emerging evidence from neuroimaging across the lifespan	77
Alexander J. Dufford, Pilyoung Kim, and Gary W. Evans	
1. Introduction	78
2. Lifespan perspective	79
3. Prenatal period and infancy	80
4. Childhood	82
5. Adolescence	83
6. Adulthood and late adulthood	84
7. Links to physical health, behavioral outcomes, and mental health	85
8. Risks and protective factors	87
9. Future directions	90
10. Conclusions	98
References	98
Further reading	105
5. Psychosocial stress and epigenetic aging	107
Helena Palma-Gudiel, Lourdes Fañanás, Steve Horvath, and Anthony S. Zannas	
1. Chronological versus biological age	108
2. Epigenetic embedding of psychosocial stress	110
3. Exposure to life adversity accelerates epigenetic aging	116
4. Socioeconomic status and epigenetic aging	118
5. Developmental programming of epigenetic age at birth	119
6. Mechanistic insights of stress-mediated accelerated aging	121
References	122
6. Effects of stress on the structure and function of the medial prefrontal cortex: Insights from animal models	129
Cara L. Wellman, Justin L. Bollinger, and Kelly M. Moench	
1. Introduction	130
2. Effects of chronic stress on prefrontally-mediated behaviors	132

3. Effects of chronic stress on structure and function of the prefrontal cortex	133
4. Long-term sequelae of chronic stress	137
5. Mechanisms of chronic stress-induced alterations in the medial prefrontal cortex	138
6. Sex differences in the effect of stress on the medial prefrontal cortex	142
7. Conclusions	145
Conflict of interest statement	146
References	146
 7. Environment and early life: Decisive factors for stress-resilience and vulnerability	 155
Akshaya Hegde and Rupshi Mitra	
1. The influence of early life stress in behavioral plasticity	156
2. A critical role of mother-infant interactions in mental health	157
3. Mechanisms of homeostasis, allostatic load, stress vulnerability, and resilience	160
4. Neuroendocrine systems regulating the stress response	161
5. Influences of differential early-life environment on brain function?	165
6. Environmental control of stress resilience	167
7. Conclusion	174
Acknowledgment	175
References	175
 8. Stress, the cortisol awakening response and cognitive function	 187
Robin Law and Angela Clow	
1. Stress, cortisol and cognition	188
2. The cortisol awakening response	189
3. The suprachiasmatic nucleus	199
4. The circadian system and psychopathology	201
5. The CAR and cognition	202
6. The CAR and memory functions	203
7. The CAR and executive function	206
8. Recommendations for future research	208
9. Conclusion	210
References	210

9. Effectiveness of stress-relieving strategies in regulating patterns of cortisol secretion and promoting brain health	219
Nina Smyth, Elena Rossi, and Carly Wood	
1. Stress-disease and well-being-health links	220
2. Cortisol: Its role in health	221
3. Cortisol "a window on the brain": A marker of brain health	222
4. Stress-relieving strategies	225
5. Arts and music therapies	226
6. Conclusions	238
References	239
