<i>Preface: Endoplasmic reticulum in health and disease</i>	<i>xiii</i>
1. Endoplasmic reticulum stress in the cellular release of damage-associated molecular patterns	1
Alejandra Wu Chuang, Oliver Kepp, Guido Kroemer, and Lucillia Bezu	
1. ER stress	2
2. Danger signaling	4
3. Emission of immunostimulatory DAMPs during ICD	5
4. ROS production, ER stress and ICD in anticancer therapy	8
5. ER stress and DAMP emission in infection and inflammatory diseases	9
6. Concluding remarks	17
Acknowledgments	19
References	19
2. Emerging roles of the unfolded protein response (UPR) in the nervous system: A link with adaptive behavior to environmental stress?	29
Mei-Li Díaz-Hung, Gabriela Martínez, and Claudio Hetz	
1. Introduction	30
2. Proteostasis and the unfolded protein response	32
3. Linking the UPR to behavior from an evolutionary perspective	36
4. Interplay between circadian clock and UPR	41
5. Cellular stress responses in behavioral stress	44
6. Immune responses under environmental stress. Role of UPR and therapeutics implications	48
7. Concluding remarks	50
Acknowledgments	51
Author contributions	51
References	51
3. Type I interferons and endoplasmic reticulum stress in health and disease	63
Jenny Sprooten and Abhishek D. Garg	
1. Introduction	64
2. Type I interferons: An introduction	65

3. ER stress and inflammation: An introduction	71
4. ER stress and type I IFNs: There and back again	82
5. Conclusion	90
Acknowledgments	91
References	91
4. The role of mitochondria-associated membranes in cellular homeostasis and diseases	119
Mariasole Perrone, Natascia Caroccia, Ilaria Genovese, Sonia Missiroli, Lorenzo Modesti, Gaia Pedriali, Bianca Vezzani, Veronica Angela Maria Vitto, Michele Antenori, Magdalena Lebiedzinska-Arciszewska, Mariusz R. Wieckowski, Carlotta Giorgi, and Paolo Pinton	
1. Introduction	120
2. MAMs structure and composition	121
3. Function and signaling role of MAMs in cellular pathways	125
4. MAMs in diseases	150
5. Conclusions	173
Acknowledgments	173
References	174
5. Sarcoplasmic reticulum and calcium signaling in muscle cells: Homeostasis and disease	197
Roberto Bravo-Sagua, Valentina Parra, Felipe Muñoz-Cordova, Pablo Sanchez-Aguilera, Valeria Garrido, Ariel Contreras-Ferrat, Mario Chiong, and Sergio Lavandero	
1. Introduction	198
2. SR/ER structure	205
3. Ca ²⁺ cell physiology in striated muscle cell	214
4. Ca ²⁺ cell physiology in smooth muscle	221
5. SR/ER dysfunction and diseases	230
6. Concluding remarks	241
Acknowledgments	243
References	243
6. Endoplasmic reticulum in viral infection	265
Parikshit Bagchi	
1. Introduction	265
2. The endoplasmic reticulum or ER	266

3. Exploitation of ER functions by viruses	268
4. Conclusions and future perspectives	277
References	278
 7. Targeting endoplasmic reticulum stress and autophagy as therapeutic approaches for neurological diseases	 285
Annadurai Thangaraj, Susmita Sil, Ashutosh Tripathi, Ernest T. Chivero, Palsamy Periyasamy, and Shilpa Buch	
1. Introduction	286
2. The interplay of ER stress and autophagy	287
3. Involvement of CNS cells	289
4. Brain infections	297
5. CNS injury	298
6. Neurodegenerative disorders	301
7. Conclusions and future perspectives	309
References	311
