<i>Preface</i>	ix
1 GENERAL SURVEY	
1.1 Definition of Index Numbers	1
1.2 Notation	8
1.3 Choice of Formula: Stochastic Approach	10
1.4 Choice of Formula: Aggregative/Weighted Average Approach	18
1.5 Runs of Index Numbers: Switching and Splicing	27
1.6 Runs of Aggregative Index Numbers	33
1.7 Index Numbers in Practice	37
1.8 The Irving Fisher Tests	44
1.9 The Economic-theoretic Approach	47
2 THEORY; THE TWO-SITUATION CASE	
2.1 The Problem	50
2.2 Basic Concept: Laspeyres (base-weighted) Index	51
2.3 Derived Concept: Paasche (current-weighted) Index	53
2.4 Properties of Laspeyres and Paasche Forms	55
2.5 Forward and Backward Index Numbers	59
2.6 Fisher Ideal Index	60
2.7 Statistical Relation between Laspeyres and Paasche Forms	62
2.8 Economic Theory: Constant-utility Price Index	65
2.9 Economic Theory: Constant-resources Price Deflator	72
3 ILLUSTRATIONS	
3.1 Introduction	76
3.2 Weighted-Average Index: Retail Prices	77
3.3 Retail Sales: Value and Volume	86
3.4 The Use of Price Quotations	88
3.5 Aggregative Index Numbers: Some Practical Problems	93

3.6	Retail Price Index: Pensioner Households	106
3.7	Aggregative Index Numbers: External Trade	115
3.8	Aggregative Index Numbers: Gross Domestic Product	126
3.9	Three Measures of Real GDP	131
	<i>Appendix: Source Material</i>	
	A Retail Prices and Consumption	137
	B Gross Domestic Product from Expenditure and Output Data	140
4	RUNS OF INDEX NUMBERS	
4.1	Introduction	145
4.2	Runs of Laspeyres Index Numbers	146
4.3	Runs of Paasche Index Numbers	151
4.4	Runs Read Backwards and Forwards	154
4.5	Splicing in Practice	156
4.6	The Value Matrix	163
4.7	Relation between Laspeyres and Paasche Runs	165
4.8	Monthly or Quarterly Runs: Seasonal Variation	169
5	CHAIN INDEX NUMBERS	
5.1	Economic-theoretic Approach	177
5.2	Statistical-theoretic Approach: Divisia Integral Index	178
5.3	Chain Index with Annual Links	180
5.4	Chaining in Practice	182
5.5	Runs of Index Numbers: Drifting	186
5.6	Chaining more Frequently than Annually	188
5.7	Chain and Direct Index Numbers Compared: Retail Prices	191
5.8	Chain and Direct Index Numbers Compared: Real Consumption	195
6	SOME APPLICATIONS	
6.1	Introduction	198
6.2	Commodity Prices	199
6.3	Consumer Prices versus Retail Prices	205
6.4	Inequality of Incomes: Differential Price Changes	209
6.5	International Comparisons of Real Income	214

6.6	Real GDP based on Output Data	220
6.7	Industrial Production Index: Effect of Revisions	223
6.8	Employment and Unemployment	228
6.9	Stock-Market Prices	234
7	FURTHER INDEX-NUMBER PROBLEMS	
7.1	Sampling Aspects: Price Quotations	241
7.2	Sampling Aspects: Weights	246
7.3	Best Linear Index: Two-situation Case	249
7.4	Best Linear Index: General Case	250
7.5	Quality Changes: Prices versus Unit Values	252
7.6	Quality Changes: Technical Factors	254
7.7	Quality Changes: Household Production Theory	260
7.8	Changes in Tastes and Qualities	265
	<i>Bibliography</i>	270
	<i>Index</i>	275
