CONTENTS

PREFACE xiii
INTRODUCTION xv

PART 1 SINGLE-EQUATION REGRESSION MODELS

1 Introduction to the Regression Model 3

1.1 CURVE FITTING 3
1.2 DERIVATION OF LEAST SQUARES 7
Appendix 1.1 The Use of Summation Operators 13
Appendix 1.2 Derivation of Least-Squares Parameter Estimates 16

2 Elementary Statistics: A Review 19

2.1 RANDOM VARIABLES 19
2.2 ESTIMATION 23
2.3 DESIRABLE PROPERTIES OF ESTIMATORS 27
2.4 PROBABILITY DISTRIBUTIONS 31
2.5 HYPOTHESIS TESTING AND CONFIDENCE INTERVALS 35
Appendix 2.1 The Properties of the Expectations Operator 40

3 The Two-Variable Regression Model 46

3.1 THE MODEL 46
3.2 BEST LINEAR UNBIASED ESTIMATION 50
3.3 HYPOTHESIS TESTING AND CONFIDENCE INTERVALS 55
3.4 ANALYSIS OF VARIANCE AND CORRELATION 59
Appendix 3.1 Variance of the Least-Squares Slope Estimator 66
Appendix 3.2 Maximum-Likelihood Estimation 67
Appendix 3.3 Some Properties of the Least-Squares Residuals 69

4 The Multiple Regression Model 73

4.1 THE MODEL 73
4.2 REGRESSION STATISTICS 76
4.3 F TESTS, R^2, AND CORRECTED R^2 76
4.4 MULTICOLLINEARITY 83
4.5 STANDARDIZED COEFFICIENTS AND ELASTICITIES 85
4.6 PARTIAL CORRELATION AND STEPWISE REGRESSION 86
Appendix 4.1 Least-Squares Parameter Estimation 91
Appendix 4.2 Regression Coefficients 92
Appendix 4.3 The Multiple Regression Model in Matrix Form 93

5 Using the Multiple Regression Model 101

5.1 THE GENERAL LINEAR MODEL 101
5.2 USE OF DUMMY VARIABLES 104
5.3 THE USE OF t AND F TESTS FOR HYPOTHESES INVOLVING MORE THAN ONE PARAMETER 110
5.4 PIECEWISE LINEAR REGRESSION 117
5.5 THE MULTIPLE REGRESSION MODEL WITH STOCHASTIC EXPLANATORY VARIABLES 120
Appendix 5.1 Tests Involving Dummy-Variable Coefficients 121

6 Serial Correlation and Heteroscedasticity 126

6.1 HETEROSCEDASTICITY 127
6.2 SERIAL CORRELATION 137
Appendix 6.1 Generalized Least-Squares Estimation 149

7 Instrumental Variables and Model Specification 157

7.1 CORRELATION BETWEEN AN INDEPENDENT VARIABLE AND THE ERROR TERM 158
7.2 ERRORS IN VARIABLES 159
7.3 SPECIFICATION ERROR 162
7.4 REGRESSION DIAGNOSTICS 168
7.5 SPECIFICATION TESTS 173
Appendix 7.1 Instrumental-Variables Estimation in Matrix Form 177

8 Forecasting with a Single-Equation Regression Model 180

8.1 UNCONDITIONAL FORECASTING 182
8.2 FORECASTING WITH SERIALLY CORRELATED ERRORS 190

8.3 CONDITIONAL FORECASTING 195
Appendix 8.1 Forecasting with the Multivariate Regression Model 198

9 Single-Equation Estimation: Advanced Topics 203

9.1 DISTRIBUTED LAGS 204
9.2 TESTS FOR CAUSALITY 216
9.3 MISSING OBSERVATIONS 219
9.4 POOLING OF CROSS-SECTION AND TIME-SERIES DATA 223
9.5 NONLINEAR ESTIMATION 231
9.6 MAXIMUM-LIKELIHOOD ESTIMATION 238
Appendix 9.1 Estimating Confidence Intervals for Long-Run Elasticities 244

10 Models of Qualitative Choice 248

10.1 BINARY-CHOICE MODELS 248
10.2 MULTIPLE-CHOICE MODELS 269
10.3 CENSORED REGRESSION MODELS 275
Appendix 10.1 Maximum-Likelihood Estimation of the Logit and Probit Models 279

PART 2 MULTI-EQUATION SIMULATION MODELS

11 Simultaneous-Equation Estimation 287

11.1 INTRODUCTION TO SIMULTANEOUS-EQUATION MODELS 288
11.2 THE IDENTIFICATION PROBLEM 292
11.3 CONSISTENT PARAMETER ESTIMATION 296
11.4 TWO-STAGE LEAST SQUARES 298
11.5 SIMULTANEOUS-EQUATION ESTIMATION WITH SERIAL CORRELATION AND LAGGED DEPENDENT VARIABLES 305
11.6 MORE ADVANCED ESTIMATION METHODS 308
Appendix 11.1 The Identification Problem in Matrix Form 315
Appendix 11.2 Instrumental-Variables Estimation in Matrix Form 320
Appendix 11.3 Two-Stage Least Squares in Matrix Form 322
Appendix 11.4 Seemingly Unrelated Regression Estimation in Matrix Form 326

12 Introduction to Simulation Models 331

12.1 THE SIMULATION PROCESS 332
12.2 EVALUATING SIMULATION MODELS 336

12.3 A SIMULATION EXAMPLE 343
12.4 MODEL ESTIMATION 350
12.5 NONSTRUCTURAL MODELS—VECTOR AUTOREGRESSIONS 353
12.6 MODELING WITH LIMITED DATA 359

13 Dynamic Behavior of Simulation Models 367

13.1 MODEL BEHAVIOR: STABILITY AND OSCILLATIONS 368
13.2 MODEL BEHAVIOR: MULTIPLIERS AND DYNAMIC RESPONSE 376
13.3 THE IMPULSE RESPONSE FUNCTION AND VECTOR AUTOREGRESSIONS 385
13.4 TUNING AND ADJUSTING SIMULATION MODELS 390
13.5 STOCHASTIC SIMULATION 393
Appendix 13.1 A Small Macroeconomic Model 396

PART 3 TIME-SERIES MODELS

14 Smoothing and Extrapolation of Time Series 417

14.1 SIMPLE EXTRAPOLATION MODELS 417
14.2 SMOOTHING AND SEASONAL ADJUSTMENT 428

15 Properties of Stochastic Time Series 440

15.1 INTRODUCTION TO STOCHASTIC TIME-SERIES MODELS 440
15.2 CHARACTERIZING TIME SERIES: THE AUTOCORRELATION FUNCTION 446
15.3 TESTING FOR RANDOM WALKS 459
15.4 CO-INTEGRATED TIME SERIES 465
Appendix 15.1 The Autocorrelation Function for a Stationary Process 468

16 Linear Time-Series Models 472

16.1 MOVING AVERAGE MODELS 473
16.2 AUTOREGRESSIVE MODELS 478
16.3 MIXED AUTOREGRESSIVE–MOVING AVERAGE MODELS 486
16.4 HOMOGENEOUS NONSTATIONARY PROCESSES: ARIMA MODELS 489
16.5 SPECIFICATION OF ARIMA MODELS 491
Appendix 16.1 Stationarity, Invertibility, and Homogeneity 495

17 Estimating and Checking Time-Series Models 499

17.1 MODEL ESTIMATION 499
17.2 DIAGNOSTIC CHECKING 504
Appendix 17.1 Nonlinear Estimation of ARIMA Models 509

18 Forecasting with Time-Series Models 516

18.1 MINIMUM MEAN SQUARE ERROR FORECAST 516
18.2 COMPUTING A FORECAST 518
18.3 THE FORECAST ERROR 520
18.4 FORECAST CONFIDENCE INTERVALS 521
18.5 PROPERTIES OF ARIMA FORECASTS 522
18.6 TWO EXAMPLES 530

19 Applications of Time-Series Models 536

19.1 REVIEW OF THE MODELING PROCESS 537
19.2 MODELS OF ECONOMIC VARIABLES: INVENTORY INVESTMENT 538
19.3 FORECASTING SEASONAL TELEPHONE DATA 544
19.4 COMBINING REGRESSION ANALYSIS WITH A TIME-SERIES MODEL: TRANSFER FUNCTION MODELS 548
19.5 A COMBINED REGRESSION–TIME-SERIES MODEL TO FORECAST SHORT-TERM SAVINGS DEPOSIT FLOWS 550
19.6 A COMBINED REGRESSION–TIME-SERIES MODEL TO FORECAST INTEREST RATES 554

STATISTICAL TABLES 561
