CONTENTS

Praise for the Second Edition	**ix**
About the Author	**xi**
Series Editor's Introduction	**xiii**
Preface	**xv**
1. The Need for Multilevel Modeling	**1**
Background and Rationale	1
Theoretical Reasons for Multilevel Models	2
Statistical Reasons for Multilevel Models	4
Scope of This Book	6
Online Book Resources	8
2. Planning a Multilevel Model	**9**
The Basic Two-Level Multilevel Model	9
The Importance of Random Effects	11
Classifying Multilevel Models	12
3. Building a Multilevel Model	**16**
Introduction to Tobacco Voting Data Set	16
Assessing the Need for a Multilevel Model	18
Model-Building Strategies	23
Estimation	25
Level 2 Predictors and Cross-Level Interactions	26
Hypothesis Testing	28
4. Assessing a Multilevel Model	**34**
Assessing Model Fit and Performance	34
Estimating Posterior Means	47
Centering	52
Power Analysis	57
5. Extending the Basic Model	**63**
The Flexibility of the Mixed-Effects Model	63
Generalized Models	63
Three-Level Models	72
Cross-Classified Models	76

Luke, Douglas A.
Multilevel modeling

digitalisiert durch:
IDS Basel Bern

6. Longitudinal Models **79**
Longitudinal Data as Hierarchical: Time Nested Within Person 79
Intraindividual Change 80
Interindividual Change 87
Alternative Covariance Structures 90

7. Guidance **94**
Recommendations for Presenting Results 94
Useful Resources 97

References **100**

Index **105**
