

Contents

Introduction	1
Notations and preliminaries	3
Chapter 1. Lubin-Tate theory and the character variety	5
1.1. Global functions on a one dimensional smooth quasi-Stein space	5
1.2. The variety \mathfrak{X} and the ring $\mathcal{O}_K(\mathfrak{X})$	9
1.3. The LT-isomorphism	11
1.4. The monoid action on $\mathcal{O}_K(\mathfrak{X})$	15
Chapter 2. The boundary of \mathfrak{X} and (φ_L, Γ_L) -modules	17
2.1. The boundary of \mathfrak{X}	17
2.2. The monoid action on $\mathcal{R}_K(\mathfrak{X})$	25
2.3. The action of $\text{Lie}(\Gamma_L)$	27
2.4. (φ_L, Γ_L) -modules	32
Chapter 3. Construction of (φ_L, Γ_L) -modules	39
3.1. An application of the Colmez-Sen-Tate method	39
3.2. The equivalence between L -analytic (φ_L, Γ_L) -modules over \mathfrak{B} and \mathfrak{X}	48
3.3. Etale L -analytic (φ_L, Γ_L) -modules	55
3.4. Crystalline (φ_L, Γ_L) -modules over $\mathcal{O}_L(\mathfrak{X})$	59
3.5. Crystalline (φ_L, Γ_L) -modules over $\mathcal{R}_L(\mathfrak{X})$	73
Bibliography	77
