Preface ix

1. The Case for Innate Knowledge 1

First steps to innate knowledge	3
The knowledge behind sentence production	4
The constraints on grammatical rules	7
The introduction of innate knowledge	11
Potential assistance from other speakers	13
The significance of motherese	14
The relevance of conversational replies	17
The role of misunderstanding	21
Further options for the acquisition process	24
The power of the linguistic environment	24
The possibility of an alternative process	26
A strategy for further research	30

2. The Contextual Completion of Meaning	35
Imperative sentences and the directing of behaviour	38
The functions of imperative sentences	39
The sensitivity to behaviour direction	44
The awareness of entity roles	46
Interrogative sentences and the asking of questions	52
The subcategorisation of interrogative sentences	53
The deployment of indirect speech acts	55
The implication of literal meaning	56
Declarative sentences and the providing of information	61
The differentiation of information providing	62
The exclusion of performative clauses	66
Some conclusions on specific content	69
The nature of contextually completed meaning	73
3. The Time-scale to Observational Adequacy	77
Assimilation to extralinguistic structures	79
The emergence of the assimilation approach	81
An appraisal of the initial model	85
The implications of sentence assimilation	87
Accommodation to sentential properties	91
The formulation of LAS	91
The emergence of ALAS	94
The relevance of accommodation	97
Three stages in grammar learning	101
The formation of input mappings	102
The integration of meaning elements	112
The fusion of lexical items	119
The convergence on observational adequacy	123
4. The Approximation to Psychological Reality	131
A theoretical account of the basic steps	133
The nature of telegraphic mappings	134
The creation of composite mappings	137
The metamorphosis into adult grammar	141

A communicative system of growing power	147
The multiplication of meaning elements	147
The lexicalisation of communicative expressions	150
The sequencing of lexical items	152
A rule-bound system in flux	155
The switch to a rule-bound system	156
The emergence of grammatical categories	160
The introduction of context specificity	166
5. The Establishment of an Alternative Theory	173
Prolegomena to a cross-linguistic analysis	175
The universality of contextually completed meaning	175
The variable sequencing of lexical items	178
A possible explanation of grammatical structure	182
Implications for developmental psychology	184
The processing of input mappings	185
The integration and production procedures	188
Linguistic autonomy and general learning	190
